

# 2045

## **Hernando/Citrus MPO** LONG RANGE TRANSPORTATION PLAN

Adopted March 4, 2020; Amended June 17, 2021

## Hernando/Citrus MPO 2045 Long Range Transportation Plan Adoption

The Hernando/Citrus Metropolitan Planning Organization (MPO) presented this Long Range Transportation Plan Adoption Report at the regularly scheduled MPO Board meeting on October 30, 2019. At this meeting they initiated a public comment period to obtain comments on the *Hernando/Citrus MPO 2045 Long Range Transportation Plan* prior to the Board's adoption of the Plan. Pursuant to the MPO's adopted Public Participation Process (PPP), a public hearing and public comment period continued until the November 20, 2019 MPO Board meeting. Following that meeting, the Plan was adopted at the regularly scheduled December 4, 2019 MPO Board meeting.

## Resolution 2019-8

### **A RESOLUTION OF THE HERNANDO/CITRUS METROPOLITAN PLANNING ORGANIZATION (MPO) ADOPTING THE 2045 COST FEASIBLE LONG RANGE TRANSPORTATION PLAN AND CERTIFYING IT AS THE OFFICIAL LONG RANGE TRANSPORTATION PLAN FOR CITRUS AND HERNANDO COUNTIES, FLORIDA.**

**WHEREAS**, The Hernando/Citrus Metropolitan Planning Organization (MPO) is the responsible entity for conducting a continuing, cooperative and comprehensive transportation planning program for Citrus and Hernando Counties, Florida, including the Spring Hill Urbanized Area in Hernando County and the Homosassa Springs – Beverly Hills-Citrus Springs Urbanized Area in Citrus County; and,

**WHEREAS**, the Hernando/Citrus MPO must develop a Long Range Transportation Plan (LRTP) which addresses no less than a 20 year planning horizon; and WHEREAS, the LRTP is required by Federal and State Laws and regulations to encourage and promote the safe and efficient management, operation, and development of a cost-feasible intermodal transportation; and,

**WHEREAS**, under Federal and State regulations, the Hernando/Citrus MPO has, as one of its primary duties, the responsibility of developing and adopting an updated 2045 Long Range Transportation Plan conforming to the requirements of the Fixing America's Surface Transportation (FAST) Act and previous Moving Ahead for Progress in the 21st Century Act (MAP-21) rule making by establishing measurable performance targets; and,

**WHEREAS**, in compliance with Federal and State regulations, the Hernando/Citrus MPO established a set of goals, objectives and performance measures to provide a basis for performance driven planning; and,

**WHEREAS**, the Hernando/Citrus MPO has conducted a public involvement program throughout the 2045 LRTP development process that is consistent with the Hernando/Citrus MPO Public Participation Plan, including advertised public workshops, hearings and meetings with concerned community groups and distribution of materials throughout the communities; and,

**WHEREAS**, the Hernando/Citrus MPO has considered the principles of Environmental Justice by conducting environmental justice workshops that targeted the community's underserved populations to avoid any disproportionate impact; and

**WHEREAS**, the Hernando/Citrus MPO has coordinated the 2045 LRTP development with involved state, regional, and local agencies, including consideration of locally adopted comprehensive plans and the Florida Transportation Plan; and,

**WHEREAS**, the 2045 LRTP has considered multi-modal and intermodal opportunities to serve the goods movement needs of the population in Hernando and Citrus Counties; and,

**WHEREAS**, the 2045 LRTP identifies short range strategies for alleviating congestion, improving safety and promoting increased system efficiency through systems management techniques and coordination with land use planning and development activity; and,

**WHEREAS**, the 2045 LRTP identifies project costs and reasonably available revenues to fund projects demonstrate the cost feasibility the 2045 LRTP's Cost Affordable Plan; and,

**WHEREAS**, the Hernando/Citrus MPO has held two public hearings, providing a minimum of 30 day comment period consistent with the Hernando/Citrus MPO Public Participation Plan prior to taking final action on the 2045 LRTP.

**NOW, THEREFORE, BE IT RESOLVED BY THE HERNANDO/CITRUS MPO:**

1. Certifies that the 2045 Long Range Transportation Plan, as well as associated policies, is the adopted Transportation Plan for Citrus and Hernando Counties including the Spring Hill Urbanized Area in Hernando County, and the Homosassa Springs-Beverly Hills-Citrus Springs Urbanized Area in Citrus County.
2. The 2045 Long Range Transportation Plan, including all maps, inventories and other related materials shall be a basis for future plans, programs, and policies of the Hernando/Citrus MPO.

**ADOPTED in regular session this 4th day of December 2019**

## INTRODUCTION

# Chapter 1

## Introduction

### What is the Hernando/Citrus MPO?

The Hernando/Citrus Metropolitan Planning Organization (MPO) guides transportation planning and decision-making processes in Hernando County and Citrus County. As a liaison between the local community and the Florida Department of Transportation (FDOT), the MPO provides comprehensive and cooperative plans for the near-term and long-term futures of the area. Per federal mandate, metropolitan areas with populations that exceed 50,000 must establish an MPO to guide transportation development. The current MPO planning area, which includes all of Hernando and Citrus counties was established in December 2013.

## What is the LRTP?

The Long Range Transportation Plan (LRTP) is a short- and long-term plan addressing multimodal transportation needs within the MPO planning area, required to be updated every five years, with a horizon year of at least 20 years. The 2045 LRTP was prepared by the Hernando/Citrus MPO and serves as primary guidance in the development of transportation improvements in both Hernando and Citrus counties over the next 25 years.

The plan must be reviewed and updated every five years and incorporate fiscal constraints, meaning the MPO cannot plan to spend more money than it can reasonably anticipate receiving for project implementation through the year 2045. Notably, the eligibility of these transportation projects to receive federal funding is dependent on their inclusion in the Cost Feasible Plan.

The plan was created to be consistent with adopted Comprehensive Plans for each county in addition to the incorporated cities and meets federally-established standards for metropolitan transportation planning.

The LRTP incorporates transportation needs of people and freight alike and plans for roadway, public transit, and bicycle and pedestrian facilities. The conclusions of the plan are largely dependent on input from the community, and includes involvement from stakeholders and the at-large public throughout its development.

This plan:

- Is consistent with applicable state and federal requirements,
- Is consistent and coordinated locally, and within the region and state,
- Integrates detailed and general community and stakeholder input,
- Aligns community vision with project priorities,
- Identifies a multimodal, fiscally-constrained Cost Feasible Plan to enhance the area's transportation network over the next 25 years, and
- Provides benefits to the entire population without disproportionate adverse impacts.

## Federal Legislation and Guidance

The previously adopted Hernando/Citrus MPO 2040 LRTP was governed by the Moving Ahead for Progress in the 21st Century Act (MAP-21), which was signed into Federal law in 2012. The goals of MAP-21 include strengthening America's highways, establishing a performance-based program, creating jobs and supporting economic growth, supporting the United States Department of Transportation's aggressive safety agenda, streamlining Federal Highway Administration (FHWA) transportation programs, and accelerating project delivery and promoting innovation.

This document, the 2045 LRTP, is guided by the 2015 legislation, Fixing Americas' Surface Transportation Act (FAST Act). Through FAST Act, new federal requirements were incorporated in the process as follows:

- Two new Federal Planning Factors were established:
  - Improve resiliency and reliability of the transportation system and reduce or mitigate storm water impacts of surface transportation.
  - Enhance travel and tourism.
- Multimodality of the transportation system was emphasized - The FAST Act adds to the MAP-21-required considerations additional facilities such as intercity buses and commuter van pools that support intermodal transportation, [23 USC 134(c) (2) & (i)(2)].
- Participation by Interested Parties in the Planning Process - It is a requirement that stakeholders and the public are involved, and they must be given reasonable opportunity to provide their input. Under the FAST Act, public ports and additional private transportation service providers were added to the list of interested parties.
- Consultation with other Planning Officials - MAP-21 required the coordination of MPOs with other officials that are responsible for various planning activities throughout the region. FAST Act requires that officials responsible for tourism activities, as well as those responsible for reducing potential risks of natural disasters be added to the coordinating agencies responsible for various planning agencies through the region.

## The Plan at a Glance

The LRTP was developed by analyzing the existing conditions throughout the two-county area and with consideration of the 2040 LRTP guidance. Having established a baseline of needs, revisions and additions were made to better accommodate and reflect the future conditions and needs of the community.

The 2045 LRTP is organized as follows:

Chapter	Title	Content

# Chapter 2

## GOALS, OBJECTIVES, & PERFORMANCE TARGETS

## Chapter 2

# Goals, Objectives, & Performance Targets

### Introduction

---

This chapter describes the policies guiding the transportation network and systems of Hernando and Citrus Counties. In compliance with federal and state regulations, the Hernando/Citrus MPO established a set of goals, objectives, and performance measures to provide a basis for performance-based planning that will best serve the community and environment, currently and for the future. The Hernando/Citrus MPO established these goals, objectives, and performance measures consistent with the guidance and requirements of the FAST-Act, current federal transportation planning requirements, and the Florida Transportation Plan.

This Chapter is divided into the following sections:

- Hernando/Citrus MPO 2045 LRTP Goals and Objectives
- Federal Goals and Planning Factors
- State and Local Goals
- Federal, State, and Hernando/Citrus MPO Performance Targets

# Hernando/Citrus MPO Transportation Goals, Objectives, and Performance Measures

Goals and objectives reflecting the counties' vision were developed early in the planning process. The goals are shown below and in **Figure 1**.

## Safety

Improving safety for all users, including drivers, pedestrians, and bicyclists was a priority of the plan.

## Economy

The plan includes projects that proactively support economic development and tourism throughout Hernando and Citrus Counties.

## Mobility

The plan establishes a blueprint to provide for mobility needs of the entire community and visitors alike.

## Intermodal

Maintaining the existing transportation system, including roadway, transit, and active transportation modes (biking, walking, etc.) is a priority, seeking to enhance the existing network rather than add or replace facilities.

## Livability

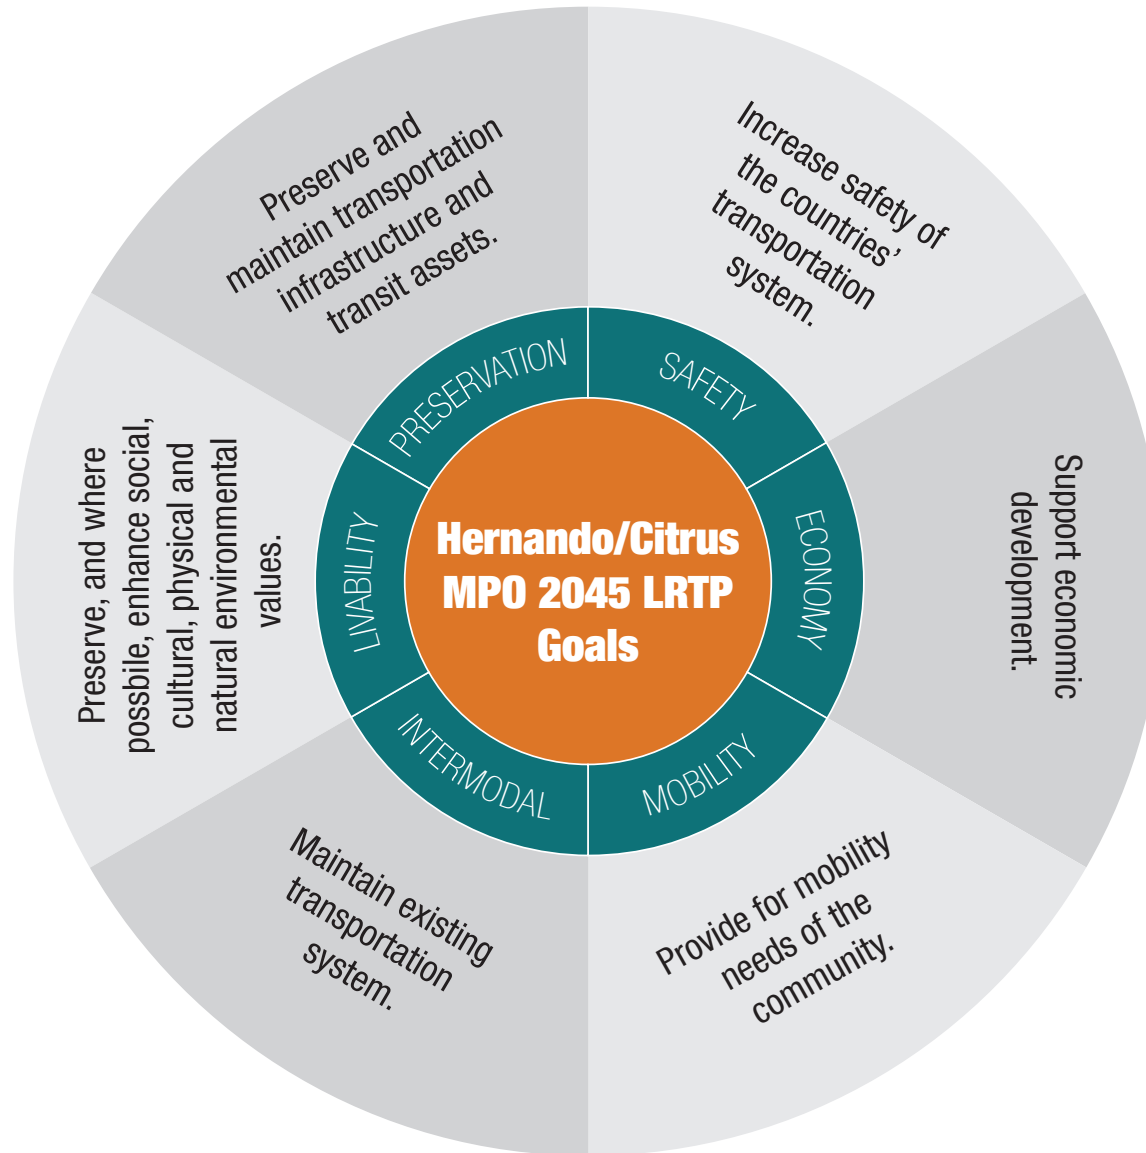

The environments throughout the MPO area are sensitive, and steps were taken to preserve, enhance social, cultural, physical, and natural environmental values.

## Preservation

There is a responsibility to preserve and maintain a resilient transportation infrastructure and transit assets for the future in a cost-effective manner.

**Figure 1. Hernando/Citrus MPO 2045 LRTP Goals**

## Development of the Goals, Objectives, and Performance Measures

The Hernando/Citrus MPO Goals, Objectives, and Performance Measures were developed based on Federal, state, and local guidance. The requirements and guidance used to develop the Goals, Objectives, and Performance for the 2045 Long Range Transportation Plan are described ahead.

### Fixing America's Surface Transportation (FAST) Act

Signed into law on December 4, 2015, the Fixing America's Surface Transportation (FAST) Act (Public Law No. 114-94), provides support and enhancement to the Moving Ahead for Progress in the 21st Century Act (MAP-21). The FAST Act is the first federal law to provide long-term funding to infrastructure planning and investment for surface transportation since the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) became law in 2005.

The FAST Act supports MAP-21 by continuing to create a streamlined, performance-based surface transportation program that builds on many of the multimodal transportation policies first established under the Intermodal Surface Transportation Efficiency Act (ISTEA) of 1991. Establishing a performance- and outcome-based program requires investment of financial resources in projects that will collectively make progress toward achieving national multimodal transportation goals. The 2045 LRTP has been developed to ensure compliance with the requirements of the FAST Act and includes a performance-based approach to the transportation decision-making process.

### FAST ACT GOALS

The FAST Act has carried over the national goals established with MAP-21 legislation. These goals are as follows:

- **Safety** - To achieve a significant reduction in traffic fatalities and serious injuries on all public roads.
- **Infrastructure Condition** - To maintain the highway infrastructure asset system in a state of good repair.
- **Congestion Reduction** - To achieve a significant reduction in congestion on the National Highway System.
- **System Reliability** - To improve the efficiency of the surface transportation system.
- **Freight Movement and Economic Vitality** - To improve the national freight network, strengthen the ability of rural communities to access national and international trade markets, and support regional economic development.
- **Environmental Sustainability** - To enhance the performance of the transportation system while protecting and enhancing the natural environment.
- **Reduced Project Delivery Delays** - To reduce project costs, promote jobs and the economy, and expedite the movement of people and goods by accelerating project completion through eliminating delays in the project development and delivery process, including reducing regulatory burdens and improving agencies' work practices.

#### FAST ACT PLANNING FACTORS

The FAST Act has established specific planning factors that call for the recognition of and address the relationship between transportation, land use, and economic development. The federal planning factors form the cornerstone for the 2045 LRTP and include:

1. Support the **economic vitality** of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency.
2. Increase the **safety** of the transportation system for motorized and non-motorized users.
3. Increase the **security** of the transportation system for motorized and non-motorized users.
4. Increase **accessibility and mobility** of people and freight.
5. Protect and enhance the **environment**, promote energy conservation, improve quality of life, and promote consistency between transportation improvements and state and local growth and economic development patterns.
6. Enhance the **integration and connectivity** of the transportation system, across and between modes, for people and freight.
7. Promote **efficient system management** and operation.
8. Emphasize the **preservation** of the existing transportation system.
9. Improve the **resiliency and reliability** of the transportation system and reduce or mitigate stormwater impacts of surface transportation.
10. Enhance **travel and tourism**.

The FAST Act prescribes policy requirements and programmatic framework related to performance measures and targets for the national transportation system in the metropolitan planning process. The FAST Act directly impacts the Hernando/Citrus MPO and the planning activities of the agency. As such, the MPO is required to coordinate with state and public transportation providers to establish targets to continue to develop and assess a focused, performance-based multimodal transportation system. In the development and assessment, Hernando/Citrus MPO must:

- Describe the performance measures and targets used in assessing system performance and progress in achieving the performance targets within the Long Range Transportation Plan (LRTP); and,
- Develop the Transportation Improvement Plan (TIP) to make progress toward established performance targets and include a description of the anticipated achievements.

A matrix showing consistency between the LRTP Goals and the ten planning factors from the FAST Act is shown in **Table 1**.

**Table 1. Hernando/Citrus 2045 LRTP Goals and FAST Act Planning Factors Comparison**

LRTP Goals	FAST Act Planning Factors									
	Economic Vitality	Safety	Security	Movement of People & Freight	Environment and Quality of Life	Integration / Connectivity	System Management & Operation	System Preservation	Resiliency	Tourism
<b>Safety</b> Increase safety of the counties' transportation system	✓	✓	✓	✓	✓		✓		✓	✓
<b>Economy</b> Support economic development and tourism	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓
<b>Mobility</b> Provide for mobility needs of the community	✓	✓	✓	✓	✓	✓	✓			
<b>Intermodal</b> Maintain existing transportation system	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓
<b>Livability</b> Preserve/enhance social, cultural, physical and natural environmental values	✓	✓	✓	✓	✓	✓	✓		✓	✓
<b>System Preservation</b> Preserve and maintain a resilient transportation infrastructure and transit assets	✓	✓	✓	✓	✓	✓	✓	✓	✓	

#### Florida Transportation Plan (FTP)

The Florida Transportation Plan (FTP) is the single overarching statewide plan guiding Florida's transportation future. The plan was created by, and provides direction to, FDOT and all organizations involved in planning and managing Florida's transportation system, including statewide, regional, and local partners. This includes the Hernando/Citrus MPO. The FTP Policy Element is Florida's long-range transportation plan as required by both state and federal law and this element points toward a future transportation system that embraces all modes of travel, innovation, and change. **Technical Appendix A** contains the FTP used as guidance for this LRTP.

MPOs are required to address the goals included in the FTP. These goals include the following:

- **Safety and security** for residents, visitors, and businesses
- Agile, **resilient**, and quality infrastructure
- **Efficient and reliable** mobility for people and freight
- More **transportation choices** for people and freight
- Transportation solutions that support Florida's global **economic competitiveness**
- Transportation solutions that support **quality places** to live, learn, work, and play
- Transportation solutions that enhance Florida's **environment and conserve energy**

MPOs must also incorporate any performance targets which may be included in the Statewide Freight Plan and Asset Management Plan. Current guidance from FDOT indicates that no additional performance targets will be included in these plans.

A matrix showing consistency between the LRTP Goals and the Florida Transportation Plan Goals is shown in **Table 2**.

