APPLICATION TO CHANGE ZONING CLASSIFICATION TO PUBLIC SERVICE FACILITY OVERLAY DISTRICT ON BEHALF OF THE HERNANDO COUNTY SCHOOL BOARD

I. INTRODUCTION

In order to meet the growth needs of the Hernando County student population, as well as the growing need for additional school facilities necessitated by the recent constitutional amendment approved by the voters in November of 2002, the Hernando County School Board began the process of searching for parcels of property of sufficient size to meet the needs of a school facility as well as be appropriately located to meet growth needs and utility availability.

The Hernando County School Board painstakingly reviewed over 35 parcels of property and visited a number of them for the purpose of evaluating each parcel's suitability for utilization as a school. The factors considered by the Board were as follows:

- A. Size;
- B. Location;
- C. Availability of utilities;
- D. Availability of adequate access;
- E. Contour and configuration;
- F. Ability to handle increase traffic flow resulting from location of a school facility;
- G. Cost.

In reviewing parcels with these criteria in mind, the Hernando County School Board selected the property which is the subject of this application for utilization as a school facility. It is anticipated that the school will be a kindergarten through eighth grade facility, housing approximately 1,000 students. The school will have classroom facilities, cafeteria facilities, playground and recreational facilities as well as a bus loop and parking accommodations. An approximate sketch of the anticipated size and location of the school facility within the property is attached hereto as Exhibit 4. While this is only an estimate, it does provide information as to the Hernando County School Board's intended use of this property.

II. CURRENT ZONING AND PROPOSED ZONING

The property is currently zoned residential and consists of 30 acres. The Hernando County School Board is requesting that the Board of County Commissioners approve the rezoning of this property from residential to Public Service Overlay Facility District.

III. OWNERSHIP

The property is subject to a Contract for Sale and Purchase with appropriate contingencies for rezoning and other matters. A copy of such contract is attached hereto as Exhibit 5 to this application.

IV. ADJACENT OWNERS

Attached hereto as Exhibit 6 to this application is a list of all of the owners who are within 250 feet of the property described in this application. Attached hereto as Exhibit 7 is a sketch showing all property owners that are within 250 feet of the property which is the subject of this application and attached hereto as Exhibit 8 is a copy of a drawing of the property being rezoned showing parcel dimensions, access, abutting streets, required setbacks and natural features. It is anticipated that expert witnesses will be utilized at the public hearing of this matter for the purpose of testifying as to utility availability, traffic patterns, and the impact of the proposed facility.

V. TRAFFIC IMPACTS

Although no formal traffic impact studies have been performed as of this date, the Hernando County School Board has historically developed a number of school facilities. Traffic impacts of this proposed school are expected to be minimal insomuch as the property is of sufficient size to absorb the primary traffic impact generated by school facilities on site. Based upon prior traffic studies for other school facilities, such as Chocachatti Elementary School and Nature Coast High School, a preliminary traffic estimate of 500 trips per day is reasonable. Further, traffic studies and information will be available as the site is actually developed. For specific details as to access to the site and proposed traffic improvements, See Exhibit 9 attached.

VI. CURRENT CONDITION OF ADJACENT NATURAL RESOURCES

The current condition of adjacent natural resources and land uses relative to the subject site are residential subdivisions located to the east, west, north and south of the property. The impact on these areas will be minimal. Natural resources of the property consist of vacant relatively level property. The Seller has agreed to donate the balance of its property consisting of 11.5 acres to the county for use as a park and make a 50,000.00 donation for use in developing the same.

VII. UTILITIES

The property will be served by Florida Water Services as to water. See, Exhibit 10 attached. Sewer will be served by extending central sewer services from a lift station located at Mariner Boulevard, a distance of approximately 1,000 feet.

