* Local Florida redistricting data (Public Law [PL] 94-171) for the April 1, 2010 Census was released on March 17, 2011
 The old 'Local Estimates' method was based upon Final Building Inspections & Census 2000 Population/Dwelling-Unit Ratios.
 Due to unsold homes, perhaps the more accurate monthly population figures are in the 2010-Census-derived column.

Annual Growth Rate: $(173,249-173,025)/173,025 = 0.12946\%$