**Table 2. Hernando/Citrus 2045 LRTP Goals and Florida Transportation Plan Goals Comparison**

LRTP Goals	Florida Transportation Plan Goals						
	Safety and Security	Resilience	Efficiency	Transportation Choices	Economic Competitiveness	Quality Places	Environment
<b>Safety</b> Increase safety of the counties' transportation system	✓	✓	✓	✓	✓	✓	
<b>Economy</b> Support economic development and tourism	✓	✓	✓	✓	✓	✓	✓
<b>Mobility</b> Provide for mobility needs of the community	✓		✓	✓	✓	✓	
<b>Intermodal</b> Maintain existing transportation system	✓	✓	✓	✓		✓	✓
<b>Livability</b> Preserve/enhance social, cultural, physical and natural environmental values	✓		✓	✓	✓	✓	✓
<b>System Preservation</b> Preserve and maintain a resilient transportation infrastructure and transit assets	✓	✓	✓	✓	✓	✓	✓

#### Local Plans

Local agencies establish goals and objectives as part of the long-range transportation planning process, representing the desired vision of how the statewide transportation system should evolve over the next 20 years with actionable guidelines on how to achieve them within each community. Performance measures and targets are established to provide measurable guidelines focusing the plans on outcomes rather than just on activities and policies. This LRTP report is consistent with the following documents where applicable:

- The Florida Transportation Plan
- FDOT Strategic Highway Safety Plan
- Comprehensive Plans for Hernando and Citrus counties and municipalities
- Hernando Citrus MPO Public Participation Plan (PPP)
- Hernando Citrus MPO Transportation Improvement Program (TIP)
- Hernando Citrus MPO Congestion Management Process (CMP)

#### PERFORMANCE-BASED PLANNING

The FAST Act established performance-based activities requirement for the MPO planning process. This included the identification of specific performance measures that all states and each MPO must evaluate. The process required the FDOT develop appropriate performance targets for these measures and to monitor the progress made toward achieving the targets. This also requires MPOs in the State of Florida to either accept and support FDOT's performance targets or establish, formally adopt, and monitor their own performance targets. FDOT will provide performance data to MPOs if they adopt the state targets. MPOs who adopt other targets will be responsible for the associated performance evaluation for those targets.

#### Federal Guidance

Federal Performance Management Measures were developed to support the FAST Act Goals. The initial performance requirements enacted under MAP-21 are enhanced by the FAST Act, which established compliance requirements for State Departments of Transportation (DOTs) and MPOs.

The Federal Performance Management Measures specifically require the following:

- **Performance Measure 1 (PM1) – Safety**
  - Number of fatalities
  - Rate of fatalities per 100 million vehicle miles traveled (VMT)
  - Number of serious injuries
  - Rate of serious injuries per 100 million vehicle miles traveled (VMT)
  - Number of non-motorized fatalities and non-motorized serious injuries
- **Performance Measure 2 (PM2) – Pavement & Bridge**
  - Percent of Interstate pavements in good condition
  - Percent of Interstate pavements in poor condition
  - Percent of non-Interstate National Highway System (NHS) pavements in good condition;
  - Percent of non-Interstate NHS pavements in poor condition
  - Percent of NHS bridges (by deck area) classified as in good condition
  - Percent of NHS bridges (by deck area) classified as in poor condition
- **Performance Measure 3 (PM3) – System & Freight**
  - Percent of person-miles on the Interstate system that are reliable—Level of Travel Time Reliability (Interstate LOTTR)
  - Percent of person-miles on the non-Interstate NHS that are reliable (Non-Interstate NHS LOTTR)
  - Truck travel time reliability (TTTR)

Establishing and using performance measures in an ongoing process to support MPO planning activities is important to provide the following:

- Important data regarding the investment in different transportation strategies or modes,
- Improved communication throughout the community, and
- Targets and measures that are collaboratively developed, based on data and objective information.

#### FDOT Guidance

Listed below are the performance measures and statewide targets that FDOT has established. FDOT worked in collaboration with the MPOs and providers of public transportation to establish these statewide targets.

**Safety.** Florida shares the national traffic safety vision “Toward Zero Deaths,” and formally adopted its own version of the national vision, “Driving Down Fatalities,” in 2012. FDOT and its traffic safety partners are committed to eliminating fatalities and reducing serious injuries with the understanding that the death of any person is unacceptable and based on that, zero is our target for all the safety performance measures.

**Pavement Condition.** The pavement condition performance measures assess pavement conditions based on international roughness index (IRI), cracking, rutting (for asphalt pavements) and faulting (for jointed concrete pavements). For asphalt and jointed concrete pavements, a 0.1-mile segment is considered in good condition if all three metrics are rated Good; if two or more metrics are considered poor, the condition is Poor. The federal rule requires a new methodology be used to measure rut depth and cracking that has not been historically used by FDOT. In consideration of the differences in the data collection requirements used by FDOT and those mandated by the rule, as well as other unknowns associated with the new required processes, the following initial 2 and 4-year targets were established.

**Bridge Condition.** The bridge condition performance measures for the percent of deck area classified as Good and Poor is determined using National Bridge Inventory (NBI) condition ratings for deck, superstructure, substructure, and culvert. Condition is determined by the lowest rating of these items using a scale of 1 to 9. If the NBI rating is 4 to 1, the bridge is classified as Poor; NBI rating 7 to 9, the bridge is Good. Bridges rated below 7 but above 4 are classified Fair; however, there is no related FHWA performance measure associated with that rating. Considering the differences in criteria, the following initial 2 and 4-year targets were established.

**System Performance.** The travel time reliability metric is calculated for each segment of the National Highway System (NHS), weighted by volume and occupancy. Data are collected in 15-minute segments during four total time periods and is reported as the “percent of reliable person-miles traveled.” The segment is considered reliable if the reliability ratio is below 1.50 during all time periods. Freight movement is assessed by calculating truck travel time reliability ratio using data from five total time periods. The higher the ratio value, the less reliable the segment.

## Hernando/Citrus MPO Performance Targets

The FDOT is required to establish statewide targets for the required performance measures and MPOs have the option to support the statewide targets or adopt their own. Based on this information the Hernando/Citrus MPO has adopted the following transportation performance measure targets. Local Transit Agencies must also adopt performance targets in their Transit Asset Management Plan (TAM) and the MPO must consider including the TAM targets in the LRTP and TIP updates.

### Safety Performance Targets (PM1)

Effective April 14, 2016, the FHWA established five highway safety performance measures to carry out the Highway Safety Improvement Program (HSIP). These performance measures are:

1. Number of fatalities
2. Rate of fatalities per 100 million vehicle miles traveled (VMT)
3. Number of serious injuries
4. Rate of serious injuries per 100 million vehicle miles traveled (VMT)
5. Number of non-motorized fatalities and non-motorized serious injuries

The FDOT publishes statewide safety performance targets in the HSIP Annual Report that it transmits to FHWA each year. As of the development of this LRTP, safety targets address calendar year 2018 and are based on a five-year rolling average (2011-2015). For the 2018 HSIP annual report, FDOT established statewide HSIP interim safety performance measures and FDOT's 2019 safety targets, which set the target at "0" for each of the performance measures to reflect the Department's vision of zero deaths.

On February 19, 2019, the MPO adopted Resolution 2019-01 to reestablish the Safety Performance Measures adopted in Resolution 2018-01, a 5% reduction based on a five-year rolling average for the safety performance measures listed as its 2019 safety targets.

**Table 3** indicates the areas in which the MPO is expressly supporting the statewide target developed by FDOT, as well as those areas in which the MPO has adopted a target specific to the MPO planning area.

**Table 3. Highway Safety (PM1) Targets**

Performance Target	Hernando/Citrus MPO agrees to plan and program projects so that they contribute toward the accomplishment of the FDOT safety target of zero	Hernando/Citrus MPO has adopted a target specific to the MPO Planning Area
Number of fatalities		✓
Rate of fatalities per 100 million vehicle miles traveled (VMT)		✓
Number of serious injuries		✓
Rate of serious injuries per 100 million vehicle miles traveled (VMT)		✓
Number of non-motorized fatalities and non-motorized serious injuries.		✓
Rate of Serious Injuries per 100 Million VMT		✓

The FDOT Florida Highway Safety Improvement Program (HSIP) annual report documents the statewide interim performance measures toward that zero deaths vision. The MPO acknowledges FDOT statewide HSIP safety performance measures and FDOT's 2019 safety targets, which set the target at "0" for each performance measure to reflect the Department's goal of zero deaths. However, the MPO is setting its safety performance targets based upon data collected within the MPO planning area for previous years related to safety performance measures.

Safety Performance Measure targets are required to be adopted on a yearly basis. In August of the current year, FDOT will report the following year's targets in the HSIP Annual Report to the Federal Highway Administration. After FDOT adopts the targets, the MPO is required to either adopt FDOT's targets or establish its own within six months (or the following February).

Statewide system conditions for each safety performance measure are included in **Table 4**, along with system conditions in the Hernando/Citrus MPO metropolitan planning area. System conditions reflect baseline performance, which for this first system performance report is the same as the current reporting period (2013-2017). The latest safety conditions will be updated annually on a rolling 5-year window and reflected within each subsequent system performance report to track performance over time in relation to baseline conditions and established targets.

**Table 4. Highway Safety (PM1) Conditions and Performance**

Performance Measure	Florida Statewide Baseline Performance Five-Year Rolling Average (2012-2016)	Hernando/Citrus MPO Baseline Performance Five-Year Rolling Average (2013-2017)	2-year Hernando/Citrus MPO Target (Jan 1, 2019 to Dec 31, 2020)	4-year Hernando/Citrus MPO Target (Jan 1, 2019 to Dec 31, 2022)
Number of Fatalities	2,533	54	46	42
Rate of Fatalities per 100 Million Vehicle Miles Traveled (VMT)	1.29	1.54	1.32	1.19
Number of Serious Injuries	20,552	482	414	373
Rate of Serious Injuries per 100 Million Vehicle Miles Traveled	10.45	13.79	11.83	10.68
Number of Non-Motorized Fatalities and Non-Motorized Serious Injuries	3,173	43	37	33

## Chapter 2

### Goals, Objectives, & Performance Targets

The Highway Safety Performance Targets and data in Table 4 is reflective of the latest available data as of the development of this LRTP and will be adopted as such. The Hernando/Citrus MPO adopted its updated Safety Performance Measures from Resolution 2020-01 at the February 13, 2020 MPO Board Meeting. It should be noted that the Hernando/Citrus MP 2045 LRTP Adoption Report was adopted in December 2019 and included safety data released earlier. This information is included in **Table 5**.

**Table 5. 2045 LRTP Adoption Report MPO Safety Performance Measures and Targets**

Performance Measure	Florida Statewide Baseline Performance Five-Year Rolling Average (2012-2016)	Hernando/Citrus MPO Baseline Performance Five-Year Rolling Average (2013-2017)	2-year Hernando/Citrus MPO Target (Jan 1, 2019 to Dec 31, 2020)	4-year Hernando/Citrus MPO Target (Jan 1, 2019 to Dec 31, 2022)
Number of Fatalities	2,533	54	51	46
Rate of Fatalities per 100 Million Vehicle Miles Traveled (VMT)	1.29	1.54	1.46	1.32
Number of Serious Injuries	20,552	482	458	414
Rate of Serious Injuries per 100 Million Vehicle Miles Traveled	10.45	13.79	13.10	11.82
Number of Non-Motorized Fatalities and Non-Motorized Serious Injuries	3,173	43	41	37

## Bridge and Pavement Condition Performance Targets (System Preservation) (PM2)

On September 18, 2018, the MPO adopted Resolution 2018-10 to support the FDOT Bridge and Pavement Condition Performance Targets. System preservation “Bridge and Pavement Condition” targets to assess the condition of the pavements and bridges on the National Highway System (NHS) became effective at the state level May 20, 2018. These performance measures and targets only apply to the National Highway System which includes the Interstate Highway System and typically the Principal Arterials. The current and future Bridge and Pavement Condition Targets are in **Table 6**.

### PAVEMENT AND BRIDGE CONDITION PERFORMANCE MEASURES AND TARGETS OVERVIEW

In January 2017, USDOT published the Pavement and Bridge Condition Performance Measures Final Rule, which is also referred to as the PM2 rule. This rule establishes the following six performance measures:

- Percent of Interstate pavements in good condition
- Percent of Interstate pavements in poor condition
- Percent of non-Interstate National Highway System (NHS) pavements in good condition
- Percent of non-Interstate NHS pavements in poor condition
- Percent of NHS bridges (by deck area) classified as in good condition
- Percent of NHS bridges (by deck area) classified as in poor condition

Federal rules require state DOTs and MPOs to coordinate when setting pavement and bridge condition performance targets and monitor progress towards achieving the targets. States must establish:

- Four-year statewide targets for the percent of Interstate pavements in good and poor condition
- Two-year and four-year targets for the percent of non-Interstate NHS pavements in good and poor condition
- Two-year and four-year targets for the percent of NHS bridges (by deck area) in good and poor condition

MPOs must establish four-year targets for all six measures. MPOs can either agree to program projects that will support the statewide targets or establish their own quantifiable targets for the MPO’s planning area.

#### PAVEMENT AND BRIDGE CONDITION BASELINE PERFORMANCE AND ESTABLISHED TARGETS

**Table 6** presents baseline performance for each PM2 measure for the State and for the MPO planning area as well as the two-year and four-year targets established by FDOT for the State.

**Table 6. Pavement and Bridge Condition (PM2) Performance and Targets**

Performance Measure	Statewide Performance (2017 Baseline)	Statewide 2-Year Target (2019)	Statewide 4-Year Target (2021)	Hernando/Citrus MPO 2-Year Target (2021)
Percent of Interstate pavements in good condition	66%	n/a	≥ 60%	Not required*
Percent of Interstate pavements in poor condition	0.1%	n/a	≤ 5%	Not required*
Percent of non-Interstate NHS pavements in good condition	76.4%	≥ 40%	≥ 40%	≥ 40%
Percent of non-Interstate NHS pavements in poor condition	3.6%	≤ 5%	≤ 5%	≤ 5%
Percent of NHS bridges (by deck area) in good condition	67.7%	≥ 50%	≥ 50%	≥ 50%
Percent of NHS bridges (by deck area) in poor condition	1.2%	≤ 10%	≤ 10%	≤ 10%

\* - 2 Year Targets for Interstate Pavement Conditions are not required for MPOs that adopt the FDOT's targets.

FDOT established the statewide PM2 targets on May 18, 2018. In determining its approach to establishing performance targets for the federal pavement and bridge condition performance measures, FDOT considered many factors. To begin with, FDOT is mandated by Florida Statute 334.046 to preserve the state's pavement and bridges to specific standards. To adhere to the statutory guidelines, FDOT prioritizes funding allocations to ensure the current transportation system is adequately preserved and maintained before funding is allocated for capacity improvements. These statutory guidelines envelope the statewide federal targets that have been established for pavements and bridges.

In addition, MAP-21 requires FDOT to develop a Transportation Asset Management Plan (TAMP) for all NHS pavements and bridges within the state. The TAMP must include investment strategies leading to a program of projects that would make progress toward achievement of the state DOT targets for asset condition and performance of the NHS. FDOT's TAMP was updated in June 2019 reflect MAP-21 requirements in 2018 and is included in **Technical Appendix B**.

Further, the federal pavement condition measures require a new methodology that defers from the methods previously used by FDOT and uses different ratings and pavement segment lengths. For bridge condition, the performance is measured in deck area under the federal measure, while the FDOT programs its bridge repair or replacement work on a bridge by bridge basis. As such, the federal measures are not directly comparable to the methods that are historically used by the FDOT.

In consideration of these differences, as well as the unfamiliarity associated with the new required processes, FDOT took a conservative approach when setting its initial pavement and bridge condition targets.

The Hernando/Citrus MPO agreed to support FDOT's pavement and bridge condition performance targets on September 18, 2018. By adopting FDOT's targets, the Hernando/Citrus MPO agrees to plan and program projects that help FDOT achieve these targets.

#### SYSTEM PERFORMANCE TARGET (TRAVEL TIME RELIABILITY) (PM3)

The Hernando/Citrus MPO 2045 LRTP seeks to address system preservation, identifies infrastructure needs within the metropolitan planning area, and provides funding for targeted improvements. Two of the Hernando/Citrus MPO 2045 LRTP goals established directly address system preservation.

- **Intermodal** - Maintain existing transportation system
- **Preservation** - Preserve and maintain a resilient transportation infrastructure and transit assets

On September 18, 2018, the MPO adopted Resolution 2018-10 to support the FDOT Performance Targets. These performance measures and targets only apply to the National Highway System which includes the Interstate Highway System and typically the Principal Arterials. The PM3 requirements also included rules to address the Congestion Mitigation and Air Quality Improvement Program (CMAQ). These CMAQ rules do not apply to the Hernando/Citrus MPO since the planning area is not designated as nonattainment or a maintenance area for air quality.

Federal rules require MPOs to establish four-year performance targets for the Level of Travel Time Reliability (LOTTR) and Truck Travel Time Reliability (TTTR) performance measures. The measurement of these performance measures is summarized in **Table 7**.

#### LOTTR MEASURES

The LOTTR performance measures assesses the percent of person-miles traveled on the Interstate or the non-Interstate NHS that are reliable. LOTTR is defined as the ratio of longer travel times (80th percentile) to a normal travel time (50th percentile) over of all applicable roads, between the hours of 6 a.m. and 8 p.m. each day. The measures are expressed as the percent of person-miles traveled on the Interstate or Non-Interstate NHS system that are reliable. Person-miles take into account the number of people traveling in buses, cars, and trucks over these roadway segments.

#### TTTR MEASURE

The TTTR performance measure assesses the reliability index for trucks traveling on the interstate. A TTTR ratio is generated by dividing the 95th percentile truck travel time by a normal travel time (50th percentile) for each segment of the Interstate system over specific time periods throughout weekdays and weekends. This is averaged across the length of all Interstate segments in the state or MPO planning area to determine the TTTR index.

**Table 7. Hernando/Citrus MPO System Performance (Travel Time Reliability) Targets**

Performance Measure	Statewide Performance (2017 Baseline)	Statewide 2-Year Target (2019)	Statewide 4-Year Target (2021)	Hernando/Citrus MPO Performance (2017 Baseline)
Percent of person-miles on the Interstate system that are reliable—Level of Travel Time Reliability (Interstate LOTTR)	82.2%	≥ 75%	≥ 70%	100%
Percent of person-miles on the non-Interstate NHS that are reliable (Non-Interstate NHS LOTTR)	84.0%	Not Required	≥ 50%	96%
Truck travel time reliability (TTTR)	1.43%	≥ 1.75	≥ 2.00	1.88%

FDOT established the statewide PM3 targets on May 18, 2018. In setting the statewide targets, FDOT reviewed external and internal factors that may affect reliability, conducted a trend analysis for the performance measures, and developed a sensitivity analysis indicating the level of risk for road segments to become unreliable within the time period for setting targets. One key conclusion from this effort is that there is a lack of availability of extended historical data with which to analyze past trends and a degree of uncertainty about future reliability performance. Accordingly, FDOT took a conservative approach when setting its initial PM3 targets.

The Hernando/Citrus MPO agreed to support FDOT’s PM3 targets on September 18, 2018. By adopting FDOT’s targets, the Hernando/Citrus MPO agrees to plan and program projects that help FDOT achieve these targets.

## Chapter 2

### Goals, Objectives, & Performance Targets

The Hernando/Citrus MPO 2045 LRTP seeks to address system reliability and congestion mitigation through various means, including capacity expansion and operational improvements. These System Performance Measures (PM3) are supported by each of the 2045 LRTP's six goals.

- **Safety** - Increase safety of the counties' transportation system
- **Economy** - Support economic development and tourism
- **Mobility** - Provide for mobility needs of the community
- **Intermodal** - Maintain existing transportation system
- **Livability** - Preserve, and where possible, enhance social, cultural, physical and natural environmental values
- **Preservation** - Preserve and maintain a resilient transportation infrastructure and transit assets

### Performance Measure Updates

---

The Hernando/Citrus MPO regularly updates Performance Targets, and updates them in the annual Transportation Improvement Program. The Hernando/Citrus MPO adopted updated Safety Performance Measures at the February 13, 2020 MPO Board Meeting, and these data are included in this LRTP. Other Performance Measures will be updated throughout the year, adopted at MPO Board meetings and will be included in the next iteration of the TIP.

## Other Goals and Objectives

---

### Florida Department of Transportation: Initial Transportation Asset Management Plan

The Florida Department of Transportation (FDOT) published the Initial Transportation Asset Management Plan (TAMP) on April 30, 2018. This plan summarizes the current state of asset management planning process, goals and objectives, performance measures, and FDOT performance targets. The FDOT Transportation Asset Management Plan updated June 28, 2019 addresses the FHWA performance measures and targets.

At the time of preparing this section of the Hernando/Citrus MPO 2045 LRTP, the FDOT Initial TAMP is the latest version. As such, the Hernando/Citrus MPO supports the FDOT asset management process and adopts by reference this plan into the 2045 Long Range Transportation Plan. The MPO will continue to monitor the development of the update of the Transportation Asset Management Plan and will work with the FDOT to set performance targets for the following asset management performance measures only:

- % of Interstate pavements in Good condition
- % of Interstate pavements in Poor condition
- % of non-Interstate NHS pavements in Good condition
- % of non-Interstate NHS pavements in Poor condition
- % of NHS bridges classified as in Good condition by deck area
- % of NHS bridges classified as in Poor condition by deck area

The MPO will not be responsible for setting performance targets for other asset management performance measures contained within the Transportation Asset Management Plan.

#### Florida Department of Transportation: Florida Freight Mobility and Trade Plan Investment Element FAST Act Addendum

The Florida Department of Transportation (FDOT) published the Florida Freight Mobility and Trade Plan Investment Element FAST Act Addendum in January 2018. This plan summarizes the current state of the Freight Mobility planning process, goals and objectives, and performance measures.

The Hernando/Citrus MPO supports the FDOT freight planning process and adopts by reference the FDOT Florida Freight Mobility and Trade Plan Investment Element FAST Act Addendum published January 2018 into the 2045 Long Range Transportation Plan. The MPO will continue to monitor the development of the Florida Freight Mobility and Trade Plan and will work with the FDOT to set appropriate performance targets for the measurement of Truck Travel Time Reliability (Truck travel time reliability ratio (TTR) on the Interstate system).