VIII. COMPLIANCE WITH POLICY 1.011(7) OF THE HERNANDO COUNTY COMPREHENSIVE LAND USE PLAN

The proposed school site is compatible with the surrounding uses and the Hernando County Comprehensive Land Use Plan, Objective 1.011 as follows:

- a) The site is compatible with existing and projected uses of adjacent properties.
- b) The site area of the proposed location provides sufficient area to accommodate all needed utilities and support facilities and allow for adequate buffering of surrounding land uses.
- c) There will be adequate public services and facilities to support the public educational facility based on the Capital Improvement Program of the School Board and the County's Comprehensive Plan.
- d) No significant environmental constraints will preclude development of a public educational facility on the site.
- e) There will be no adverse impact on archaeological or historic sites listed in the National Register of Historic Places or designated by a local government as locally significant historic or archaeological resources.
- f) The proposed location is well drained and soils are suitable for development or are adaptable for development and outdoor educational purposes with drainage improvements.
- g) The site is not in conflict with the County's Stormwater Management Plan and any watershed management plans adopted by the County, if applicable.
- h) The site is not in a velocity zone or a floodway.
- i) The site can accommodate the required parking and anticipated queuing of vehicles onsite.
- j) The site lies outside the area regulated by Section 333.03(3), F.S., regarding the construction of public educational facilities in the vicinity of an airport.

Application to Change Zoning Classification
Hernando County
Page Four.

IX. CONCLUSION

Should the Board of County of Commissioners and the Hernando County Planning and Zoning Commission approve this application, the Board anticipates closing the purchase of the property within three months of such approval.

