If You Can Stay Home, Shelter-In-Place

Every hurricane or tropical storm will not necessarily require evacuation. However, if you live in a designated evacuation zone, it is imperative that you shelter in place during the storm. If you want to shelter in place, these are the steps to follow:

1. Build or reinforce your safe room.
2. Turn off and secure all systems. Remove items from counters, shelves, and dressers. Replace anything that is heavy or flammable on lower shelves. Keep items that might fall (such as batteries, food, and medical supplies) close to your shelter.
3. If you are in a high-rise apartment, shelter in the center of the building. Avoid elevators, and stay away from any windows or balconies.
4. Secure your boat early. Drawbridges and other waterways may be closed. If you own a business, follow your pre-selected circuit. They MUST be secured and protected.
5. Be prepared to live off the grid for 3 days.
6. Turn on a water purification kit (tablets, chlorine (plain) and iodine) and clean your water politically.
7. Be sure that all electrical circuits are off and that your home is secure.
8. Provide a Paper Trail. Bring copies of all insurance policies and keep them close to your shelter.
9. Provide a list of emergency contact information. Determine your emergency contact plan.
10. Provide a list of any necessary medication(s) and any special medical equipment to your shelter.

If You Must Evacuate

If you evacuate, here are the steps to follow:

1. Consider leaving the area if you live in an evacuation zone or if a mandatory evacuation is ordered.
2. Check for evacuation orders and information.
3. Watch for flood waters.
4. Turn off and secure all systems.
5. Provide a List of Disaster Supplies if you go to friends, relatives or貝rible. For more information call your local disaster recovery agencies. Please ask for help if you need it and volunteer to help others.
6. Provide a Paper Trail. Keep important documents in a fireproof safe or box and a copy in a safe place.
7. Provide a list of emergency contact information. Determine your emergency contact plan.
8. Provide a list of any necessary medication(s) and any special medical equipment to your shelter.
10. Secure your boat early. Drawbridges and other waterways may be closed. If you own a business, follow your pre-selected circuit. They MUST be secured and protected.
11. Be prepared to live off the grid for 3 days.
12. Turn on a water purification kit (tablets, chlorine (plain) and iodine) and clean your water politically.
13. Be sure that all electrical circuits are off and that your home is secure.
14. Provide a Paper Trail. Bring copies of all insurance policies and keep them close to your shelter.
15. Provide a list of emergency contact information. Determine your emergency contact plan.
16. Provide a list of any necessary medication(s) and any special medical equipment to your shelter.

Protecting Your Property from Flood

There are some specific duties you should do before a hurricane or tropical storm hits.

1.brine your home and your business.
2. Contact your local building department for information on required building codes. Ask about your flood insurance policy.
3. Start your emergency kit.
4. Prepare your personal and business property. Pre-identify your property and make a list of all your personal and business property.
5. Provide a list of emergency contact information. Determine your emergency contact plan.
6. Provide a list of any necessary medication(s) and any special medical equipment to your shelter.
7. Pack all personal belongings.
8. Secure your boat early. Drawbridges and other waterways may be closed. If you own a business, follow your pre-selected circuit. They MUST be secured and protected.
9. Be prepared to live off the grid for 3 days.
10. Turn on a water purification kit (tablets, chlorine (plain) and iodine) and clean your water politically.
11. Be sure that all electrical circuits are off and that your home is secure.
12. Provide a Paper Trail. Bring copies of all insurance policies and keep them close to your shelter.
13. Provide a list of emergency contact information. Determine your emergency contact plan.
14. Provide a list of any necessary medication(s) and any special medical equipment to your shelter.

A Word About Insurance

What to Expect After a Disaster

After a disaster, you may be without power and many of the other conveniences you take for granted. Rotten food, mold and water damage may result. If you are prepared to be self-sufficient, you may be less affected by the disaster.

1. Building or Remodeling?
2. Disasters Planning Guide

7. Protect Your Home and Business
8. Protect Your Pets Safe
9. Keep a Paper Trail
10. What to Expect After a Disaster
**Disaster Safety Tips**

1. **If You Can Stay Home**, remain indoors. If you live near a body of water or in vulnerable areas or mobile homes, consider leaving your home. If you require hospitalization, you must make prior arrangements through your physician. If you are homebound, but not under the care of a home health agency, contact your physician to determine your best plan.

2. **Post-Storm Safety Precautions**
   - **Check your Disaster Supplies.** Get any needed replacement items for your disaster supplies kit before a storm so you’ll have extra on hand.