#### Transit Asset Management Targets (TAM)

The Transit Asset Management rule from the Federal Transit Administration (FTA) became effective on October 1, 2018. This rule applies to all recipients and subrecipients of Federal transit funding that own, operate, or manage public transportation capital assets. The rule introduces three key requirements:

1. New State of Good Repair (SGR) performance measures and targets;
2. Revised National Transit Database (NTD) reporting requirements; and
3. New Transit Asset Management (TAM) Plan.

MPOs are encouraged to incorporate Transit Asset Measures and targets in the LRTP and TIP through a process that includes a written agreement between the transit providers, the MPO, and FDOT. **Table 8** identifies performance measures outlined in the final rule for transit asset management.

“State of good repair” is defined as the condition in which a capital asset is able to operate at a full level of performance. This means the asset:

1. Is able to perform its designed function.
2. Does not pose a known unacceptable safety risk.
3. Its lifecycle investments have been met or recovered.

**Table 8. FTA TAM Performance Measures**

<b>Asset Category</b>	<b>Performance Measure and Asset Class</b>
Equipment	Percentage of non-revenue, support-service and maintenance vehicles that have met or exceeded their useful life benchmark
Rolling Stock	Percentage of revenue vehicles within a particular asset class that have either met or exceeded their useful life benchmark
Infrastructure	Percentage of track segments with performance restrictions
Facilities	Percentage of facilities within an asset class rated below condition 3 on the TERM scale

For equipment and rolling stock classes, useful life benchmark (ULB) is defined as the expected lifecycle of a capital asset, or the acceptable period of use in service, for a particular transit provider's operating environment. ULB considers a provider's unique operating environment such as geography and service frequency and is not the same as an asset's useful life.

Public transportation agencies are required to establish and report transit asset management targets annually for the following fiscal year. Each public transit provider or its sponsors must share its targets, TAM, and asset condition information with each MPO in which the transit provider's projects and services are programmed in the MPO's TIP.

MPOs are required to establish initial transit asset management targets within 180 days of the date that public transportation providers establish initial targets. Subsequent MPO targets must be established when the MPO updates the TIP or LRTP.

The MPO can support the transit provider targets or establish its own transit asset management targets for the MPO planning area. In cases where two or more providers operate in an MPO planning area and establish different targets for a given measure, the MPO may coordinate to establish a single target for the MPO planning area or support a set of targets for the MPO planning area that differs for each transit provider.

## Chapter 2

### Goals, Objectives, & Performance Targets

To the maximum extent practicable, transit providers, states, and MPOs must coordinate with each other in the selection of performance targets.

The TAM rule defines two tiers of public transportation providers based on size parameters. Hernando/Citrus MPO has only Tier II providers operating within its jurisdiction. Tier II providers are those that are a subrecipient of FTA 5311 funds, or an American Indian Tribe, or have 100 or less vehicles across all fixed route modes, or have 100 vehicles or less in one non-fixed route mode. A Tier II provider has the option to establish its own targets or to participate in a group plan with other. The paratransit provider in Hernando County is operated by Mid-Florida Community service, which is a participant in the FDOT Group TAM Plan.

#### Hernando County – TheBus

TheBus is a TAM Tier II transit agency operated by the Hernando County Board of County Commissioners in Hernando County, Florida. The Hernando County transit system consists of four (4) fixed-routes with ADA complementary service. One of the four routes connect with Pasco County to the south for a regional corridor connection to the Pasco-Hernando State College. The MPO adopted the performance targets and measures identified in TheBus Asset Management Plan for the MPO's planning process (Resolution 2018-10, September 18, 2018).

#### Citrus County – Citrus County Transit

Citrus County Transit is a TAM Tier II transit agency, which operates two different lines of transit with 30 vehicles traveling an average of nearly 7,000 miles per month. Orange Line Bus generally operates as a fixed-route bus service, offering off-route pick-ups with prior rider-requested coordination. Transit Bus operates as a by-request door-to-door transportation service, available to all riders. The MPO adopted the performance targets and measures identified in the Citrus County Asset Management Plan for Citrus Transit for the MPO's planning process (Resolution 2018-10, September 18, 2018).

## Summary of Adopted Transit Asset Management Targets

The transit asset management performance targets and measures for all of the Hernando Citrus MPO are listed in **Table 9**.

**Table 9. Performance Targets & Measures (MPO Total)**

Asset Category	Performance Measure
Revenue Vehicles	Age - % of revenue vehicles within a particular asset class that have met or exceeded their Useful Life Benchmark (ULB)
Equipment	Age - % of vehicles that have met or exceeded their Useful Life Benchmark (ULB)
Facilities	Condition - % of facilities with a condition rating below 3.0 on the FTA Transit Economic Requirements Model (TERM) Scale

## Hernando/Citrus MPO Transit Asset Management Targets

On September 18, 2018, the MPO agreed to support transit asset management targets set by TheBus in Hernando County Transit Asset Management Plan and Citrus Transit in the Citrus County Asset Management Plan, thus agreeing to plan and program projects in the TIP that once implemented, are anticipated to make progress toward achieving the transit provider targets.

TheBus established the transit asset targets identified in **Table 10** on August 28, 2018.

Citrus Transit established the transit asset targets identified in **Table 11** on September 24, 2018.

The transit asset management targets are based on the condition of existing transit assets and planned investments in equipment, rolling stock, infrastructure, and facilities. The targets reflect the most recent data available on the number, age, and condition of transit assets, and expectations and capital investment plans for improving these assets. The table summarizes both existing conditions for the most recent year available, and the targets.

**Table 10. Percentage of Revenue Vehicles in Hernando County, Florida that have met or exceeded their ULB, by Revenue Vehicle Type and Target Year, 2019 to 2023**

Revenue Vehicle Type	2019 Target	2020 Target	2021 Target	2022 Target	2023 Target
BU – Bus	10%	10%	10%	10%	N/A
CY – Cutaway Bus	10%	20%	20%	10%	10%
MV – Mini-van	N/A	100%	N/A	N/A	N/A

**Table 11. Percentage of Revenue Vehicles in Citrus County, Florida that have met or exceeded their ULB, by Revenue Vehicle Type and Target Year, 2019 to 2023**

Revenue Vehicle Type	2019 Target	2020 Target	2021 Target	2022 Target	2023 Target
BU – Bus	N/A	N/A	N/A	N/A	N/A
CY – Cutaway Bus	20%	20%	20%	20%	20%
MV – Mini-van	100%	N/A	N/A	N/A	N/A

# Chapter 3

## PLANNING ASSUMPTIONS

# Chapter 3

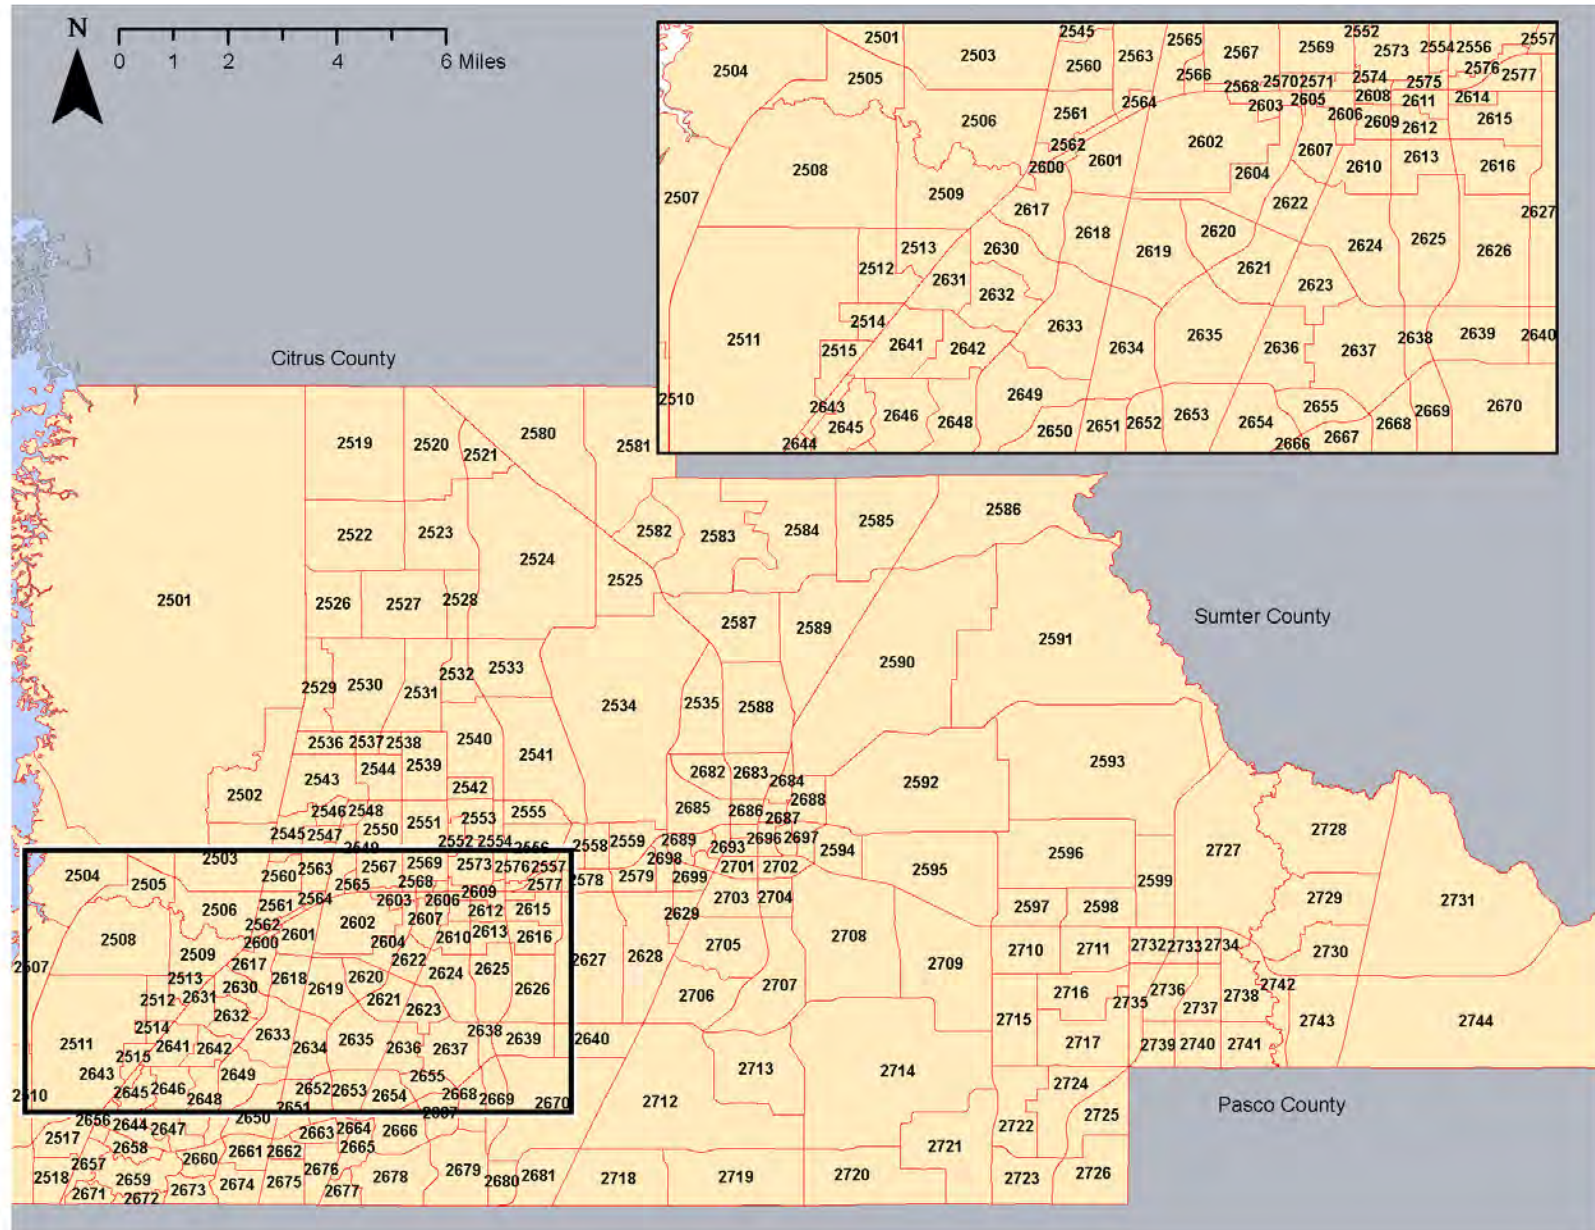

## Planning Assumptions

### Introduction

The purpose of the Hernando/Citrus MPO 2045 LRTP is to assess transportation needs and establish a Cost Feasible Plan for funding the highest priority improvements. One of the first steps in the LRTP process is to develop a forecast of the geographic distribution of each county's population and employment over the LRTP planning horizon. These "socioeconomic" data document anticipated population and employment concentrations at a traffic analysis zone (TAZ) level and are used to forecast future travel patterns. **Figure 2** and **Figure 3** illustrate the TAZ geographic structures for Hernando County and Citrus County, respectively, that were used for this forecast effort. The forecast data represents a cooperative effort among the Hernando/Citrus MPO, FDOT District Seven, and the local government jurisdictions in Hernando and Citrus Counties.

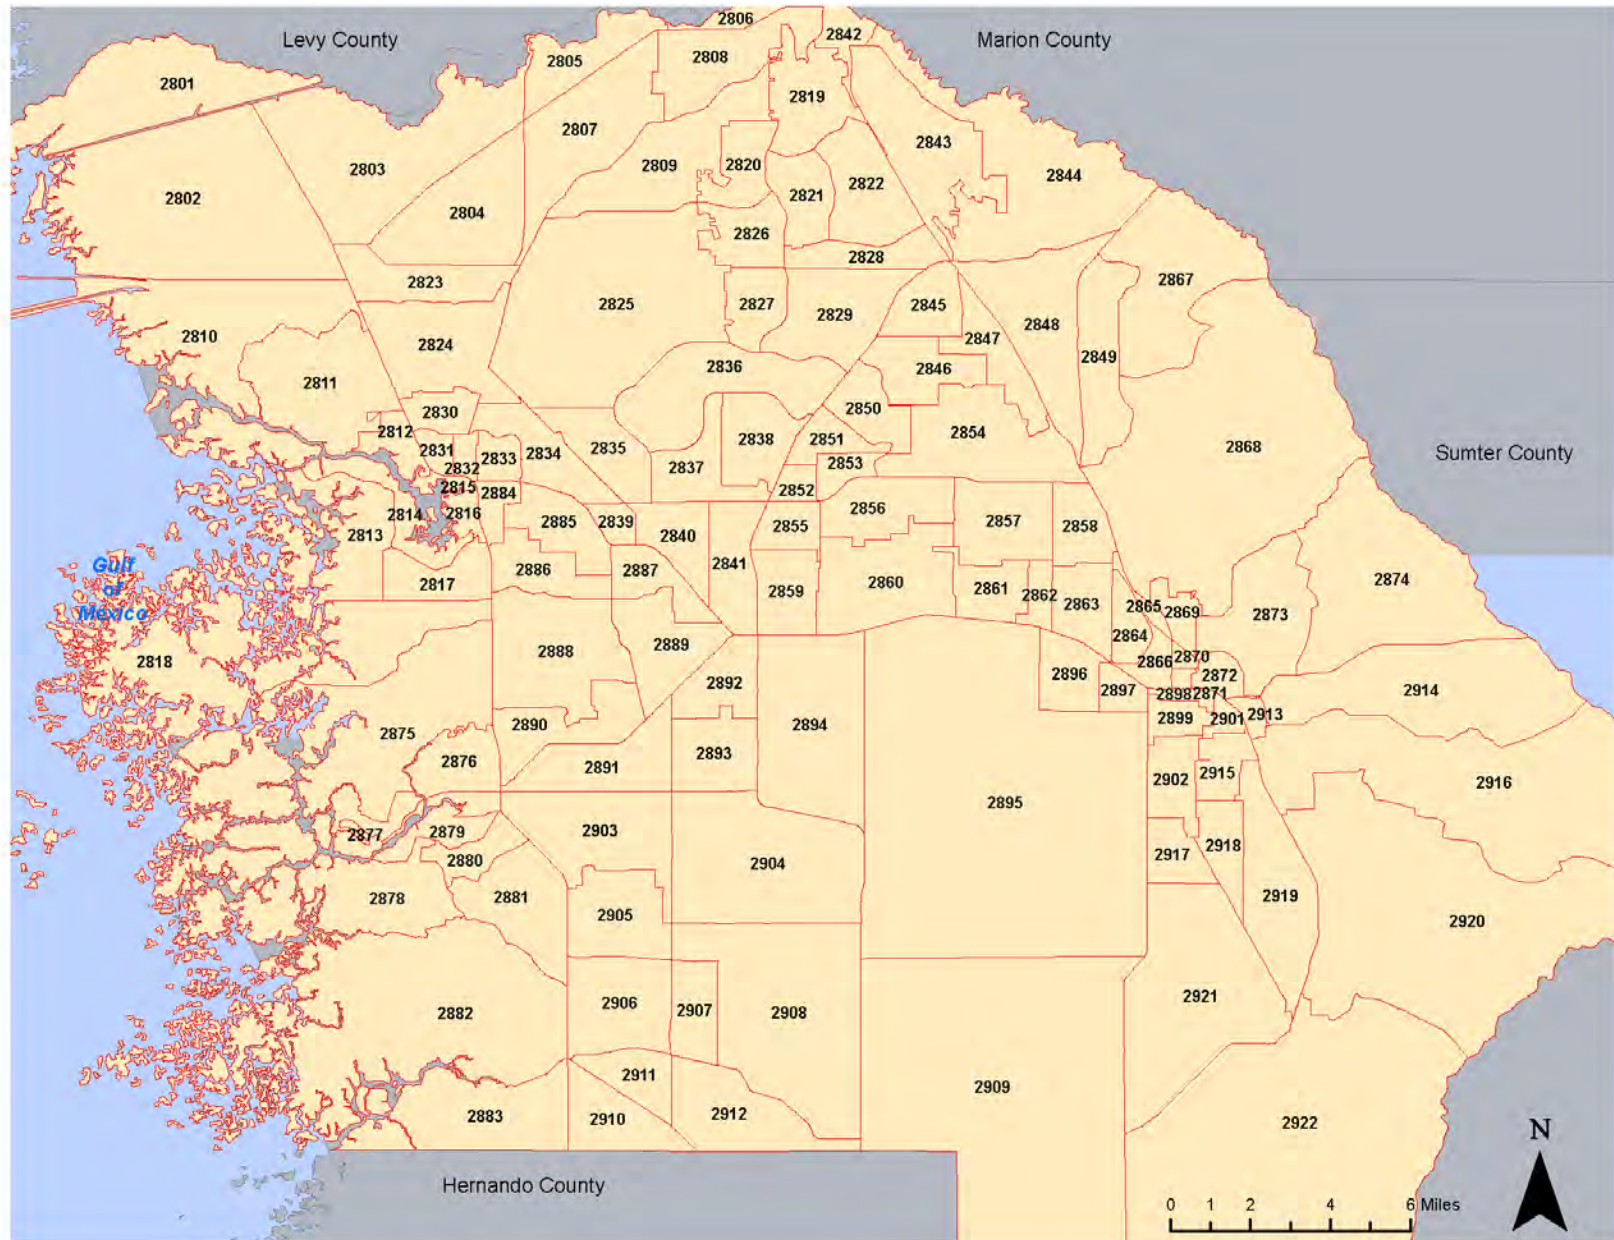

The local government Comprehensive Plans guide public policy in terms of land use through the Future Land Use (FLU) Element. In addition to considering these policy documents in the forecast process, the study team attempted to maintain an appropriate degree of consistency between the 2045 forecasts and the 2040 forecasts.

**Figure 2. Hernando County Traffic Analysis Zones**

**Figure 3. Citrus County Traffic Analysis Zones**

## Hernando County Profile

Hernando County is a coastal county with an area of approximately 478 square miles. Pasco County is located to the south, Citrus County to the North, the Gulf of Mexico to the west and Sumter County to the east.

The City of Brooksville is located in the center of the county and has served as the county seat for over 100 years. It was initially settled in 1845 as Melendez, being established as Brooksville in 1856 and incorporated in 1880. Brooksville has historically been located along a strategic corridor, as Fort DeSoto was a regular stop on the Concord Stage Coach Line between Tampa and Palatka. Today, it is located at the intersections of US-41, US-98 and State Road (SR) 50.

The City of Weeki Wachee is located at the western terminus of SR 50, at the intersection with US-19. Weeki Wachee has an area of 1.06 square miles, accounted for primarily by Weeki Wachee Preserve and Weeki Wachee Springs park. Weeki Wachee is historically a popular tourist destination and is anticipated to continue seeing additional visitors in the future.

Spring Hill, a census-designated place (CDP) in the southern part of the county is 62.2 square miles and serves as the primary population and employment center in Hernando County. The Spring Hill Urbanized area is approximately 115 square miles, extending into Pasco County to the south, and had a population of 156,467 in 2017.

## Citrus County Profile

Citrus County lies adjacent to Hernando County to the north. Citrus County abuts Levy County to the northwest and Marion County to the northeast. The western boundary runs along the Gulf of Mexico and the eastern boundary is shared with Sumter County. The Withlacoochee River generally defines the northern and eastern borders of Citrus County.