(352) 797-7050

MEMORANDUM

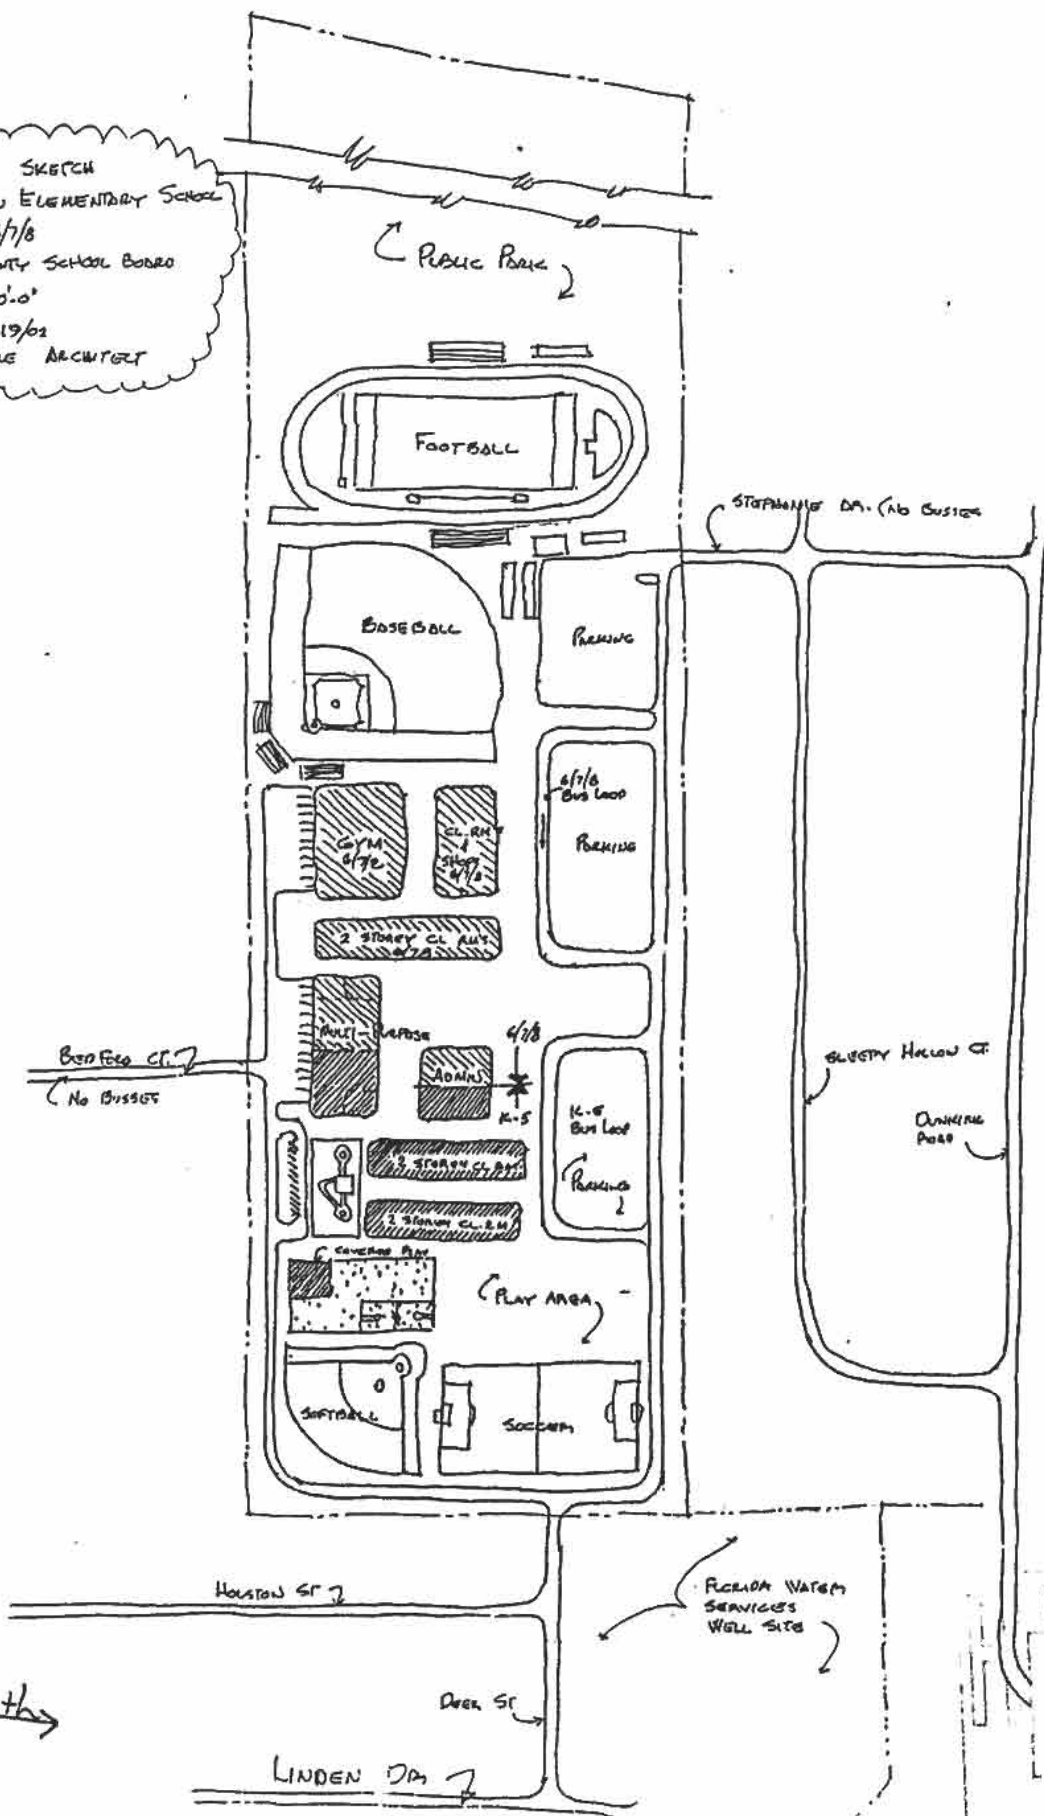

TO: KAREN GAFFNEY
FROM: GRAYDON HOWE *g Howe*
DATE: DECEMBER 23, 2002
SUBJECT: TRAFFIC CONSIDERATIONS
DEER STREET SITE

FAC: 03-101

- Bus access to the school site will be directly off Linden Drive via Deer Street. No bus or service vehicle access from either of the other two (2) accesses.
- Linden Drive and Deer Street intersection will be upgraded with turning lanes as requested by the county.
- There will be no stop sign when entering the site from Deer Street, thus eliminating any possible back up.
- The school district will endeavor to negotiate with Florida Water Service to construct an access road through their well site to bring the buses and service vehicles directly off Linden Drive without entering any neighborhood streets.
- The vehicle and pedestrian accesses from Bedford Road and Stephanie Drive will be for parents and teachers in cars only – no buses or trucks.
- The county park will be at the west end of the site accessed from Hoover Street and Honeydew Drive.