3. **Project Your Home and Business**
   - **Pre-Storm Preparation:**
     - **Anchors and Bracing:** Use hurricane-resistant hardware and materials. Reinforce your roof with metal straps. Consider bracing your building with plywood or hurricane shutters.
     - **Dry Flood Proofing:** Exercise caution when crossing flood waters, even if you can see the bottom;

4. **Help Your Neighbor**
   - **Evacuation Plan:** Evacuation plans are necessary to be able to rebuild your home and replace your personal belongings. Ask your landlord or building manager what’s required. If you live in a mobile home or RV, you must plan ahead. Check out your local code requirements. You should plan an evacuation zone.

5. **Your Disaster Plan**
   - **If your business is ready:** Being more than fully insured, and ensuring a safeguarded emergency plan, is your responsibility. Your business plan should include:
     - **Insurance Policy:** Manage your insurance policy as your personal plan to protect your business.

6. **General Safety Tips**
   - **Dry Flood Proofing:** Exercise caution when crossing flood waters, even if you can see the bottom; flood waters may be contaminated with sewage and other hazardous materials.

7. **Maintenance and Safety**
   - **Storm Warning:** Monitor the status of your local area with hurricane warnings and watches. Keep your emergency kit ready.

8. **A Word About Insurance**
   - **Prepare your insurance policy:** Review your insurance policy and make sure it covers all the necessary issues.

9. **Pet Disaster Supplies**
   - **Ample food supply:** At least three days of food for your pet. Keep a two-week supply of water for your pet.

10. **What To Expect After A Disaster**
    - **Water Damage:** Water damage can lead to mold and other health hazards. Use caution when handling water damage.

**DISASTER OFFICIAL GUIDE FOR THE TAMPA BAY AREA**

**HERNANDO COUNTY**

**Evacuation Map**

This guide is produced by the Tampa Bay Regional Planning Council in partnership with your County Emergency Management Agency. It is meant to help you understand the risks you may face and make plans to be better prepared. If you have any questions or need further information, please contact your local emergency management agency. They can help you make your family and home safer. To make your home and business safer, to make your family and neighborhood safer. To make your family and neighborhood safer, to make your family and neighborhood safer. To make your family and neighborhood safer.

**Remember:** If you encounter a storm, please don’t be afraid to ask for help. If you’re experiencing a power outage, please contact your local utility company. If you’re experiencing a water emergency, please contact your local water authority. If you’re experiencing a medical emergency, please contact your local hospital. If you’re experiencing a disaster, please contact your local emergency management agency. They can help you make your family and neighborhood safer.
Planning for emergencies

If a disaster struck, would your family be ready? Would your business be ready? Being prepared may help you avoid panic and prevent suffering later. Follow the tips and strategies suggested by experts to protect your loved ones, family, and business. This guide is designed to help your family prepare for a disaster, and to help you rebuild.

This guide is designed to help your family prepare for a disaster, and to help you rebuild. It's important to prepare for the unexpected so that you can be ready to respond to any crisis. This guide will provide you with information on how to create a disaster plan and what to do in an emergency.

1. Your Disaster Plan
   - Identify potential hazards and evacuation routes.
   - Establish a family meeting place.
   - Have a family disaster plan.
   - Keep a disaster supply kit.
   - Know your flood risk.

If You Can Stay Home, Shelter-In-Place
Every hurricane is not meant to destroy your home; if you have proper planning, you can remain safe. Stay indoors, close the doors and windows. Take the following actions:

- Turn off power, gas, and water.
- Lock all doors and windows.
- Secure any loose items that may cause injury or damage.
- Keep a flashlight and emergency supplies nearby.
- Monitor weather updates and follow storm surge instructions.
- Prepare for potential power outages.

If You Must Evacuate
- Make sure you are aware of the evacuation order for your area.
- Pack emergency supplies, including medications, food, water, and a change of clothes.
- Follow the evacuation route and plan for more than one destination.
- Be prepared for potential road closures.
- Use local information sources for updates and instructions.

Leaving Coastal Areas
For either shelter-in-place or evacuation, be prepared for hurricane winds and storm surge. Stay tuned to your local radio and television station for the latest advisories and other actions you will need to take as you make your Disaster Plan.

5. If you will need assistance in an evacuation or need to go to a special needs shelter, please register with your County
6. Keep Your Pets Safe
- Secure your pet in a carrier or kennel.
- Take your pet’s medications and any medical supplies.
- Keep a leash or harness readily available.
- Provide your pet with water and food.
- Keep a current rabies tag/id and pets collar.