The City of Inverness is located in the eastern central part of the county and serves as the county seat. The 2018 US Census population estimate was 7,390. The city lies at the intersection of SR 44, which is the primary connection to central Florida and Florida's Turnpike and US-41, providing an alternative north-south route.

Crystal River is the other incorporated city located in Citrus County, located in the west-central part of the county generally centered at the intersection of SR 44 and US-19/98. The smaller of Citrus County's two cities, Crystal River's US Census 2018 population estimate was 3,162.

The SR 44 corridor between Crystal River and Inverness serves as the "backbone" of the county. Most residential development and employment is connected to SR 44. This includes the communities of Beverly Hills and Pine Ridge to the north and Lecanto, located at the SR 44 intersection with County Road (CR) 491 (Lecanto Highway).

Within Citrus County, the transportation network is inefficient, having been developed to serve scattered development. This has resulted in a largely low-density land use pattern with no distinct urban center. Currently, US-19 and US-41 serve as the primary connections between Hernando and Citrus counties. The extension of the Suncoast Parkway will provide an additional connection, by limited access highway, between the two counties and south to the greater Tampa Bay region.

#### Future Land Use

To accurately develop future transportation needs, a thorough analysis of the area's future land use is necessary. A large part of the LRTP process is dependent on the Future Land Use Plans of the counties and cities. A Future Land Use Plan is developed per jurisdiction to identify where and how growth will occur within its boundaries. By producing such plans, sensitive environments and natural resources can be protected while still providing optimal areas for social and cultural growth and development.

The adopted Hernando and Citrus Future Land Use Plans were used to develop future socioeconomic data forecasts. The information from these plans helped determine the maximum developable residential or commercial units, identify characteristics of the physical environment that will prevent development, and emphasize new growth in urbanized areas that may best support additional population and employment.

The adopted Future Land Use Plan for Hernando County, effective October 9, 2012 along with the adopted Future Land Use Plan for Citrus County, effective July 22, 2014 were used to develop the socioeconomic data projections for this LRTP.

#### Population Control Totals

The development of population data control was one of the first steps in the 2045 socioeconomic data forecast. Normally, population control totals used by Florida counties have been based on the University of Florida Bureau of Economic and Business Research (BEBR) population forecasts. These forecasts, prepared for each county, provide three countywide forecasts:

- **Low:** The low range of the forecasts
- **Medium:** The average of all forecasts (typically used for planning forecasts)
- **High:** The high range of the forecasts

The BEBR forecasts have been significantly impacted by the Great Recession, which lasted from late 2007 through 2009. Historically, the BEBR Medium forecast has underestimated growth in high growth counties. This experience with the BEBR Medium forecast and other factors, including the economic recovery taking place in Hernando and Citrus Counties and significant investments such as Suncoast Parkway 2 and potential M-CORES projects (see Chapter 4 for more information on M-CORES), support the use of a population control total higher than the BEBR Medium forecast. The 2045 population forecast assumes a population control total based on the average of the BEBR Medium and High forecasts, resulting in a 2045 forecast of 269,600 people in Hernando County and 186,000 people in Citrus County. The relationship between the different BEBR forecasts and the selected 2045 forecast is illustrated in **Figures 4 and 5**.

**Figure 4. Hernando County Population Control Totals**

**Figure 5. Citrus County Population Control Totals**

For the purposes of use with the Transportation Demand Model, only the permanent populations—residents living in Hernando and Citrus counties for more than six months per year—were forecasted. The permanent populations include Household population and Group Quarters population.

The U.S. Census Bureau defines household population as, “All U.S. residents who live in housing units such as single-family homes, townhouses, apartments, and mobile homes.” A housing unit, according to the U.S. Census Bureau is, “a house, an apartment, a mobile home or trailer, a group of rooms, or a single room occupied as separate living quarters, or if vacant, intended for occupancy as separate living quarters. Separate living quarters are those in which the occupants live separately from any other individuals in the building and which have direct access from outside the building or through a common hall...”.

The U.S. Census Bureau also describes all people not living in households as living in group quarters. The Census Bureau defines two types of group quarters: “...institutional group quarters such as adult correctional facilities, juvenile facilities, skilled-nursing facilities, and other institutional facilities such as mental (psychiatric) hospitals and in-patient hospice facilities” and “...non-institutional group quarters such as college/university student housing, military quarters, and other non-institutional group quarters such as emergency and transitional shelters for people experiencing homelessness and group homes.”

## Employment Control Totals

The employment control totals for each county were developed based on a total employees/population ratio and an assumption that unemployment will settle at a natural rate of 4 percent by 2020 and remain stable through 2045. From an economic standpoint, it is assumed that boom periods will balance out bust periods.

Total employment was broken out into Industrial, Commercial, and Service employment categories. The categories are based on the Standard Industrial Classification (SIC) Manual, published by the U.S. Department of Commerce and described as follows:

- **Industrial Employment** - All full-time and regular part-time employees, and self-employed persons by job location, whose job is in an industry classified in Standard Industrial Classification (SIC) categories 01 to 39 (i.e., agriculture, forestry, fisheries, mining, contract construction, and manufacturing)
- **Commercial Employment** - All full-time and regular part-time employees and self-employed persons, by job location, whose job is in an industry classified in SIC categories 50 to 59 (retail trade and wholesale trade are commonly located in areas zoned for commercial land use activities)
- **Service Employment** - All full-time and regular part-time employees, and self-employed persons, by job location, whose job is in an industry classified in SIC categories 40 to 49 and 60 to 93 (i.e., transportation, communication and utilities services; finance, insurance and real estate services; selected personal services; tourism and recreational services, health and educational services; government services)

The control totals are based on a ratio for each category to total employment. In most Florida counties, the ratio of the three employment categories would be forecasted to change over time to reflect a reduction in the ratio of industrial employment and an increase in service employment. The Hernando/Citrus 2045 employment forecast assumes that the ratio of Industrial employment will decrease as a result of the planned closure of Duke Energy's Crystal River Nuclear Plant by the year 2027, with its coal-fired units scheduled to be fully dismantled by 2023.

**Table 12 A-C** presents the population and employment forecast for Hernando County. It is forecasted that Hernando County's 2045 total population will be 269,600 persons with an employment total of approximately 87,801 employees. This represents an increase in population of 92,781 persons and employment of 32,101 employees from 2015 to 2045.

**Table 13 A-C** presents the population and employment forecast for Citrus County. It is forecasted that Citrus County's 2045 total population will be 186,000 persons with an employment total of approximately 61,712 employees. This represents an increase in population of 44,499 persons and employment of 15,892 employees from 2015 to 2045.

<b>Service</b>	27,820	30,700	32,558	34,359	35,763	37,094	38,395	10,575
<i>Industrial/Employment Ratio</i>	0.170	0.175	0.180	0.185	0.185	0.185	0.185	N/A
<i>Commercial/Employment Ratio</i>	0.223	0.213	0.203	0.193	0.193	0.193	0.193	N/A
<i>Service/Employment Ratio</i>	0.607	0.612	0.617	0.622	0.622	0.622	0.622	N/A

As summarized in **Tables 12C and 13C**, the employment-to-population ratio is forecasted to increase from 2015 to 2020, and then remain consistent through the forecast horizon. This initial increase and subsequent stabilization reflect an economy enjoying the accelerated growth of post-recession recovery early on, and then calming to settle at a consistent employment ratio through 2045.

## School Enrollment Control Totals

---

It is forecasted that the 2045 Hernando County kindergarten to 12th grade (K-12) school enrollment, including enrollment from both public and private schools, will be approximately 36,317 students, an increase of 12,532 students from 2015 to 2045. Higher education enrollment is forecast for 2045 at approximately 5,214 students. The base 2015 higher education enrollment is approximately 3,519; the resulting increase from 2015 to 2045 is approximately 1,695 students.

It is forecasted that the 2045 Citrus County kindergarten to 12th grade (K-12) school enrollment, including enrollment from both public and private schools, will be approximately 21,531 students, an increase of 5,130 students from 2015 to 2045. Higher education enrollment is forecast for 2045 at approximately 3,031 students. The base 2015 higher education enrollment is approximately 2,313; the resulting increase from 2015 to 2045 is approximately 718 students.

Guidance on the forecast school enrollment control totals and location of schools was provided by the Hernando/Citrus MPO staff and representatives of the counties' School Districts.

## Hernando and Citrus County Future Growth

---

Significant growth is expected in both Hernando and Citrus counties over the next 25 years. This is based on an analysis of national and local trends in population and employment. The future transportation needs of an area are largely based on the type of growth that is anticipated. Hernando County and Citrus counties have similar socioeconomic makeup, and each county experiences significant seasonal populations and/or visiting tourists.

The population of both Hernando and Citrus includes a higher-than-average percent of adults age 65 and older. The American Community Survey (ACS) 2017 estimated that 27.5% of Hernando County residents were age 65 and over, and 35.5% of Citrus County residents were age 65 and older. Statewide, the survey estimates 19.4% of the total population is age 65 and older. Further, both counties are estimated to have a lower percentage of households with children than observed statewide. The ACS estimates 18.0% of Citrus County households and 24.6% of Hernando County households have children, whereas 27.6% of households have children statewide.

Both population characteristics strongly influence the needs of the transportation system. For instance, large populations of older and active adults may desire enhanced bicycle and pedestrian facilities such as multiuse trails and sidewalks. Similarly, if there is an increase in households with children, these facilities will need enhancement especially near schools.

As general growth in the area proceeds, the way in which development accommodates this growth will increase in importance. More efficiency in land-use and more options for transportation are important aspects of the future plans of the counties and cities, and of the MPO as a whole. A focus on enhancing the urbanized areas supports the general desire to preserve and protect the character of the MPO's rural areas.

Future population growth is largely expected in areas of Hernando County, where it will be consistent with the FLU designations. Population growth is anticipated along the US-19, US-41, US-98, and SR 50 corridors as well as in areas within the Residential or Planned Development FLU categories, including Spring Hill and northeast of Brooksville.

Different segments of Hernando County’s employment growth are anticipated to occur in different areas of the county. Commercial and service employment growth is anticipated to take place along the major roadway corridors, whereas growth in the industrial sector is anticipated to occur primarily in areas west of US-41.

Citrus County population growth is anticipated to occur primarily in the north central part of the county generally bound by SR 44 to the south, the railroad corridor to the northwest and the US-41 corridor to the northeast. This area includes the developing communities of Beverly Hills and Citrus Springs.

Employment growth in Citrus is anticipated throughout the county. Much of the commercial growth is expected to occur in the Crystal River area, the Beverly Hills area, and the northeast area of the county. Service employment is expected throughout the county, with high growth in the central and northeast parts of the county. A high level of industrial sector employment growth is projected to occur along SR 44. The area in northwest Citrus County may experience a decrease in industrial employment as the Duke Energy Crystal River Nuclear Plan is decommissioned in future years.

## Growth Figures

**Table 14** shows the base year (2015) population and employment totals by Hernando County Planning Area compared with the Plan’s horizon year of 2045. **Figure 6** is the Hernando County Planning Area Map.

**Table 14 A–C** shows the employment sector growth by Hernando County Planning Area.

**Table 15** shows the base year (2015) population and employment totals by Citrus County Planning Area compared with the Plan’s horizon year of 2045. **Figure 7** is the Citrus County Planning Area Map.

**Table 15 A–C** shows the employment sector growth by Citrus County Planning Area.

Additional information regarding the methodology and data used to develop the socioeconomic forecast can be found in Socioeconomic Data Forecast Technical Report in **Technical Appendix C**.

## Transportation Trends

---

The level of growth expected in Hernando and Citrus counties is likely to have a significant impact on travel demand and overall mobility in the area. However, certain transportation trends may modify the effects that traditional growth would cause. Shifts in behavior that may have an influence include younger individuals delaying or forgoing acquisition of driving permits or older individuals remaining active and mobile later in life. These demographic trends are occurring alongside changes in transportation technology, such as the rise in popularity of transportation network companies (TNCs) like Uber and Lyft, automated, connected, electric, and shared vehicles (ACES), and increases in the prevalence of telecommuting.

This plan seeks to create a transportation network that is well balanced so that it may accommodate these trends and other shifts in travel behavior. A resilient multimodal network will serve the community well into the future.

## Travel Demand Model

---

The key purpose of the forecasted population and employment data is to develop a forecast of the travel demand for the year 2045. This is accomplished by using a travel demand forecast model that converts the population and employment data into trips which are subsequently assigned to a roadway and/or transit network. The Hernando/Citrus MPO 2045 LRTP makes use of the District Seven Regional Planning Model (D7RPM) which was developed by one of Hernando/Citrus MPO's partners, the Florida Department of Transportation District 7. Additional information on the D7RPM is provided below or can be found in **Technical Appendix D**.

The D7RPM is a 'traditional' Florida Standard Urban Transportation Structure (FSUTMS) four-step, trip-based model updated with many of the recommendations provided by the FDOT Transit Model Update project to improve the preparation of transit demand forecasts to a point consistent with federal expectations, and to incorporate state of the practice techniques and tools through a prototype model application.

## Regional Coordination

---

Due to the amount of growth the Gulf Coast region has experienced and the expectations that it will continue, regional transportation planning is important. The MPO has maintained strong regional alliances with its counterparts in the Tampa Bay urbanized area and has interlocal agreements with the West Central Florida Chairs Coordinating Committee (CCC) with regard to regional transportation planning and coordination. The MPO will ensure that the regional projects contained in the 2045 LRTP are reflected in regional transportation plans.

The Hernando/Citrus MPO recognizes there are several regional transportation corridors linking the surrounding MPO/TPO regions and there may be opportunities in the future for coordination between the agencies.

The MPO coordinated with FDOT District Seven, as well as the other three MPOs/TPOs within the district, throughout the development of the FDOT D7RPM. The D7RPM was prepared as one regional model for all five counties in District Seven and was used by the MPOs/TPOs for each LRTP update. A substantial amount of coordination was required between FDOT and each MPO/TPO through each of the major steps in building the D7RPM, as each MPO/TPO provided data and input in support of the model validation, population and employment forecast, and subsequent model runs as various alternatives were tested for the LRTPs.

# Chapter 4

## TRANSPORTATION PLAN

# Chapter 4

## Transportation Plan

### Introduction

This chapter represents the Transportation Plan including the following:

- **Financial Resources** – How we can pay for the plan (Pages 4-2 to 4-6)
- **Cost Feasible Plan** – Which projects and programs are funded in the plan (Pages 4-18 to 4-19 and 4-24 to 4-25)
- **Needs Assessment** – What are the overall multimodal transportation needs without consideration of available funding (Pages 4-22 to 4-23 and 4-26 to 4-33)
- **Other Planning Priorities** – What are the major planning initiatives that are included within the plan (Pages 4-34 to 4-62)

### Financial Resources

Long Range Transportation Plans must address the financial resources anticipated to be used for maintaining and improving the transportation system. This includes a projection of revenues that can be reasonably expected for use in prioritizing the Needs Assessment and in developing a Cost Feasible Plan. Projected revenues are based on the current revenue status and anticipated trends. Another piece of revenue forecasting is to determine which transportation revenues are to be spent on capital and which are to be spent on operations and maintenance. Maintaining transportation infrastructure for the future is a 2045 LRTP Goal and will continue to be an important focus.

## Overview of Current Trend – Declining County Revenues

This plan projects spending on major state highways to increase, however it forecasts a decrease in transportation funding from the Counties. The County resources are generally used to build and maintain local and county roadways and support the public transportation systems. Despite the rising cost of local transportation projects, local Hernando County revenues in this plan have decreased from \$531.4 million to \$490.4 million and Citrus County revenues have decreased from \$337.6 million to \$253.8 million from the 2040 Long Range Transportation Plan. This is a total decrease of over \$226 million between the two counties. As a result, this plan will result in fewer county roadway improvements and decreased public transportation service.

## Revenue Summary

The available revenues for the long range transportation plan can be categorized into three major categories:

1. Strategic Intermodal System funding
2. Other Federal and State funding
3. Local revenues

The Hernando/Citrus MPO 2045 LRTP assumes a significant increase in state and federal transportation funding and a decrease in local funding.

The state and federal funding is higher due largely to the Suncoast Parkway extension (Suncoast Parkway 2) identified for funding in the Florida Statewide Strategic Intermodal System (SIS) Cost Feasible Plan. This funding resource is earmarked exclusively for SIS projects and represents \$294.7 million of funding in the plan. These projects are prioritized and funded at the statewide level and the funds applied to these projects cannot be reallocated to other projects by the MPO.

## OTHER STATE AND FEDERAL TRANSPORTATION FUNDING

This plan's estimates for the State and Federal revenues plus affiliated inflation factors were guided by the 2019 FDOT Revenue Forecasting Guidebook. The estimates can be found in the **Appendix A**. The Guidebook can be found in **Technical Appendix E**.

Transportation Alternative Funds: Florida Department of Transportation (FDOT) has provided estimates of funds for Transportation Alternatives to assist MPOs and TPOs in developing their plans. They can be utilized to fund pedestrian and bicycle improvements. "TALL" funds are Transportation Alternative Program funds designated for areas with populations less than 200,000, and "TALT" funds are Transportation Alternative Program funds provided for areas of any size. Both TALL and TALT funds are provided by each individual FDOT district. The portion available to the Hernando/Citrus MPO is estimated based on the percentage of total District 7 population. TALL funds through 2045 are projected to total \$7.83 million, and TALT funds through 2045 are projected to total \$8 million.

Transportation Regional Incentive Program (TRIP) funds are allocated to improve regionally significant transportation facilities. FDOT funds 50% of project costs, or up to 50% of the non-Federal share of project costs for public transportation facility projects. The TRIP funds through 2045 are projected to total \$22.8 million.

There is additional state funding that is projected to be available for projects in the 2045 Hernando/Citrus totaling \$516.4 million.

### LOCAL FUNDING

Local County funds for transportation projects are comprised of property taxes (Ad Valorem) and Transportation Impact Fees. The funds projected to be available from Hernando County total nearly \$130 million, and those projected to be available from Citrus County sources total about \$128.5 million. These projections can be found in the **Technical Appendix F**.

### OTHER FUNDING

Other potential revenue sources have been identified and are projected to contribute \$249.8 million through 2045. These sources may include projects funded by developers or through grants.

**Table 16** and **Table 17** provide a summary of the roadway revenue totals by revenue source available for capital projects by timeframe. The revenues are provided in Year of Expenditure (YOE), which is the estimated cost at the time of spending in the future, including inflation and Present Day Value (PDV), which is the value of the dollars at the time of the estimate (2018\$).

**Table 16. Total Revenue Year of Expenditure (YOE) Costs for Roadway Capital Projects (2025-2045)**

	Revenue	Year of Expenditure (YOE) Costs				Total
		2025	2025 - 2030	2031 - 2035	2036 - 2045

## Transportation Improvement Program (TIP) - 2020 to 2024

---

The first five years of the Long Range Transportation Plan make up the Transportation Improvement Program (TIP). While the federal regulations call for a TIP that includes four years of improvements, Florida requires and recognizes a full five years. Because the TIP document is frequently amended, the current TIP is provided in the **Technical Appendix G** for convenience. Amendments and updates to the TIP go through a formal process which includes a public hearing for major changes.

Significant revenue sources for TIP projects are identified in the TIP are listed in **Table 18**. “Other State Funds” represents revenues of less than \$20 million, with the exception of TALL and TALT funds, which are listed individually in the table. The full table can be found in the Hernando/Citrus TIP FY 2019/2020-2023/24 in **Appendix B**.

The current TIP includes several projects which are scheduled to be at least partially-funded as listed in **Tables 19 – 21**. It should be noted that The TIP five-year program includes costs as year of expenditure (YOE), which are considered equivalent to present day value (PDV).

**Table 18. TIP FY 2019/2020-2023/24 Revenues**

## Roadway Plan

### Project Phasing

At the beginning of the plan, an initial Needs Assessment was performed. Prioritization Factors, as found in **Figure 8** provide a basis for evaluation. Among these factors are items to consider such as significant negative environmental or community impacts, future congestion relief, freight corridors as identified in the FDOT Freight and Mobility Plan, and high crash rates among others. After initial prioritization, the needs were divided up based on funding status. Roadway and Highway projects in the plan are grouped into five tiers. Each tier is based on the relative level of priority and funding status as indicated in **Table 22**.

- Tier 1 includes projects that are committed improvements to be built in the next 5 years (2020 – 2025).
- Tier 2 includes projects that are part of the 2045 LRTP Cost Feasible Plan and are projected to begin between the years 2025-2035. These are considered Cost Feasible *Interim Projects*
- Tier 3 includes projects that are part of the 2045 LRTP Cost Feasible Plan and are projected to begin between the years 2036-2045.
- Tier 4 includes high priority projects, or *Illustrative Projects* that are not fully currently cost feasible but could be added to the plan if additional funding becomes available.
- Tier 5 includes projects that are considered unfunded needs.

## Prioritization Considerations

**Table 22. Funding Status and Priority by Tier**

	<b>Tier 1</b>	<b>Tier 2</b>	<b>Tier 3</b>	<b>Tier 4</b>	<b>Tier 5</b>
	<b>Existing and Committed (E+C) (Before 2025)</b>	<b>Cost Feasible Interim Projects (2025-2035)</b>	<b>Cost Feasible Projects (2036-2045)</b>	<b>Illustrative Projects/ Other Priority Projects</b>	<b>Other Unfunded Needs</b>
Needs Assessment	Yes	Yes	Yes	Yes	Yes
High Priority	Yes	Yes	Yes	Yes	No
Cost Feasible	Yes	Yes	Yes	Should funds become available	No

The projects identified as Cost Feasible were done so in a manner that is consistent with prioritization factors as illustrated in **Figure 8**.

*Figure 8. Prioritization Factors*

## Prioritization Factors

Fatal Flaw	Pipeline Project	Future Congestion	Regional Freight	Connectivity	Economic Development	Public Support	High Crashes
Ommission of a project anticipated to contribute significant adverse impacts to the environment or their community	Priority given to projects that have been partially funded	Projects on corridors anticipated to relieve current or future congestion	Designated freight corridors	Improvements in connectivity between major roadways or activity centers	Projects that enhance and promote economic development in the area	Projects that are identified as high-priority by public support	Projects on corridors that experience higher than average crash rates

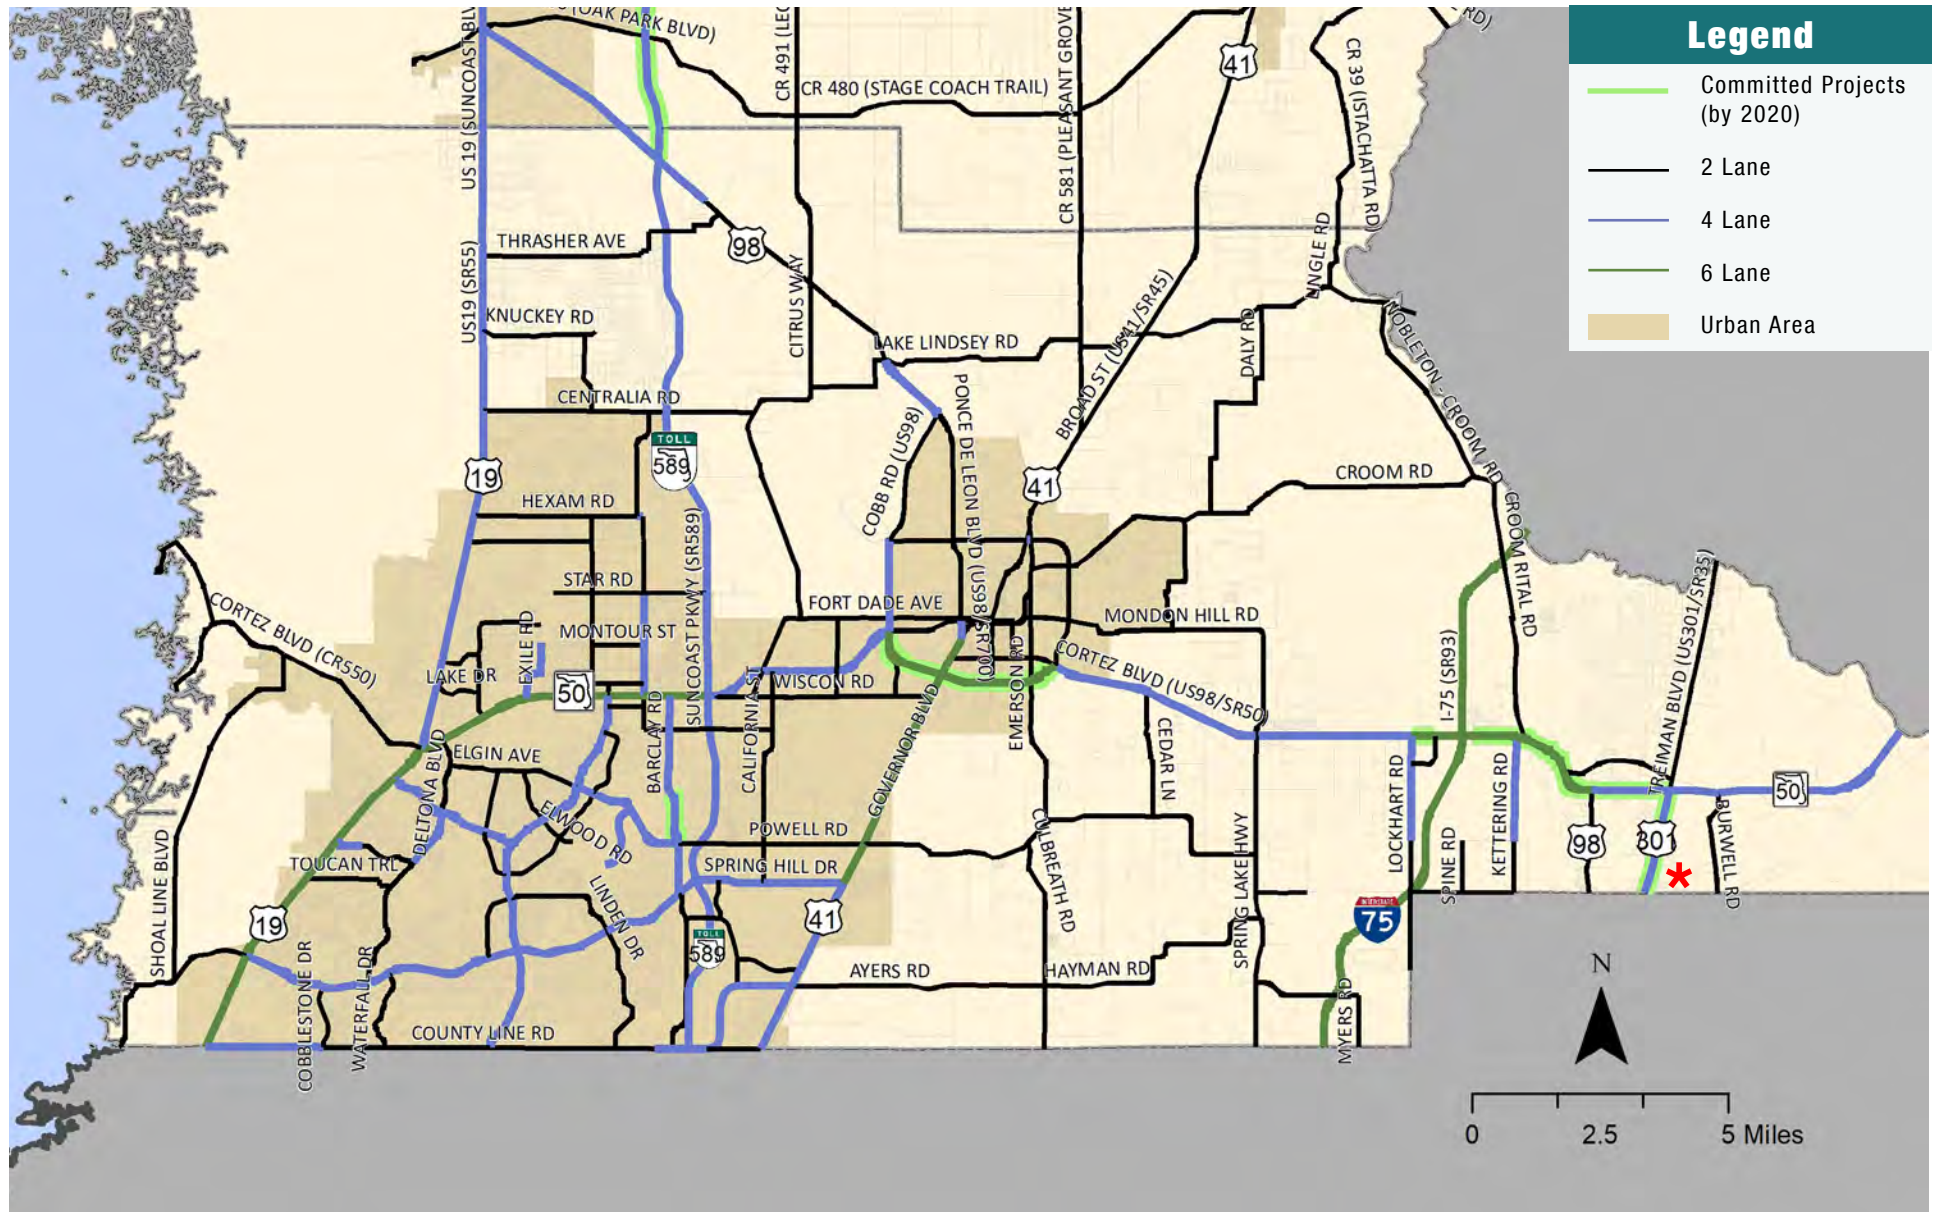

## Cost Feasible Details

Detailed tables of the Cost Feasible projects are included in **Appendix B** and **Appendix C** of this document. **Appendix B** includes the projects in terms of Present Day Value (PDV), while **Appendix C** includes the projects with the Year of Expenditure (YOE) costs.

All 2045 LRTP-identified projects include nearly \$2.295 billion (PDV) of roadway costs. Unfunded Needs account for over half of that total, valuing about \$1.459 billion (PDV). The tables included in **Appendices B and C** ensure the proposed improvements included in the Cost Feasible Plan are identified sufficiently per 23 C.F.R. 450.322(f)(6).

The maps in **Figures 3** through **10** illustrate the projects included in the plan as part of the needs assessment. The maps identify the Existing and Committed (E+C) roadway network in **Figures 3 and 4**, the Cost Feasible Interim Projects in **Figures 5 and 6**, other Cost Feasible Projects in **Figures 7 and 8**, and Unfunded Needs in **Figures 9 and 10**.

## Regional Coordination

### M-CORES

Florida is anticipated to see a 40% increase in population by the year 2045. Most of this growth will be occurring in the central and southern parts of the state, including metro Orlando and the Tampa Bay area. This growth in Tampa Bay will put a significant strain on Florida's transportation network, including I-75, causing people to seek other north-south routes throughout the Gulf Coast counties, which will negatively impact the communities if existing road network if no improvements are made.

Hernando and Citrus Counties are likewise expected to experience significant population growth over the next 25 years, which will drive additional transportation demands.

The Multi-use Corridors of Regional Economic Significance (M-CORES) program is, "...intended to revitalize rural communities, encourage job creation and provide regional connectivity while leveraging technology, enhancing the quality of life and public safety, and protecting the environment and natural resources."

The M-CORES program was initiated by Senate Bill 7068, signed into State Statute in May 2019. The state in conjunction with regional partners will consider the use of multiple modes of transportation, including toll roads, multiuse trails, public transit and both freight and passenger rail.

M-CORES identifies three separate corridors, two of which include Citrus County within the study area. The initial task force meetings for each corridor took place on August 27, 2019. The final reports are expected to be issued no later than October 1, 2020, and as of the adoption of this 2045 LRTP, state legislature designates that construction begin no later than December 31, 2022.

## SUNCOAST CONNECTOR

The study area for the Suncoast Connector extends from Citrus County northward to Jefferson County at the Florida-Georgia border. The Suncoast Connector would potentially connect to the northern terminus of Phase 2 of the Suncoast Parkway 2, at Citrus County CR 486 (see sidebar). This would provide north-south connectivity as an alternative to I-75, allowing enhanced access between the Tampa Bay region and Florida's panhandle. **Figure 17** illustrates the Suncoast Connector Study Area.

## NORTHERN TURNPIKE EXTENSION

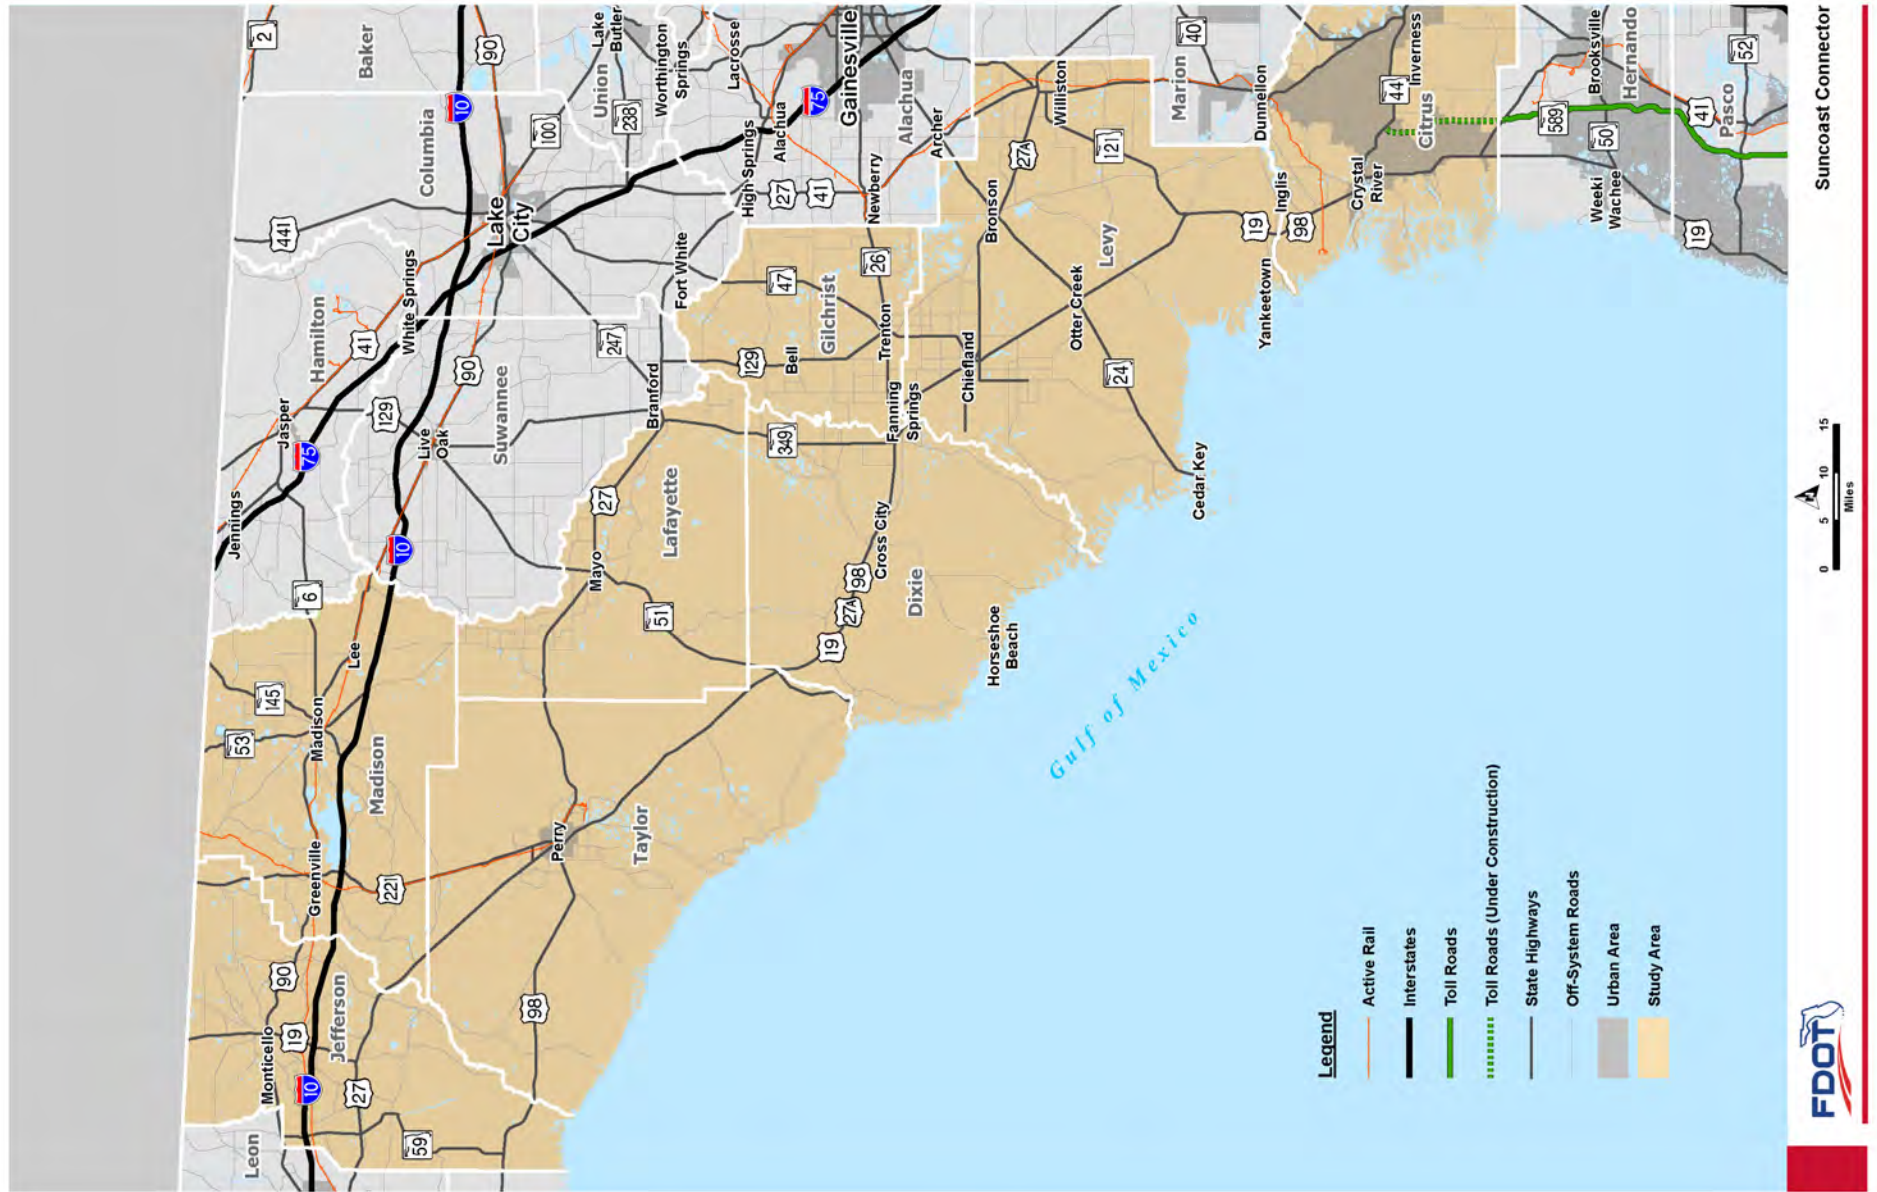

The study area for the Northern Turnpike Connector includes Citrus County in addition to Lake County, Marion County, and Levy County. The Northern Turnpike Connector will provide a direct connection from the Florida's Turnpike to the Suncoast Parkway. **Figure 18** illustrates the Northern Turnpike Connector Study Area.

## SUNCOAST PARKWAY

Current Plans for the Suncoast Parkway show an interchange with Citrus County Road 486 (CR 486 / Norvell Bryant Highway). This project is funded by Florida's Turnpike Enterprise (FTE), and portions of this are under construction as of the time of developing this report. Previous plans included extending the Suncoast Parkway to US-19, north of Crystal River.