7. Protect Your Home and Business
- Check your insurance coverage for flood, wind, and earthquake damage.
- Secure your home with boarding or hurricane shutters.
- Protect your business with storm damage repair, tree trimming, and debris removal.
- Consider using a backup generator.

8. A Word About Insurance
- Make sure your insurance policy is up to date.
- Keep all receipts and records for repairs and replacements.
- Consider a home buyer’s insurance policy to cover the cost of repairs.
- Review your insurance policy with your insurance agent.

9. Keep a Paper Trail
- Keep copies of all insurance policies.
- Keep copies of all financial statements.
- Keep copies of all receipts and records.
- Keep copies of all agreements and contracts.
- Keep copies of all legal documents.

10. What to Expect After a Disaster
- Expect to lose power and water.
- Expect to lose communications.
- Expect to lose food and water supplies.
- Expect to lose personal belongings.
- Expect to lose business.
- Expect to lose family.
- Expect to lose your home.
- Expect to lose your life.

Preparedness Planning Guide
Hernando County
www.tampabayprepares.org

Emergency Management
Tampa Bay Prepares
4. Purchase flood insurance.
5. Mobile homes are not safe during tornadoes. Abandon mobile homes and go to the nearest sturdy building.
6. If you own a business, follow your Business Continuity Plan, go online to disastersafety.org.
7. Ice, drinking water/containers - 1 gallon of water per person.
If You Must Evacuate

If you need to evacuate, here's how to prepare:

1. Create a Family Communication Plan, having a pre-determined exit plan for your home and a designated place to meet after you leave.
2. Plan what you will take with you, including important documents and insurance information.
3. Get your emergency supplies ready. Do not forget to fill your pets' water bowls.
4. Make sure your pets are microchipped and carry their identification cards with you.
5. Consider leaving your pets with friends or family members who are not planning to evacuate.
6. If you need to evacuate your pets, contact the local animal shelter to make arrangements.

Preparedness Tips

1. Keep your contact list handy, including emergency contacts and medical information.
2. Stay informed by checking local news and weather updates.
3. Be prepared for the unexpected, such as utility outages or road closures.
4. Keep your emergency supplies up to date and accessible.
5. Follow the instructions of local authorities and emergency responders.
6. Be patient and avoid panic.
7. Stay healthy and take care of yourself.
8. Help your neighbors and community during the recovery process.
9. Remember that recovery can be a long process, so be patient and be kind to yourself.

In conclusion, being prepared for an emergency is crucial to ensure your safety and the safety of your loved ones. By following these tips, you can be better equipped to handle any emergency that may arise.

If You Can Stay Home, Shelter In Place

If you choose to stay home during an emergency, here's what you can do:

1. Stay inside and close all doors and windows.
2. Turn off all electrical appliances and air conditioning, and keep the heat on.
3. Lock your home to prevent intruders.
4. Use flashlights and a battery-operated radio for information.
5. Be prepared for food and water shortages.
6. Keep a supply of non-perishable food and water.
7. Stock up on medications and medical supplies.
8. Stay informed by checking local news and weather updates.
9. Be prepared for the unexpected, such as utility outages or road closures.
10. Follow the instructions of local authorities and emergency responders.
11. Be patient and avoid panic.
12. Stay healthy and take care of yourself.
13. Help your neighbors and community during the recovery process.
14. Remember that recovery can be a long process, so be patient and be kind to yourself.

In conclusion, if you choose to stay home during an emergency, it is important to be prepared and informed. By following these tips, you can be better equipped to handle any emergency that may arise.

If you have any questions or need assistance, please contact your local emergency management agency.
**Post-Storm Safety Precautions**

- **Residents** - Have valid ID with your current address.

**4. Secure your boat early.** Drawbridges may be raised.

**5. Don’t pull the permits for the contractor.** Only pay the final balance until the work is complete.

**1. If flooding threatens, get to higher ground.** Stay away from rivers and lakes.

**8. Inventories, photographs, etc.)**

Re-entry

Stay tuned to your local media for up-to-date information. Avoid driving. If you drive, treat any flooded roads with caution. You will get some warning with a tropical storm or hurricane.

Don’t pull the permits for the contractor. Obtain a written estimate or contract. Photographs of all damage before repairs will help to avoid misunderstandings. If a contractor asks you to pay with cash, you want to use a credit card or personal checks. You will have proof of purchase. Renters can use tenant’s insurance to cover your items. Homeowners can use their own policy. Your insurance company will provide the necessary forms. Your contractor must be properly licensed.

If You Must Evacuate

1. Turn around; don’t drown. Avoid flooded areas or stay home and take shelter designated by public officials.
2. Protect yourself and your pets. If you plan to go to a hotel or motel, you will need to check that it is not located in a flood plain. You can also have a plan for pets not allowed in the hotel. Be prepared for a possible hotel stay.
3. Protect your home. Turn off your electricity, water and gas if officials tell you to. Use plywood or storm shutters. Brace windows, skylights and glass doors.
4. Protect your business. Make sure your windows, doors and garage doors are braced. Protect your utilities and electrical equipment. If you have a generator, use it for emergency power. You can also use it for a fire pump. It is not safe to use it indoors.
5. Keep your pets safe. Prepare a pet care kit. Include food, water, medications, a leash, carrier or cage, and a photo of you and your pet.

If You Can Stay Home, Shelter In Place

1. Prepare Now (Make a plan).
2. Go to your disaster plan. Use your disaster plan to communicate with your neighbors. Use your disaster plan to avoid confusion.
3. Take your pets! Until power is restored, many people leave their homes. You can use your disaster plan to avoid this. You will get some warning with a hurricane.
4. Take care of your family. Use your disaster plan to help your family. Use your disaster plan to help your children. Use your disaster plan to help your elderly family members. Use your disaster plan to help your disabled family members.
5. Take care of your home. Use your disaster plan to protect your home. Use your disaster plan to keep your water supply clean. Use your disaster plan to keep your food supply clean.

A Word About Insurance

6 Steps to Proper Insurance Protection

1. Know what your policy includes. Review your insurance policy. Ask your insurance agent about the coverage you need. Ask your insurance agent about the deductibles you need.
2. Know what your policy does not cover. Review your insurance policy. Ask your insurance agent about the coverage you need.
3. Choose your deductible carefully. Choose your deductible wisely. Ask your insurance agent about the deductibles you need.
4. Take care of your home. Use your disaster plan to protect your home. Use your disaster plan to keep your water supply clean. Use your disaster plan to keep your food supply clean.

Help Your Neighbor

1. Check on your neighbors. See if they need help. See if they need medical attention. See if they need help getting food.
Preparing for a Hurricane

3 Your Disaster Plan

After a disaster, you may be without power and many of the comforts you rely on. Know your neighbors and be sure they know you. As you prepare, your community may be asked to evacuate. It is important to be prepared to be self-sufficient.

Disaster Declaration
- 
  - Visit the Florida Division of Emergency Management website (https://www.floridaem.gov) for county evacuation zones.
  - Your local government will provide information about your specific area.

4 Evacuate or Stay?

If You Can Stay Home, Shelter-In-Place

Every house is a potential shelter, and you can make it safer and more comfortable by following these steps:

- 
  - Secure your home: Block gaps under doors and windows with caulk, weather-stripping, or blankets; turn off gas and water; remove anything that might break or fly away and could cause injury or damage.
  - Prepare your home: Install风暴微型断路器 in electrical panels; keep a flashlight and batteries; have a sturdy chair or table and an area where you can get away from windows.

If You Must Evacuate

- 
  - Plan ahead: Know your evacuation zone and plan a route to the nearest shelter. Be prepared to leave quickly and safely.
  - Pack your emergency kit: Include water, food, medications, clothing, first aid kit, and important documents.

5 Keep Your Pets Safe

- 
  - If you evacuate your home, be sure to take your pets with you. Provide them with a carrier, leash, water, and food.
  - If you stay home, make sure your pets are safely secured in your home with a windowless reinforced room such as a closet or basement.

6 Keep Your Pets Safe

- 
  - Keep your pets healthy: Feed them regularly, provide fresh water, and clean their living areas. Consider taking them to the vet for a check-up.
  - Keep your pets safe: Keep your pets leashed and away from windows. Never leave them unattended in the house.

7 Protect Your Home and Business

- 
  - Secure your home: Block gaps under doors and windows with caulk, weather-stripping, or blankets; turn off gas and water; remove anything that might break or fly away and could cause injury or damage.
  - Protect your business: Use storm shutters or plywood to secure windows; ensure your business is properly insured.

8 A Word About Insurance

- 
  - Review your insurance policy: Understand what is covered and what is not.
  - Contact your insurance company: Let them know you are evacuating and ask about the best course of action. 

9 Keep a Paper Trail

- 
  - Keep copies of important documents: Health insurance cards, driver’s license, Social Security card, birth certificate, wedding certificate, and insurance policies.
  - Keep a list of important contacts: Doctor, insurance company,creditors, and employers.

10 What to Expect After a Disaster

- 
  - Expect damage: Homes and businesses will be damaged after a hurricane.
  - Expect power outages: It may take weeks or months to restore power.