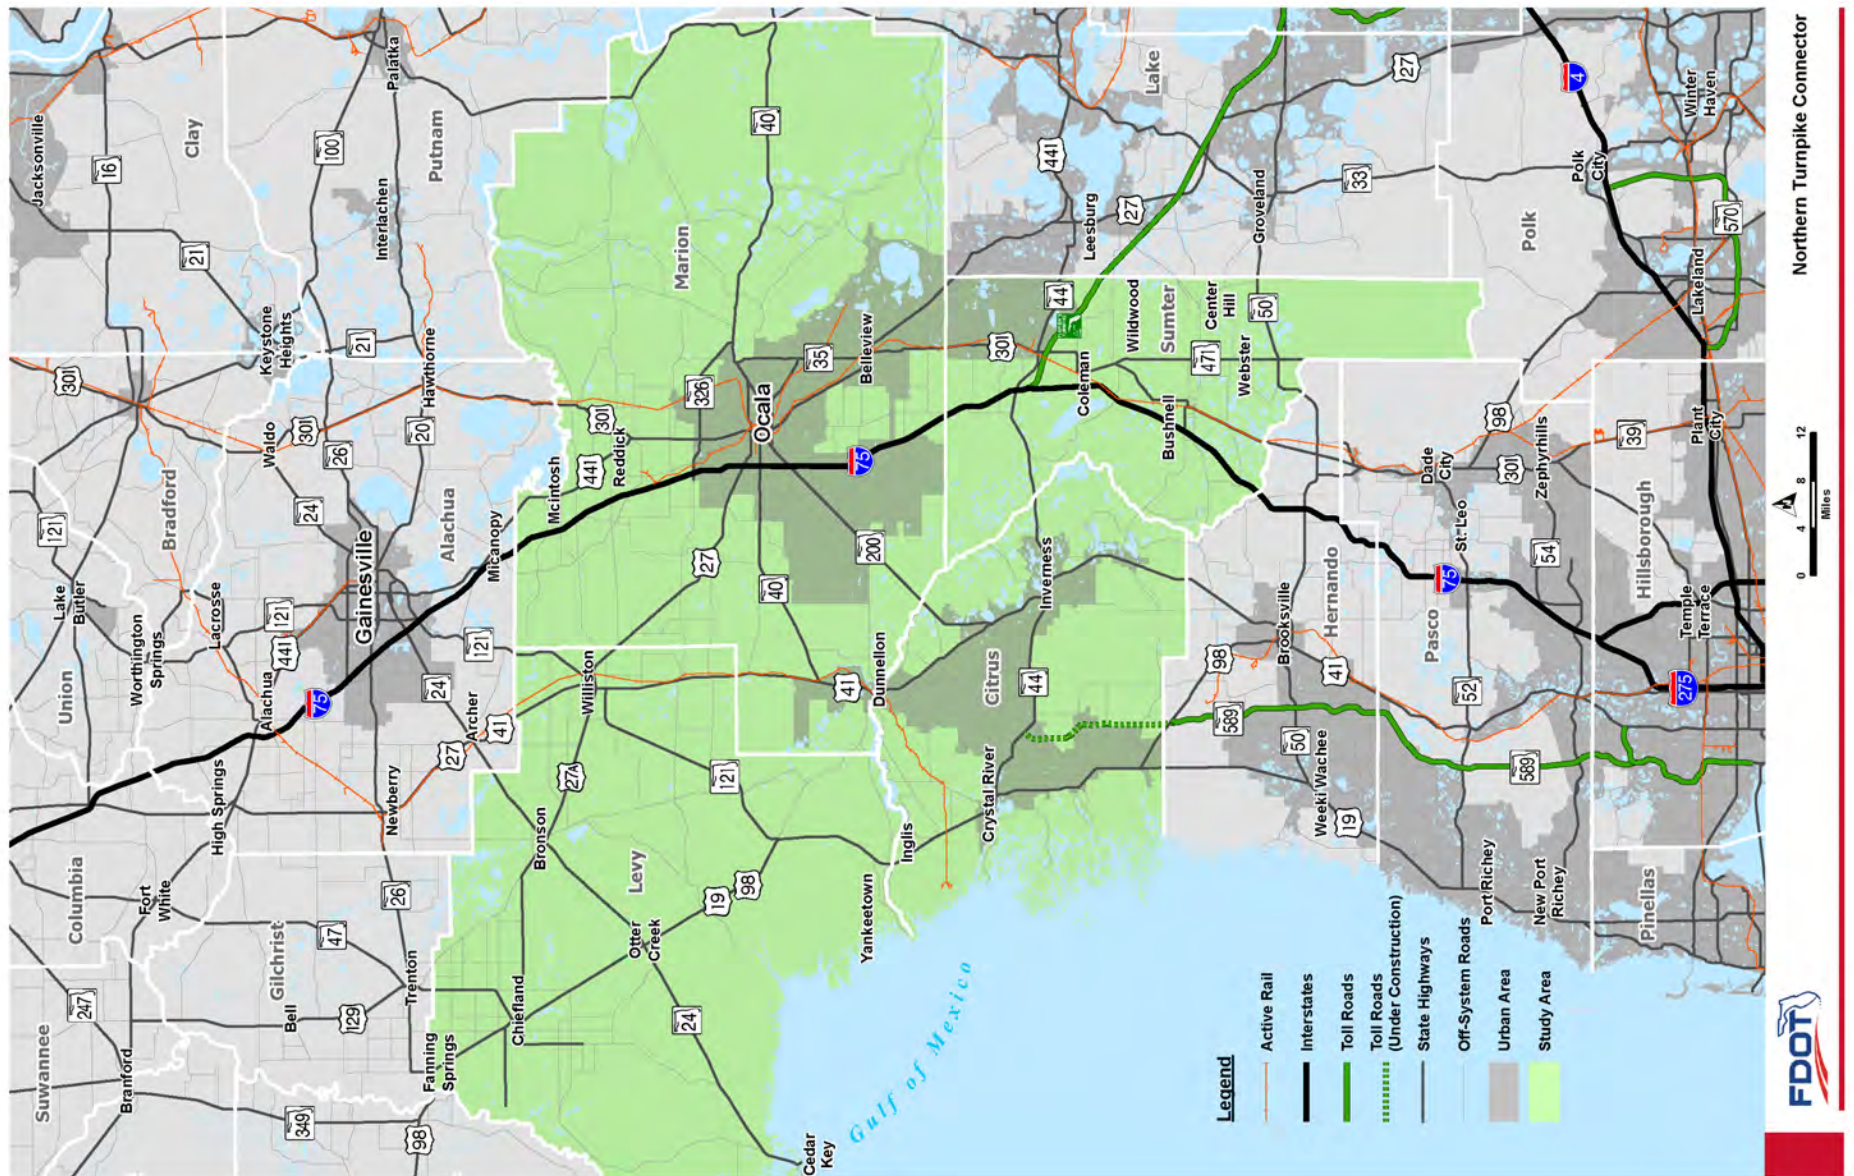

**Figure 17. M-CORES Suncoast Connector Study Area (as of September 2019)**

**Figure 18. Northern Turnpike Connector Study Area (as of September 2019)**

## Congestion Management

In 2017, the Hernando/Citrus MPO adopted and updated their Congestion Management Process (CMP). The CMP is included as **Technical Appendix H**. Maintenance of a CMP is a requirement for all MPOs under Florida law. Both counties have developed and implemented congestion management efforts “to provide the information needed to make informed decisions regarding the proper allocation of transportation resources.”

An effective and robust CMP serves an important part in addressing the region’s transportation needs for a variety of reasons.

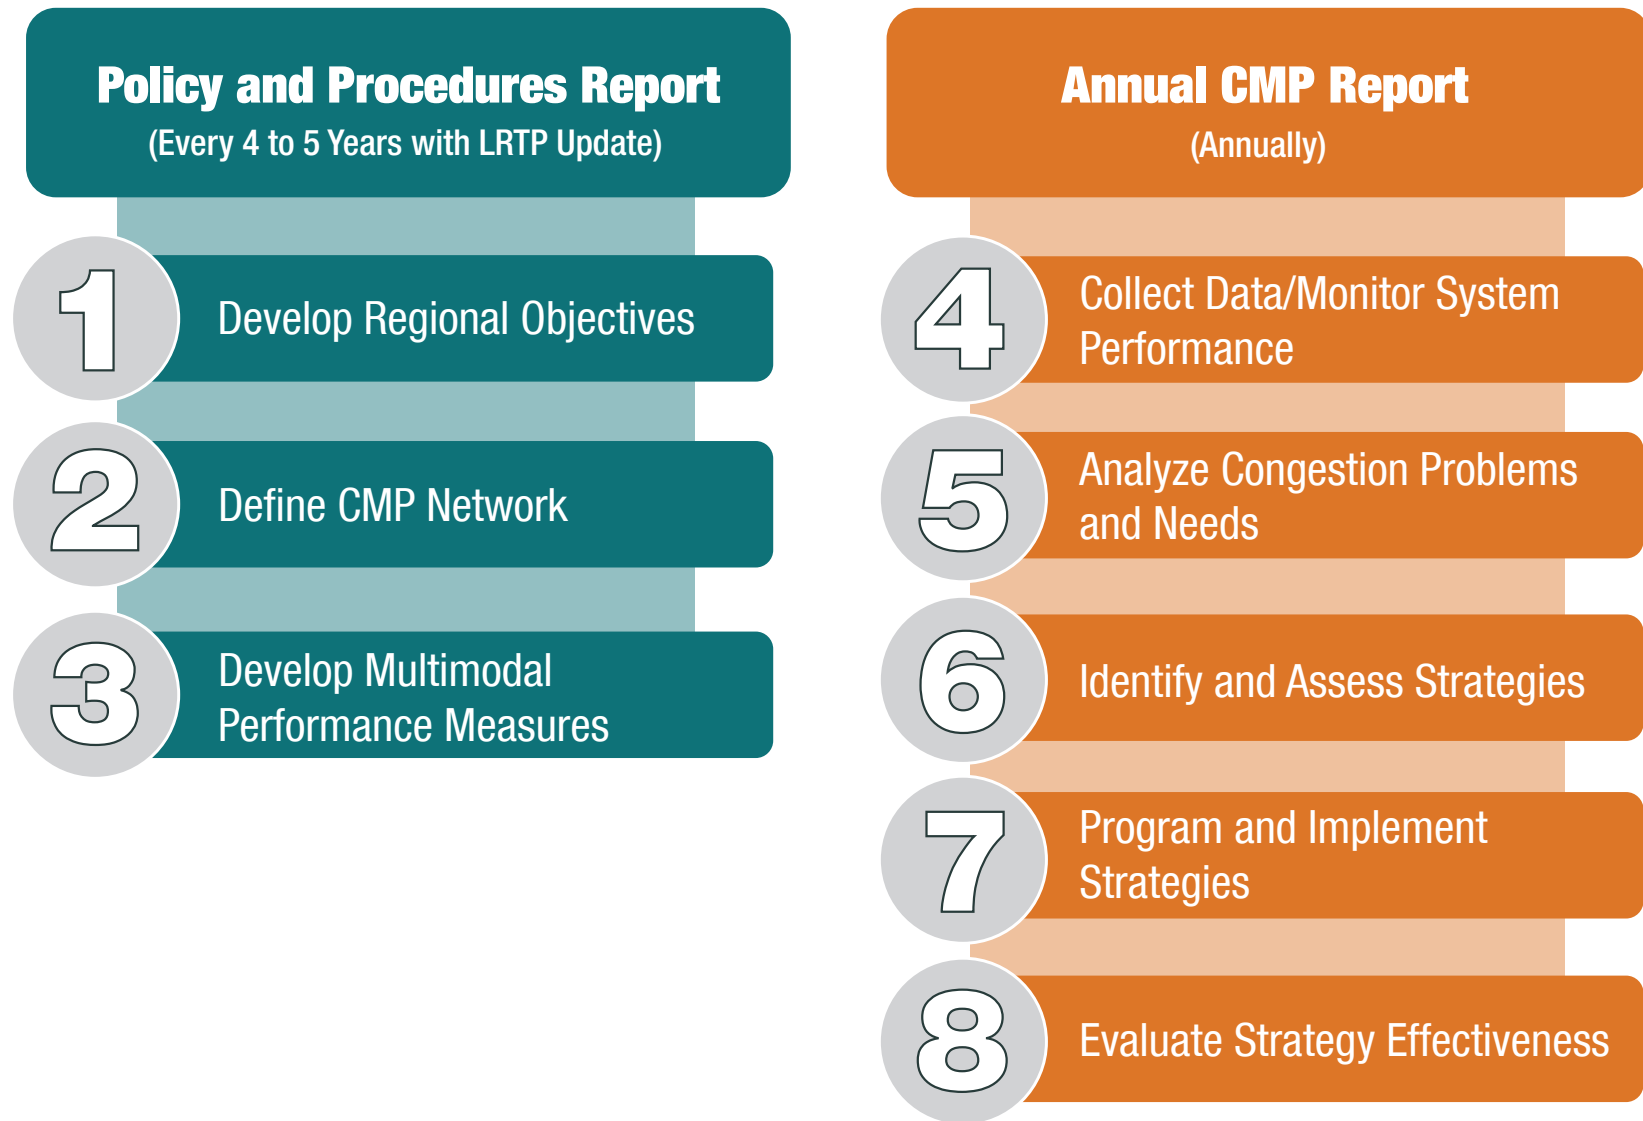

- Many roadway corridors cannot be widened based on maximum number of lanes or environmental constraints.
- Limited funding does not allow many new large-scale projects to be constructed or even planned.
- Congestion management is considered in enhancing overall transportation safety for all road users of all modes.

The CMP has evolved from what was previously known as the Congestion Management System (CMS). Key highlights of the Hernando/Citrus CMP include:

- Routine completion of a technical process undertaken (typically each year) to identify projects needed to reduce congestion and are prioritized for funding in the County’s Capital Improvement element.
- Routine meetings by the MPO’s Technical Advisory Committee (TAC)/Transportation Systems Operations Committee (TSOC).

**Figure 19** shows the Congestion Management process that Hernando/Citrus MPO uses to address the Federal and state requirements and meet the unique needs and opportunities of the communities.

**Figure 19. Hernando/Citrus MPO's Approach to the Federal Eight Step Process**

## Intelligent Transportation Systems (ITS)

Intelligent Transportation Systems (ITS) include communications and technologies that are primarily focused on improving safety and addressing traffic congestion within the transportation system. Many ITS strategies relay information that allow drivers to change plans or behaviors to make smart travel choices. ITS technology can communicate in real-time to travelers about where congestion is occurring and can provide information about alternative routes or modes to reduce the severity and duration of congestion. ITS can also communicate to officials where a crash has occurred, enhancing response to clear the accident, which may expedite the restoration of traffic flow.

The FDOT District 7 established the *FDOT District 7 ITS Architecture*, most recently updated December 31, 2015 as a roadmap for transportation systems integration in the Tampa Bay Region over 20 years. The full update can be found in the **Technical Appendix I**. FDOT and other agencies in the Hernando/Citrus region have developed or are in the process of developing ITS improvements which include but are not limited to the following:

- Electronic toll collection (Suncoast Parkway, Florida's Turnpike Enterprise [FTE], SunPass)
- Freeway management system (I-75, FDOT)
- Fiber optic cables
- Dynamic message signs
- Closed-circuit television monitoring
- Traffic detection stations
- Archived data
- Arterial Traffic Management System (ATMS)
- Incident detection
- Traffic Management Centers (TMC)
- Transit automatic vehicle location (AVL) to aid dispatching and provide bus arrival time information to passengers

The potential for implementing new or extending existing ITS technology to congested corridors will be evaluated as additional corridor studies are completed and prioritized as part of the CMP. Strategies included in the current Hernando/Citrus MPO CMP include the following:

- **Dynamic Messaging:** Dynamic messaging uses changeable message signs to warn motorists of downstream queues; it provides travel time estimates, alternate route information, and information on special events, weather, or accidents.
- **Advanced Traveler Information Systems (ATIS):** ATIS provide an extensive amount of data to travelers, such as real-time speed estimates on the Web or over wireless devices and transit vehicle schedule progress. It also provides information on alternative route options.
- **Integrated Corridor Management (ICM):** This strategy, built on an ITS platform, provides for the coordination of the individual network operations between parallel facilities creating an interconnected system. A coordinated effort between networks along a corridor can effectively manage the total capacity in a way that will result in reduced congestion.
- **Transit Signal Priority (TSP):** This strategy uses technology located onboard transit vehicles or at signalized intersections to temporarily extend green time, allowing the transit vehicle to proceed without stopping at a red light.

**AUTOMATED, CONNECTED, ELECTRIC, AND SHARED-USE (ACES) VEHICLES:** While still in its infancy, ACES technologies will have significant impact on the transportation systems of the future. Personal and public vehicles alike are using increased levels of technology, and combined with shared mobility, are integrating into an existing transportation system that must be supportive of the technology. The FDOT developed guidance for ACES planning in September 2018. This guidance can be found in **Technical Appendix J**. The MPO is using this guidance in planning for congestion management and the evolution of transportation throughout the community and region.

## Public Transportation

Mobility offers community members with access to education, jobs, healthcare, and cultural/environmental resources, and more. Public transportation plays an important role in this relationship, offering the means for people to connect to places. Beyond benefitting those who may choose to ride transit every day, public transportation can increase the quality of life for those who cannot freely travel by other means and gives people access to resources that fulfill basic needs (e.g., jobs, education, grocery stores, healthcare, etc.). Even beyond mobility, public transportation can offer economic benefits—such as ensuring that local and regional businesses have dependable access to the workforce that they require to be successful. This portion of the LRTP highlights the Public Transportation (Transit) elements for Hernando County and Citrus County. A Transit assessment can be found in the **Technical Appendix K**.

### Existing System

Hernando County and Citrus County currently operate separate transit agencies within each county boundary. The following describes the existing system in each county.

#### HERNANDO COUNTY

Hernando County Transit, branded as TheBus, operates fixed route, demand response, and paratransit services. TheBus operates four fixed route services Monday through Friday on 60-minute headways. Americans with Disabilities Act (ADA)-compliant paratransit service is provided to eligible riders with origins and/or destinations within  $\frac{3}{4}$ -mile of a fixed route, with the ADA service transferring the rider to/from the fixed route service. Demand response service is provided throughout Hernando County areas that are more than  $\frac{3}{4}$ -miles from fixed route bus. TheBus currently connects south to Pasco County Public Transportation (PCPT) and does not connect with Citrus County.

The Purple and Green routes have the highest ridership (50,280 and 34,894 rides per year, respectively). The Purple Route serves as a connection from the City of Brooksville into Pasco County. The Green Route connects Pasco-Hernando State College (PHSC) to the City of Brooksville.

#### CITRUS COUNTY

Citrus County Transit (CCT) operates deviated fixed route and paratransit services in Citrus County. The Citrus County Orange Line Bus includes four routes: Beverly Hills Route, Crystal River Route, Homosassa Route, and Inverness Route. CCT also provides demand response paratransit services for transportation disadvantaged citizens of Citrus County.

## Transit Needs Assessment

The list of potential transit projects for the 2045 Cost Feasible Transit Plan was generated by reviewing the findings and recommendations from current and previous plans, including the Transportation Improvement Program (TIP), Hernando-Citrus 2040 LRTP, Hernando County 2020-2029 Transit Development Plan (TDP), and the Citrus County TDP 2019 annual report. Both TDPs can be found in **Technical Appendix L**. A review of transit markets was also completed to confirm or refine the list of potential transit projects in the two-county area.

## 2045 Transit Revenue Forecast

A detailed discussion of reasonably anticipated transit revenues is available in the **Technical Appendix H**. The reasonably anticipated revenues for the 2045 LRTP total approximately \$95.1 million for Hernando County and \$129.0 million for Citrus County. The transit operators developed with the MPO and FDOT the estimates below in **Tables 29** and **30**.

**Table 29. Hernando County Transit Revenues**

Revenue	5-Year Period (Fiscal Years)				Total 2019-2045
	2020-2025	2026-2030	2031-2035	2036-2045	
Federal Operating	\$5,201,000	\$5,630,000	\$6,034,000	\$13,282,000	\$26,023,000
FDOT State Block Grant	\$4,335,000	\$5,274,000	\$6,261,000	\$15,484,000	\$27,955,000
Local Funds	\$2,704,000	\$3,505,000	\$4,316,000	\$11,063,000	\$19,488,000
Farebox Revenues	\$891,000	\$1,062,000	\$1,233,000	\$2,977,000	\$5,464,000
<b>Other</b>					
Total Operating Funds	\$13,131,000	\$15,471,000	\$17,844,000	\$42,806,000	\$78,930,000
Total Federal for Capital	\$2,696,000	\$3,865,000	\$3,865,000	\$7,730,000	\$16,233,000
<b>Total County</b>	<b>\$8,894,017</b>	<b>\$41,576,000</b>	<b>\$38,405,239</b>	<b>\$65,117,805</b>	<b>\$153,993,060</b>

**Table 30. Citrus County Transit Revenues**

Revenue	5-Year Period (Fiscal Years)				Total 2019-2045
	2020-2025	2026-2030	2031-2035	2036-2045	
Federal Operating	\$5,201,000	\$5,630,000	\$6,034,000	\$13,282,000	\$26,023,000
FDOT State Block Grant	\$4,335,000	\$5,274,000	\$6,261,000	\$15,484,000	\$27,955,000
Local Funds	\$2,704,000	\$3,505,000	\$4,316,000	\$11,063,000	\$19,488,000
Farebox Revenues	\$891,000	\$1,062,000	\$1,233,000	\$2,977,000	\$5,464,000
<b>Other</b>					
Total Operating Funds	\$13,131,000	\$15,471,000	\$17,844,000	\$42,806,000	\$78,930,000
Total Federal for Capital	\$2,696,000	\$3,865,000	\$3,865,000	\$7,730,000	\$16,233,000
<b>Total County</b>	<b>\$8,894,017</b>	<b>\$41,576,000</b>	<b>\$38,405,239</b>	<b>\$65,117,805</b>	<b>\$153,993,060</b>

### 2045 Cost Feasible Transit Plan

The 2045 Cost Feasible Transit Plan maintains existing service and fleets for both counties. The plan was developed using the transit needs assessment, year-of-expenditure transit project costs and revenues, and input from the public, MPO Committees, and MPO board.

### TIMEFRAME 1 (TIP, 2019/2020-2024/2025)

#### **Hernando County**

As of October 1, 2019, Hernando County has been operating TheBus service with later hours and on Saturday to improve overall transit service. The TIP includes a vehicle replacement and acquisition program to support existing and expanded service, including the East Hernando Connector Express Service.

#### **Citrus County**

Citrus County maintains its existing transit service and fleets in the TIP.

## TIMEFRAME 2 (2026-2030)

### *Hernando County*

Hernando County includes investment in three shared park-and-ride facilities, a major transfer facility, as well as a vehicle replacement and acquisition program to support existing service in Timeframe 1. The park-and-ride facilities and transfer facilities are not shown in the map.

### *Citrus County*

Citrus County maintains existing transit service and fleets in this timeframe.

## TIMEFRAME 3 (2031-2035)

### *Hernando County*

Hernando County maintains services, fleets, and facilities established or maintained in Timeframe 1.

### *Citrus County*

Citrus County maintains its existing transit service and fleets in this timeframe.

## TIMEFRAME 4 (2036-2045)

### *Hernando County*

Hernando County maintains services, fleets, and facilities established or maintained in Timeframe 1.

### *Citrus County*

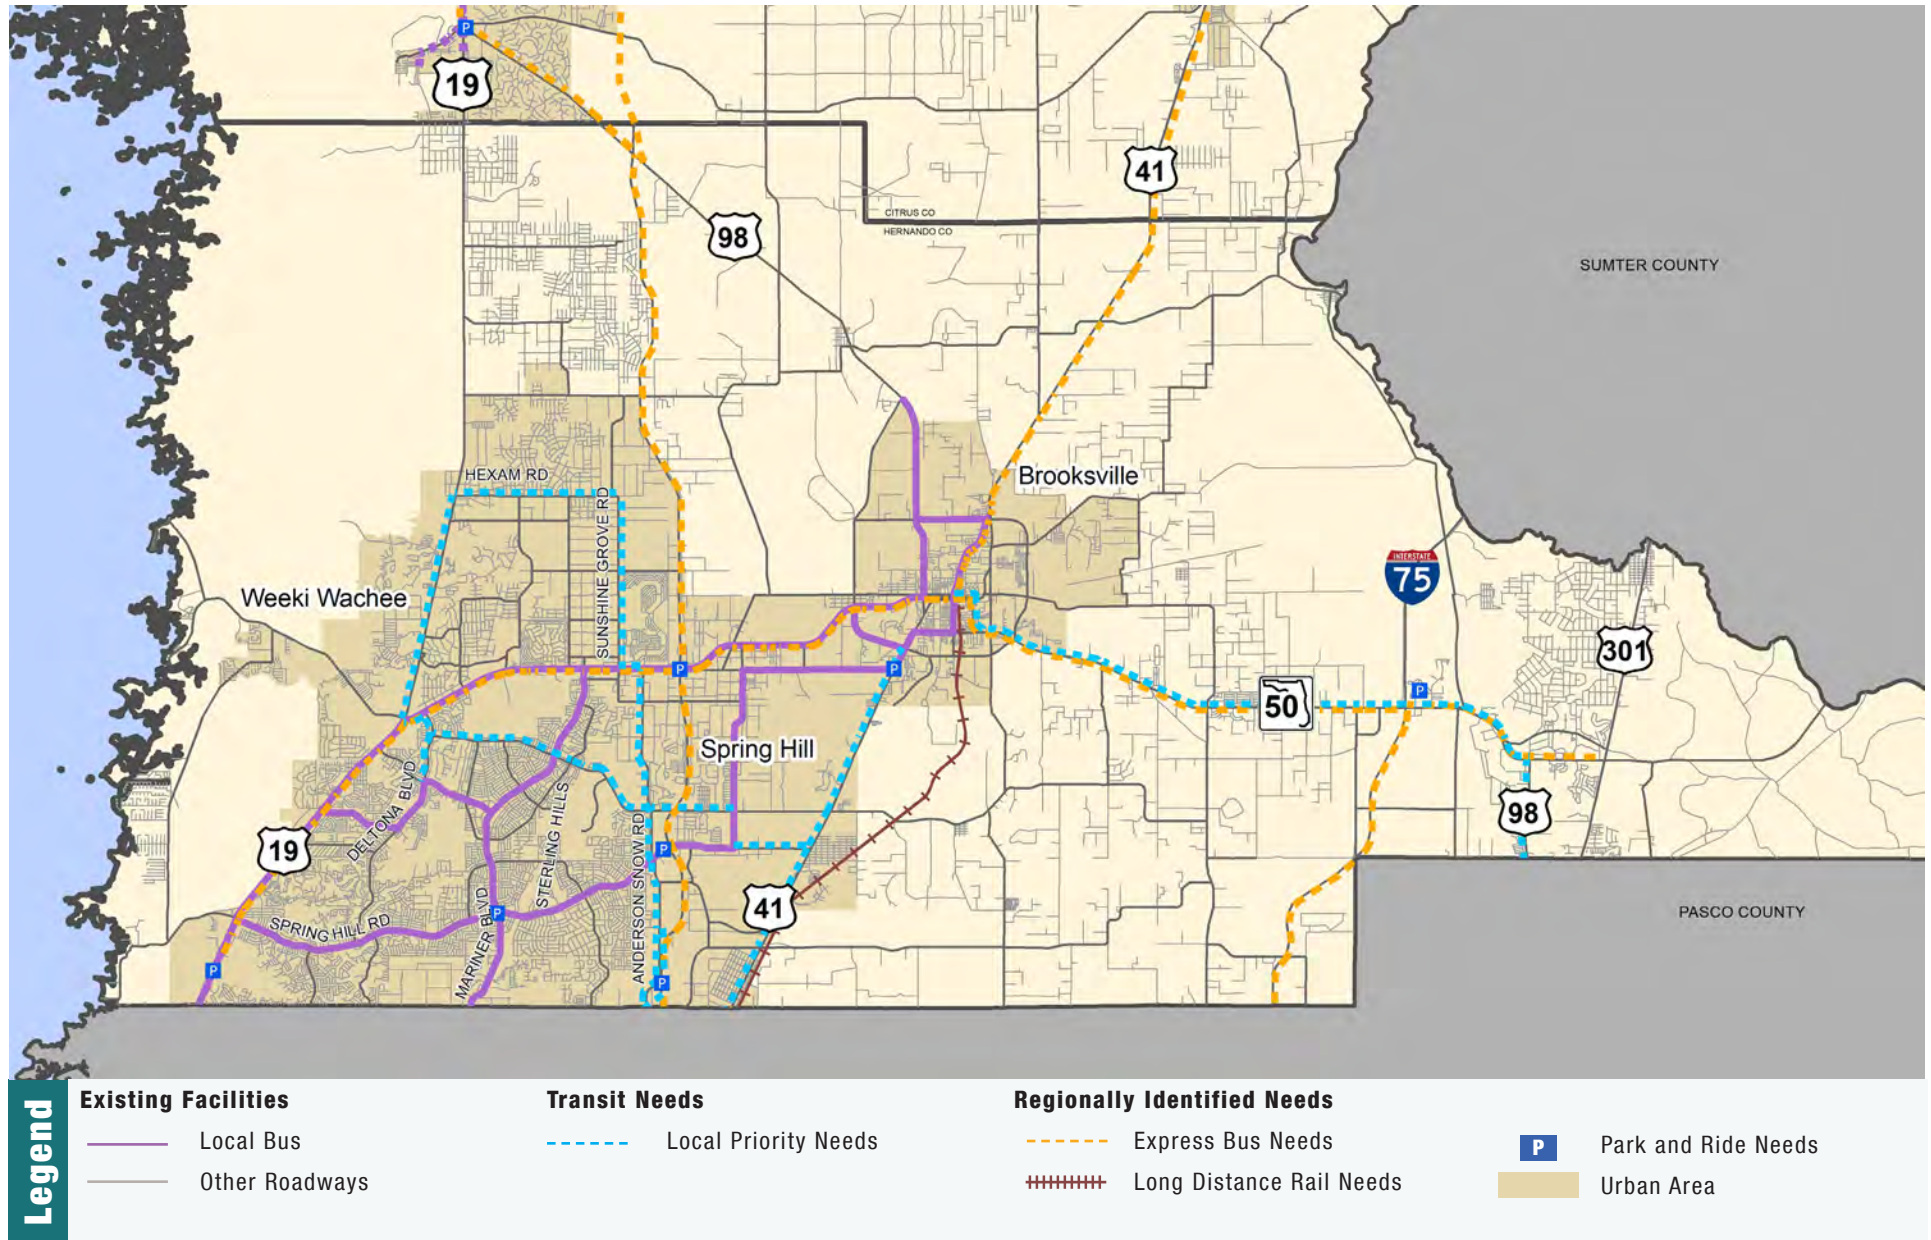

Citrus County maintains its existing transit service and fleets in this timeframe.

## ASPIRATIONAL

Where transit needs could not be met due to financial constraints, the projects were included in the Aspirational transit project list for Hernando and Citrus Counties.

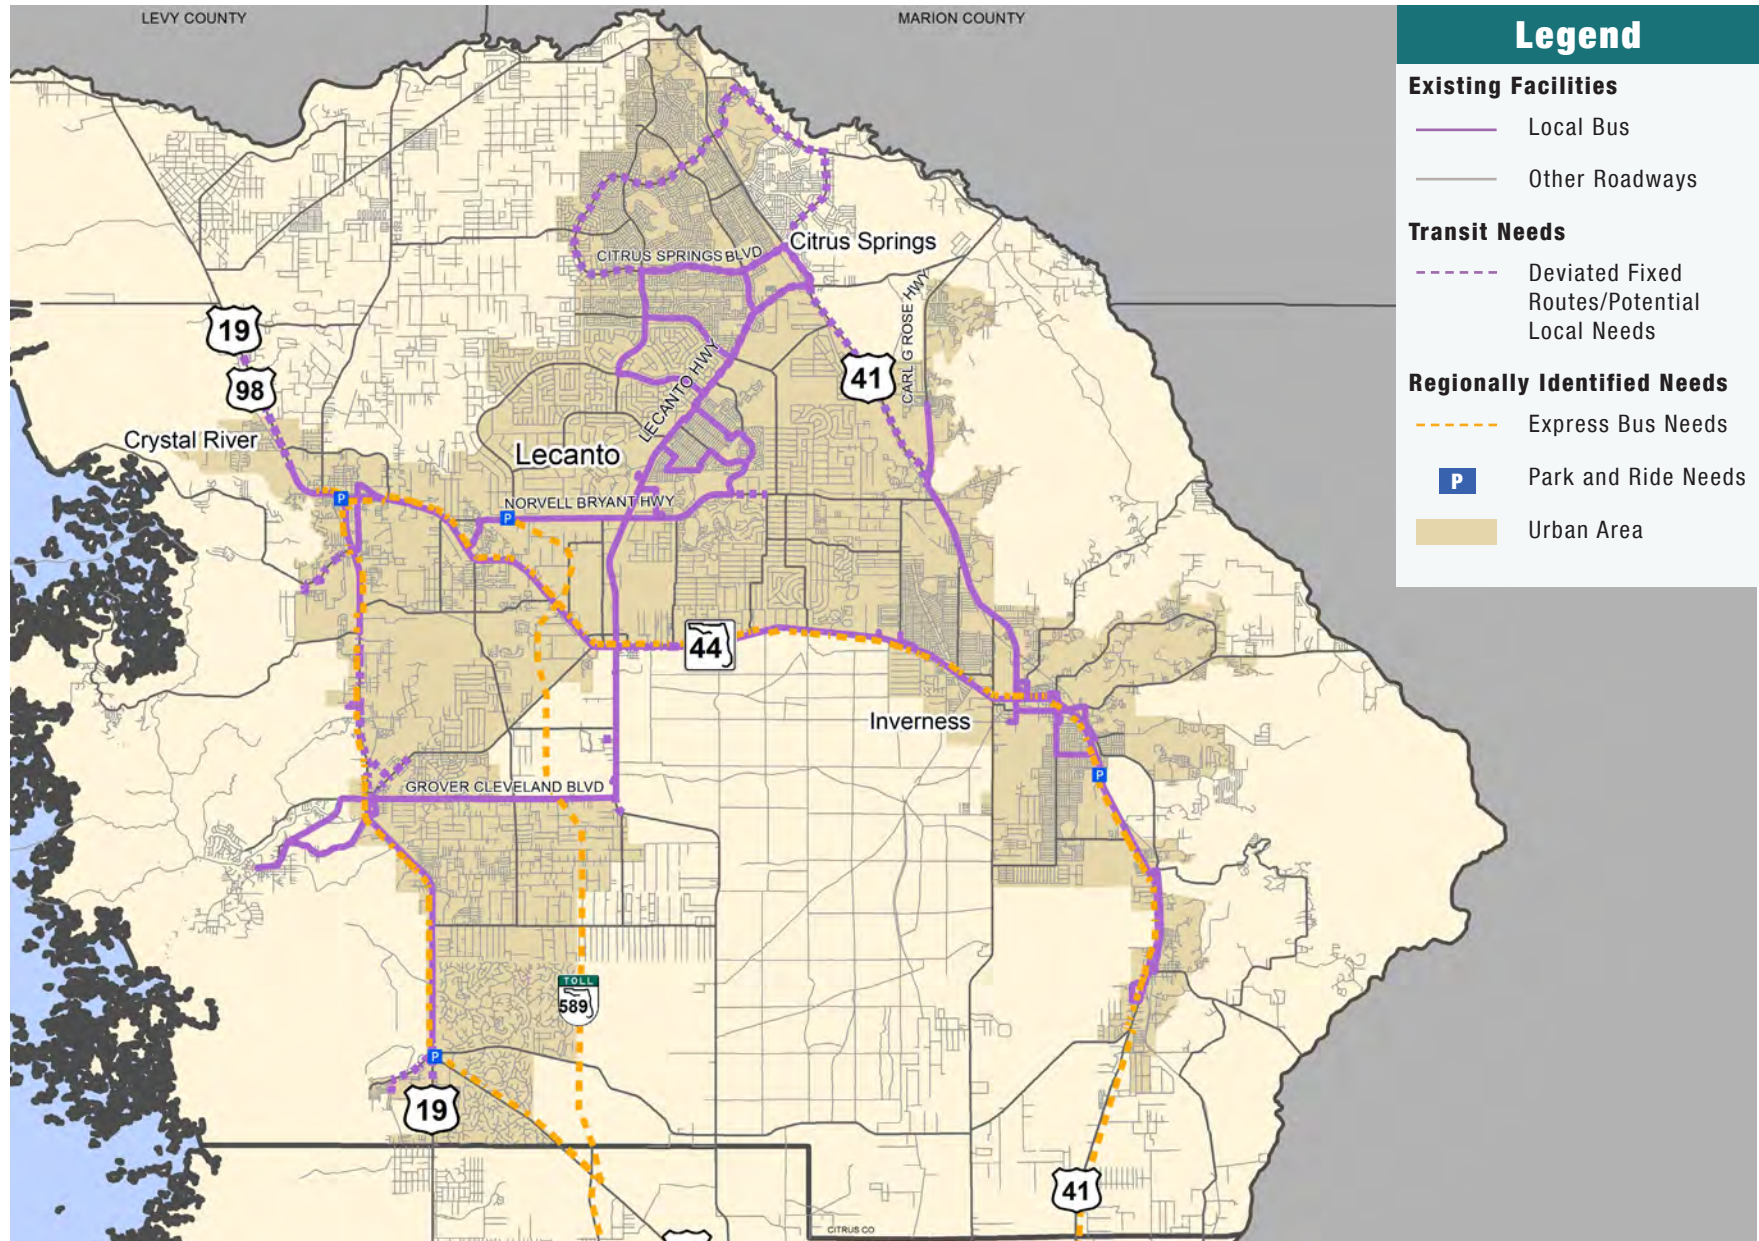

**Figure 20** shows the Transit Needs for Hernando County, and **Figure 21** shows the Transit Needs for Citrus County.

**Figure 20. Transit Needs (Hernando County)**

**Figure 21. Transit Needs (Citrus County)**

## Bicycle and Pedestrian Plan

Hernando/Citrus MPO and the community it serves realizes the importance of bicycle and pedestrian facilities, and an extensive program of trails exists in the area. While some of the larger cities and more established areas have good sidewalk networks, many other areas throughout Hernando County and Citrus County lack sufficient pedestrian facilities on one or both sides of major roads. A priority of the MPO is to fill in gaps in both the sidewalk system and the bicycle facility system. For pedestrians, it is important to create more continuous facilities with crosswalks and pedestrian signals. For bicyclists, improvements would include designated bicycle lanes, multiuse trails (MUTs), and paved shoulders.

The plan likewise reinforces the mutually supportive relationship that exists between transit and non-motorized modes. All travelers are pedestrians at some points in time. Many transit trips begin and end with a pedestrian or bicycle trip. Improvements to transit and other urban corridors are a priority of the plan. This can include improved connections between nonmotorized facilities and other modes such as transit stops and park-and-ride lots, as well as supportive land uses and buildings. Finally, the benefits of enhancing non-motorized facilities will not be fully realized unless they are accompanied by educational and enforcement programs to reinforce bicycle and pedestrian safety.

In the Hernando/Citrus MPO Bikeways and Trails Master Plan (**Technical Appendix M**), the MPO identifies specific policies to enhance safety by implementing specific programs such as those in **Table 31**. These programs can identify the key actions needed to improve pedestrian and bicycle safety including leveraging and strengthen the role of the MPO's safety partners and facility users.

**Table 31. Examples of Easily-Implementable Safety Programs**

Type	Program
Education	<ul style="list-style-type: none"><li>• Walking and Biking Education (K–12)</li><li>• Walk/Bike Smart</li><li>• Bicycle Rodeos</li><li>• Motorist Education/Outreach</li></ul>

Evaluation/Planning	<ul style="list-style-type: none"><li>• Bike Counts</li><li>• Miles Planned/Constructed</li></ul>

#### Hernando/Citrus MPO Bikeways and Trails Master Plan

In June 2018, the Hernando/Citrus MPO adopted the inaugural Bikeways and Trails Master Plan (BTMP), which offers a comprehensive evaluation and future assessment of the bicycle and pedestrian needs for Hernando/Citrus MPO. The goals of the BTMP fit within those of the LRTP as are described below:

- **Safety** – Increase safety for people who walk and bicycle in Hernando and Citrus counties.
- **Connectivity** – Create a network of efficient, convenient bicycle and pedestrian facilities in Hernando and Citrus counties.
- **Equity/Livability** – Increase transportation choice and community livability through the development of an integrated multimodal system.
- **Health** – Encourage health and fitness by providing a safe, convenient network of facilities for walking and biking.
- **Economic Development** – Promote tourism and economic opportunities by developing a safe, connected network of biking and walking facilities.

The outcome of the BTMP identifies short-term projects in addition to a long-term vision that includes larger scale bicycle and pedestrian considerations, including those on future roadways.

**Figures 22 and 23** represent the existing and committed Bikeways and Trails facilities in Hernando and Citrus Counties. The long-term vision for future facilities is illustrated in **Figures 24 and 25**.

**In short, the Hernando/Citrus MPO Bikeways and Trails Master Plan**

*... is meant to be a blueprint that provides guidance about facility improvements and policy recommendations aimed at accommodating bicycle and pedestrian modes of transportation, improving safety conditions, and ensuring coordination among jurisdictions, departments, and agencies. The plan acknowledges the work done by individual communities and seeks to enhance it.*

The Hernando/Citrus MPO Bicycle and Pedestrian List of Priority Projects (LOPP) contain projects that are considered of highest priority for improvement by the MPO and its advisory committees.

**Table 32** shows the bicycle and pedestrian LOPP for the Hernando/Citrus MPO.

**Table 32. Bicycle and Pedestrian List of Priority Projects for the Hernando/Citrus MPO**

## Funding for Pedestrian, Bicycle, and Trails Projects

As stated in the Financial Resources section of this chapter, FDOT has provided estimates of funds for Transportation Alternatives to assist MPOs and TPOs in developing their plans. This Transportation Alternatives fund is to be used to implement pedestrian and bicycle improvements. “TALL” funds are Transportation Alternative Program funds designated for areas with populations less than 200,000, and “TALT” funds are Transportation Alternative Program funds provided for areas of any size. Both TALL and TALT funds are provided by each individual FDOT district. The portion available to the Hernando/Citrus MPO is estimated based on the percentage of total District 7 population. Transportation Alternatives funds are projected as listed in **Table 33** in Year of Expenditure.

**Table 33. Hernando/Citrus MPO 2045 Transportation Alternatives Forecast (Year of Expenditure)**

Revenue	2021-2025	2026-2030	2031-2035	2036-2045	Total
Hernando TALL	\$ 220,090	\$ 1,023,416	\$ 1,023,416	\$ 2,041,331	\$ 4,308,253
Hernando TALT	\$ 220,090	\$ 1,045,425	\$ 1,045,425	\$ 2,090,851	\$ 4,401,791
Citrus TALL	\$ 179,910	\$ 836,584	\$ 836,584	\$ 1,668,669	\$ 3,521,747
Citrus TALT	\$ 179,910	\$ 854,575	\$ 854,575	\$ 1,709,149	\$ 3,598,209
<b>TOTAL Hernando/Citrus MPO</b>	<b>\$ 800,001</b>	<b>\$ 3,759,999</b>	<b>\$ 3,759,999</b>	<b>\$ 7,510,001</b>	<b>\$ 15,830,000</b>

## Bicycle and Pedestrian Safety

---

According to reports produced by the non-profit organization, Smart Growth America (SGA), the state of Florida is regularly ranked as one of the most dangerous states for both pedestrians and bicyclists. In SGA's 2019 Dangerous by Design, the two metropolitan areas nearest Hernando County and Citrus County, the Tampa Bay and Orlando areas rank in the top ten most dangerous U.S. metropolitan areas for pedestrians. As the region grows, and more people engage in active transportation, there is much need for improvement in roadway safety for pedestrian, bicyclists, and motorists as well as improved overall accessibility in Hernando County and Citrus County for non-motorized transportation. The Hernando/Citrus MPO Bikeways and Trails Master Plan (BTMP) recommends actions that can work to enhance the pedestrian infrastructure, bicycling infrastructure, educate the public on pedestrian and bicycle safety issues and encourage modified behavior accordingly.

## Transportation Safety

As the Hernando/Citrus MPO continues its planning processes, it is vital that the safety and security of its transportation system is of high priority for all users. The MAP-21 and FAST Act Federal surface transportation acts have established safety and security of the transportation system as crucial in the planning and decision making processes. Safety is supported in the general LRTP process by the Federal Planning Factors, as a goal in the Florida Transportation Plan, and in the Goals and Objectives of the Hernando/Citrus MPO 2045 LRTP.

In addition to the elements listed above, the Hernando/Citrus MPO considered the Federal Transit Administration (FTA) Public Transportation Agency Safety Plan (PTASP), the Florida Transportation Plan (FTP), the FDOT State Strategic Highway Safety Plans (SHSP) during this LRTP process.

In July 2018, the PTASP established a “Final Rule” that requires agencies that receive Federal funds to develop safety plans that include the processes and procedures to implement Safety Management Systems (SMS). Hernando County’s TheBus received Section 5307 and/or 5340 funds and will be required to implement such a safety plan by July 2020.

The FDOT SHSP is included in **Technical Appendix N**. To ensure consistency with the SHSP the Hernando/Citrus MPO will support efforts such as the following:

- Continued involvement and support for the Community Traffic Safety Team (CTST) and/or the Safe Routes to Schools (SRTS) Team to address infrastructure or behavior safety
- Infrastructure examples: Installation of school flashing signals, roadway lighting, traffic calming, traffic signals
- Behavioral safety examples: SRTS education/enforcement activities, pedestrian/bicycle safety education

Safety activities will generally be supported and coordinated by both the MPO and by local and state agencies, stakeholders, and other partners for effective implementation. The Congestion Management Process Policies and Procedures Handbook published by the Hernando/Citrus MPO in January 2017 lists several Safety Emphasis Areas and potential strategies for addressing each. **Table 34** lists Key Safety Emphasis Areas and strategies, and **Table 35** lists Other Safety Emphasis Areas and related management strategies.

**Table 34. Key Safety Emphasis Areas for CMP Integration**

Intersection Crashes	Vulnerable Road Users/ Bike and Pedestrians	Vulnerable Road Users/Motorcycles	Lane-Departure Crashes	Traffic Records
Crashes which occur at or within 250 feet of signalized and unsignalized intersections are defined as intersection related.	This emphasis area includes bicycle and pedestrian crashes which represent a disproportionate share of fatal crashes.	The emphasis area addresses crashes involving motorcyclists.	These crashes include running off the road, crossing the center median into an oncoming lane of traffic, and sideswipe crashes. Running off the road may also involve a rollover or hitting a fixed object. Head-on collisions are related to crashes involving departure from the roadway. One of the most severe types of crashes occurs when a vehicle crosses into an opposing traffic lane and crashes head on with an oncoming vehicle.	This addresses Federal requirements and funding for traffic records. This emphasis area was meant to ensure traffic records aligned with the overall SHSP where possible and appropriate.
Potential Strategies				
<ul style="list-style-type: none"> <li>• Increase safety of intersections for all users</li> <li>• Identify systemic intersection safety improvements, update the Intersection Safety Plan, and encourage implementation at the local level</li> <li>• Promote improved access management at the State and local level</li> <li>• Consider including safety in the planning/ value engineering manual</li> <li>• Update policies, guidelines, handbooks, and training based on the Highway Safety Manual (HSM)</li> <li>• Increase education programs designed to provide targeted information to drivers</li> <li>• Increase targeted enforcement activities at high-crash locations and increase public education on intersection safety</li> </ul>	<ul style="list-style-type: none"> <li>• Increase awareness and understanding of safety issues related to Vulnerable Road Users</li> <li>• Increase compliance with traffic laws and regulations related to pedestrian and bicycle safety through education and enforcement</li> <li>• Develop and use a systemic approach to identify locations and behaviors prone to pedestrian and bicycle crashes and implement multidisciplinary countermeasures</li> <li>• Encourage adequate funding levels for effective pedestrian and bicycle safety programs and initiatives</li> <li>• Promote, plan, and implement built environments (urban, suburban, and rural) which encourage safe bicycling and walking</li> <li>• Support national, state, and local legislative initiatives and policies that promote bicycle and pedestrian safety</li> </ul>	<ul style="list-style-type: none"> <li>• Collect and analyze data on motorcycle crashes, injuries, and fatalities and provide local and state agencies with the best available data to make appropriate and timely decisions that improve motorcycle safety in Florida</li> <li>• Manage motorcycle safety activities in Florida as part of a comprehensive plan that includes centralized program planning, implementation, coordination, and evaluation to maximize the effectiveness of programs and reduce duplication of effort</li> <li>• Promote personal protective gear and its value in reducing motorcyclist injury levels and increasing rider conspicuity</li> <li>• Ensure persons operating a motorcycle on public roadways hold an endorsement specifically authorizing motorcycle operation</li> <li>• Promote adequate rider training and preparation to new and experienced motorcycle riders by qualified instructors at state-approved training centers</li> <li>• Reduce the number of alcohol-, drug-, and speed-related motorcycle crashes in Florida</li> <li>• Support legislative initiatives that promote motorcycle-related traffic laws and regulations</li> <li>• Ensure state and local motorcycle safety programs include law enforcement and emergency services components</li> <li>• Incorporate motorcycle-friendly policies and practices into roadway design, traffic control, construction, operation, and maintenance</li> <li>• Increase the visibility of motorcyclists by emphasizing rider conspicuity and motorist awareness of motorcycles</li> <li>• Develop and implement communications strategies that target high-risk populations and improve public awareness of motorcycle crash problems and programs</li> </ul>	<ul style="list-style-type: none"> <li>• Improve engineering practices to reduce lane-departure crashes</li> <li>• Improve law enforcement practices to better capture data related to lane-departure crashes</li> <li>• Increase public education to reduce lane-departure crashes</li> <li>• Partner with emergency responders to reduce severity of lane-departure crashes</li> </ul>	<ul style="list-style-type: none"> <li>• Provide ongoing coordination in support of multi-agency initiatives and projects that improve traffic records information systems</li> </ul>

**Table 35. Other Safety Emphasis Areas for CMP Integration**

Aggressive Driving	Impaired Driving	At-Risk Drivers/Aging Road Users	At-Risk Drivers/Teen Drivers	Distracted Driving
Aggressive driving, as defined by State Statute, requires inclusion of at least two of the following contributing causes: speeding, unsafe or improper lane change, following too closely, failure to yield right-of-way, improper passing, and failure to obey traffic control devices.	Originally focused on alcohol impaired driving only, the state has expanded the focus to include drug impaired driving due to its prevalence and close association to alcohol impairment.	At-risk drivers, comprised of aging road users, is a new emphasis area for 2012. For data purposes in this emphasis area, aging road users are defined as 65-year-olds and older.	At-risk drivers, comprised of teen drivers, is a new emphasis area for 2012. For data purposes in this emphasis area, teen drivers are 15- to 19-year-olds.	Distracted driving occurs when a driver allows any mental or physical activity to take the driver's focus off the task of driving. There are three main types of distraction: manual – taking your hands off the wheel; visual – taking your eyes off the road; and cognitive – taking your mind off driving.
Potential Strategies				
<ul style="list-style-type: none"> <li>• Support and promote effective law enforcement efforts to reduce aggressive driving</li> <li>• Increase training and education on the problem of aggressive driving</li> <li>• Identify initiatives within engineering to reduce instances of aggressive driving</li> </ul>	<ul style="list-style-type: none"> <li>• Improve DUI enforcement</li> <li>• Improve prosecution and adjudication of impaired driving cases</li> <li>• Improve the DUI administrative suspension process</li> <li>• Improve prevention, public education, and training</li> <li>• Improve the treatment system (i.e., DUI programs, treatment providers, and healthcare providers)</li> <li>• Improve data collection and analysis</li> <li>• Enhance impaired driving legislation</li> <li>• Autonomous vehicles</li> <li>• Ride share programs</li> </ul>	<ul style="list-style-type: none"> <li>• Manage and evaluate aging road user safety, access, and mobility activities to maximize the effectiveness of programs and resources</li> <li>• Provide the best available data to assist with decisions that improve aging road user safety, access, and mobility;</li> <li>• Provide information and resources regarding aging road user safety, access, and mobility</li> <li>• Inform public officials about the importance of and need to support national, state, regional, and local policy and program initiatives which promote and sustain aging road user safety, access, and mobility</li> <li>• Promote and encourage practices that support and enhance aging in place (i.e., improve the environment to better accommodate the safety, access, and mobility of aging road users)</li> <li>• Enhance aging road user safety and mobility through assessment, remediation, and rehabilitation</li> <li>• Promote safe driving and mobility for aging road users through licensing and enforcement</li> <li>• Promote the safe mobility of aging vulnerable road users (pedestrians, transit riders, bicyclists, and other non-motorized vehicles)</li> <li>• Promote the value of prevention strategies and early recognition of at-risk drivers to aging road users and stakeholders</li> <li>• Bridge the gap between driving retirement and mobility independence (i.e., alternative transportation mobility options, public transportation, and dementia-friendly transportation)</li> </ul>	<ul style="list-style-type: none"> <li>• Expand the network of concerned individuals to build recognition and awareness as it relates to teen driver safety and supports the Florida Teen Safe Driving Coalition</li> <li>• Create a safe driving culture for teen drivers through outreach and education</li> <li>• Support initiatives that enhance safe teen driving-related traffic laws and regulations</li> </ul>	<ul style="list-style-type: none"> <li>• Increase public awareness and outreach programs on distracted driving</li> <li>• Encourage companies, state agencies, and local governments to adopt and enforce policies to reduce distracted driving in company and government vehicles</li> <li>• Support legislative initiatives that enhance distracted driving-related traffic laws and regulations</li> <li>• Support Graduated Driver's License (GDL) restrictions to reduce distracted driving behaviors in teen drivers</li> <li>• Increase law enforcement officer understanding of Florida traffic crash report distracted driving data collection</li> <li>• Educate law enforcement, judges, and magistrates on the existing laws that can be applied to distracted driving (careless driving)</li> <li>• Deploy high-visibility enforcement mobilizations on distracted driving subject to appropriate/future legislation</li> <li>• Develop and maintain complete, accurate, uniform, and timely traffic records data</li> <li>• Provide the ability to link traffic records data</li> <li>• Facilitate access to traffic records data</li> <li>• Promote the use of traffic records data</li> </ul>

## Vision Zero

*Vision Zero* is a multi-dimensional effort to eliminate all traffic fatalities and severe injuries while increasing safe, healthy, and equitable mobility for all. First implemented in Sweden in the 1990s, Vision Zero is increasingly being adopted by cities across the United States. It takes a traditional approach to safety and reconsiders some of the most basic assumptions made over the past decades to reduce the number of deaths on American roadways. The FDOT initially established a Vision Zero policy in 2012, and the 2016 update of the SHSP supports the policy.

The MPO acknowledges FDOT statewide safety targets, which set the target at “0” for each performance measure to reflect the Department’s goal of zero deaths. However, the MPO has set its safety performance targets based upon data collected within the MPO planning area for previous years related to safety performance measures. On January 30, 2018, the MPO adopted Resolution 2018-01 to establish its own targets, a 5% reduction based on a five-year rolling average for the required safety performance measures. On February 19, 2019, the MPO adopted Resolution 2019-01 and reaffirmed its commitment to a 5% reduction based on a five-year rolling average for the required safety measures.

## Transportation Security

Better planning in transportation security can help reduce the negative impacts to local and regional transportation systems from major natural or manmade events, such as hurricanes, tornadoes, flooding, or terror attacks. In addition, Federal requirements for metropolitan planning also include considering security as a factor in LRTPs. The metropolitan planning process should provide for consideration and implementation of projects, strategies, and services that will increase the security of the transportation system for motorized and non-motorized users. USDOT defines transportation system security as the freedom from intentional harm and tampering that affects both motorized and non-motorized travelers.

The vulnerability of the transportation system and its use in emergency evacuations have become key concerns for the Department of Homeland Security (DHS), created in 2001. Established by DHS, the Urban Areas Security Initiative (UASI) focuses on enhancing regional preparedness in major metropolitan areas. The Tampa UASI, which includes Hernando and Citrus counties and six other neighboring counties, has been established to coordinate with the Florida Division of Emergency Management on expanding regional collaboration and developing integrated regional systems for prevention, protection, response, and recovery.

#### Federal Safety Guidance

The National Infrastructure Protection Plan (NIPP) 2013: Partnering for Critical Infrastructure Security and Resilience was developed by the U.S. Department of Homeland Security (DHS). This plan outlines mitigation strategies for public and private entities to protect critical infrastructure. One of the plan's "Lifeline Critical Infrastructure Sectors" is Transportation.

The US DHS and the United States Department of Transportation (USDOT) developed a Transportation Systems Sector-Specific Plan (TSSSP), of which one of the purposes is, *"to guide and integrate efforts to secure and strengthen the resilience of transportation infrastructure and to describe how the Transportation Systems Sector contributes to the overall security and resilience of the Nation's critical infrastructure, as set forth in Presidential Policy Directive 21, (PPD-21), Critical Infrastructure Security and Resilience."* The TSSSP established the following set of Goals for transportation system security.

The TSSSP also establishes a comprehensive framework of Federal agency responsibilities to improve disaster preparedness of transportation infrastructure. These five "National Preparedness System mission areas" are as follows:

- **Protection:** applies to steady-state activities and includes safety and security programs aimed at reducing or managing risk to critical transportation infrastructure.
- **Prevention:** applies specifically to activities taken in response to an imminent terrorist attack.
- **Mitigation:** aims to reduce the consequence of an incident by identifying best practices as well as codes or standards that make transportation infrastructure more resilient.
- **Response:** coordinates all response actions during a disaster to save lives and property at risk, and it conforms to the National Incident Management System.
- **Recovery:** guides long-term recovery following an incident.

Hernando/Citrus MPO integrates security evaluations into the planning process, especially as both counties and the region grow. Roadways such as I-75, Suncoast Parkway, US-19, and SR 50 are crucial parts of a secure, resilient transportation network for the local area and the entire Tampa Bay region.

#### USDOT TRANSPORTATION SYSTEMS SECTOR-SPECIFIC PLAN GOALS

- GOAL 1** - Manage the security risks to the physical, human, and cyber elements of critical transportation infrastructure.
- GOAL 2** - Employ the Sector's response, recovery, and coordination capabilities to support whole community resilience.
- GOAL 3** - Implement processes for effective collaboration to share mission-essential information across sectors, jurisdictions, and disciplines, as well as between public and private stakeholders.
- GOAL 4** - Enhance the all-hazards preparedness and resilience of the global transportation system to safeguard U.S. national interests

Additionally, Citrus County Transit recently completed a Threat and Vulnerability Assessment of its bus operations consistent with the Federal Transit Administration's (FTA) eight-step process. The assessment includes an agency plan that deals with security events from routine to severe. Security events could include criminal activity such as hostage situations, cyber-attacks, or even terrorist attacks. The assessment identifies specific threats, organizational and personnel roles and responsibilities, and countermeasure and strategy activities.

## Transportation Resiliency

The MPO planning process involves activities addressing before and after a disaster. Disaster preparation planning involves efforts to guard against and preemptively mitigate a disaster's effects. Disaster recovery planning includes identifying steps to restore essential functions, efficient recovery, and rebuilding.

Florida is one of the national leaders in emergency management and disaster mitigation planning due to its vulnerability to hurricanes and tropical storms. Local governments prepare several types of plans that MPOs and TPOs should be aware of and, as appropriate, participate in developing:

- Comprehensive Emergency Management Plans: Operational procedures used to prepare for, respond to, recover from, and mitigate emergencies.
- Local Mitigation Strategies: Identify and prioritize hazard mitigation needs and strategies to reduce the vulnerability to natural hazards.
- Post-Disaster Redevelopment Plans: Outlining recovery and reconstruction procedures and policies .
- The national Strategic Highway Network (STRAHNET) consists primarily of Interstate highways, but also includes non-Interstate facilities as well. Critical to operations of the Department of Defense, STRAHNET-designated roadways are vital for emergency mobilization and movement of emergency good such as fuel, repair parts, food, and other commodities. While no STRAHNET facilities are located in Hernando County or Citrus County, there are several connections to STRAHNET facilities, including I-75.

Hernando County and Citrus County each have representatives involved with the Tampa Bay Regional Resilience Coalition, which is coordinated by the Tampa Bay Regional Planning Council. The coalition also has members from the FDOT, Florida Department of Environmental Protection, the Southwest Florida Water Management District, and Enterprise Florida. The coalition collaborates to develop strategic regional responses for resolving regional issues, focusing on how to reduce regional impacts due to the changing climate. It seeks to secure increased levels of funding to support regional infrastructure improvements and develop robust programs to protect the communities throughout the region.

The FDOT has taken steps to integrate effective resiliency steps in to planning processes. A Resilience Subcommittee has been established and resiliency is being incorporated into the Florida Transportation Plan. Four standard phases guide the FDOT Emergency Management program, as listed below. These phases support informed communities and resilient infrastructure.

- Preparedness
  - This includes plans or preparations made to save lives and to help response and rescue operations.
  - Evacuation plans and stocking food and water are both examples of preparedness.
  - Preparedness activities take place before an emergency occurs.
- Response
  - This includes actions taken to save lives and prevent further property damage in an emergency situation; putting preparedness plans into action.
  - Response activities take place during an emergency.
- Recovery
  - This includes actions taken to return to a normal or an even safer situation following an emergency.
  - Recovery includes getting financial assistance to help pay for the repairs.
  - Recovery activities take place after an emergency.
- Mitigation
  - This includes any activities that prevent an emergency, reduce the chance of an emergency happening or reduce the damaging effects of unavoidable emergencies.
  - Mitigation activities take place before and after emergencies.

The Hernando/Citrus MPO will work with the coalition and other partners such as FDOT, local public works departments, and emergency planning agencies, to assist in strengthening the transportation system's resiliency to man-made and natural disasters. In Chapter 6 of this plan, the Hernando/Citrus MPO has identified potential environmental risks and established mitigation steps that support a resilient transportation system.

# Chapter 5

## PUBLIC INVOLVEMENT

## Chapter 5

### Public Involvement

#### Introduction

The Hernando/Citrus MPO made an intentional effort to solicit and obtain a diverse set of input for the Hernando/Citrus MPO 2045 LRTP. The MPO engaged the public with several different methods, which included traditional face-to-face meetings, community workshops, and web-based information updates. Traditionally underserved populations were specifically targeted as part the outreach efforts and participation in the Plan. Many different stakeholders and interested parties participated in the development of the 2045 LRTP. The focus of these outreach efforts were the following goals:

1. Create awareness of the Hernando/Citrus MPO and the 2045 LRTP
2. Inform and educate citizens and other stakeholders about transportation issues, a range of possible solutions, and the implications for the next 25 years
3. Obtain public and stakeholder preferences and substantive comments and present this input to the MPO Board for consideration in their review and approval of the 2045 LRTP

Ultimately, the input received through these public outreach efforts helped guide the development of the 2045 LRTP and validate the projects that were recommended in the Plan. **Table 36** shows a list of these activities.

**Table 36. LRTP Public Involvement Activities**

Date	Activity	Location
Spring 2019	MPO Newsletter	
April 16, 2019	Needs Assessment Workshop	Spring Hill (Hernando)
April 24, 2019	Environmental Justice Workshop	Brooksville (Hernando)
May 2, 2019	Needs Assessment Workshop	Inverness (Citrus)
May 2, 2019	Environmental Justice Workshop	Inverness (Citrus)
May 29, 2019	Consensus Building Workshop	Brooksville (Hernando)
August 13, 2019 August 14, 2019	Cost Feasible Plan Workshop	Crystal River (Citrus) Ridge Manor (Hernando)
Ongoing throughout	MPO Board Meetings	
Ongoing throughout	CAC / TAC Meetings	
Ongoing throughout	Public Comments	

## Public Participation Plan

The Hernando/Citrus MPO Public Participation Plan (PPP) was adopted by the MPO Board on September 30, 2014 and updated September 18, 2018. The Public Participation Plan addresses the federal requirements to provide direction for public involvement activities to be conducted by the MPO. It includes the policies, goals, objectives and techniques used for public involvement. The PPP determines strategies and activities used to solicit and incorporate input from the community and stakeholders into the development of 2045 LRTP.

The PPP is considered a living document and was continually reviewed to best reflect the needs of the community. The MPO strives to improve its outreach to the public. The September 18, 2018 update of the PPP used for this report is included in the **Technical Appendix O**.

### Community Workshops and Other Events

#### Need Assessment Workshops

Two Needs Assessment Workshops occurred in Spring 2019, one taking place in each county. The initial Needs Assessment maps and materials were displayed on a series of boards highlighting the transportation system projects, including roadway, transit, and bicycle/pedestrian. In addition to the display boards, an in-person presentation was shown to attendees. Following the presentations, workshop discussions were held between the attendees and LRTP staff. Participants involved with the public workshops were generally satisfied with the transportation needs identified, offering additional ideas during discussion. All public comments are included in the Public Involvement Summary Report in **Technical Appendix P**.

#### Environmental Justice Workshops

Per U.S. Executive Order (*E.O. 12898, 59 FR 7629*), efforts must be made throughout the development of plans and projects to avoid disproportionate adverse effects on minority and low-income populations. This attention to protecting all communities is known as Environmental Justice (EJ), and the 2045 LRTP development included efforts to include evaluation of sociocultural effects and EJ.

Potential improvements and negative impacts of proposed transportation projects were considered throughout the LRTP process. Efforts were made to identify potential areas with a high concentration of minority, low-income, and other underserved or under-represented populations. A detailed report of EJ activities can be found in the Environmental Justice Summary Report in **Technical Appendix Q**.

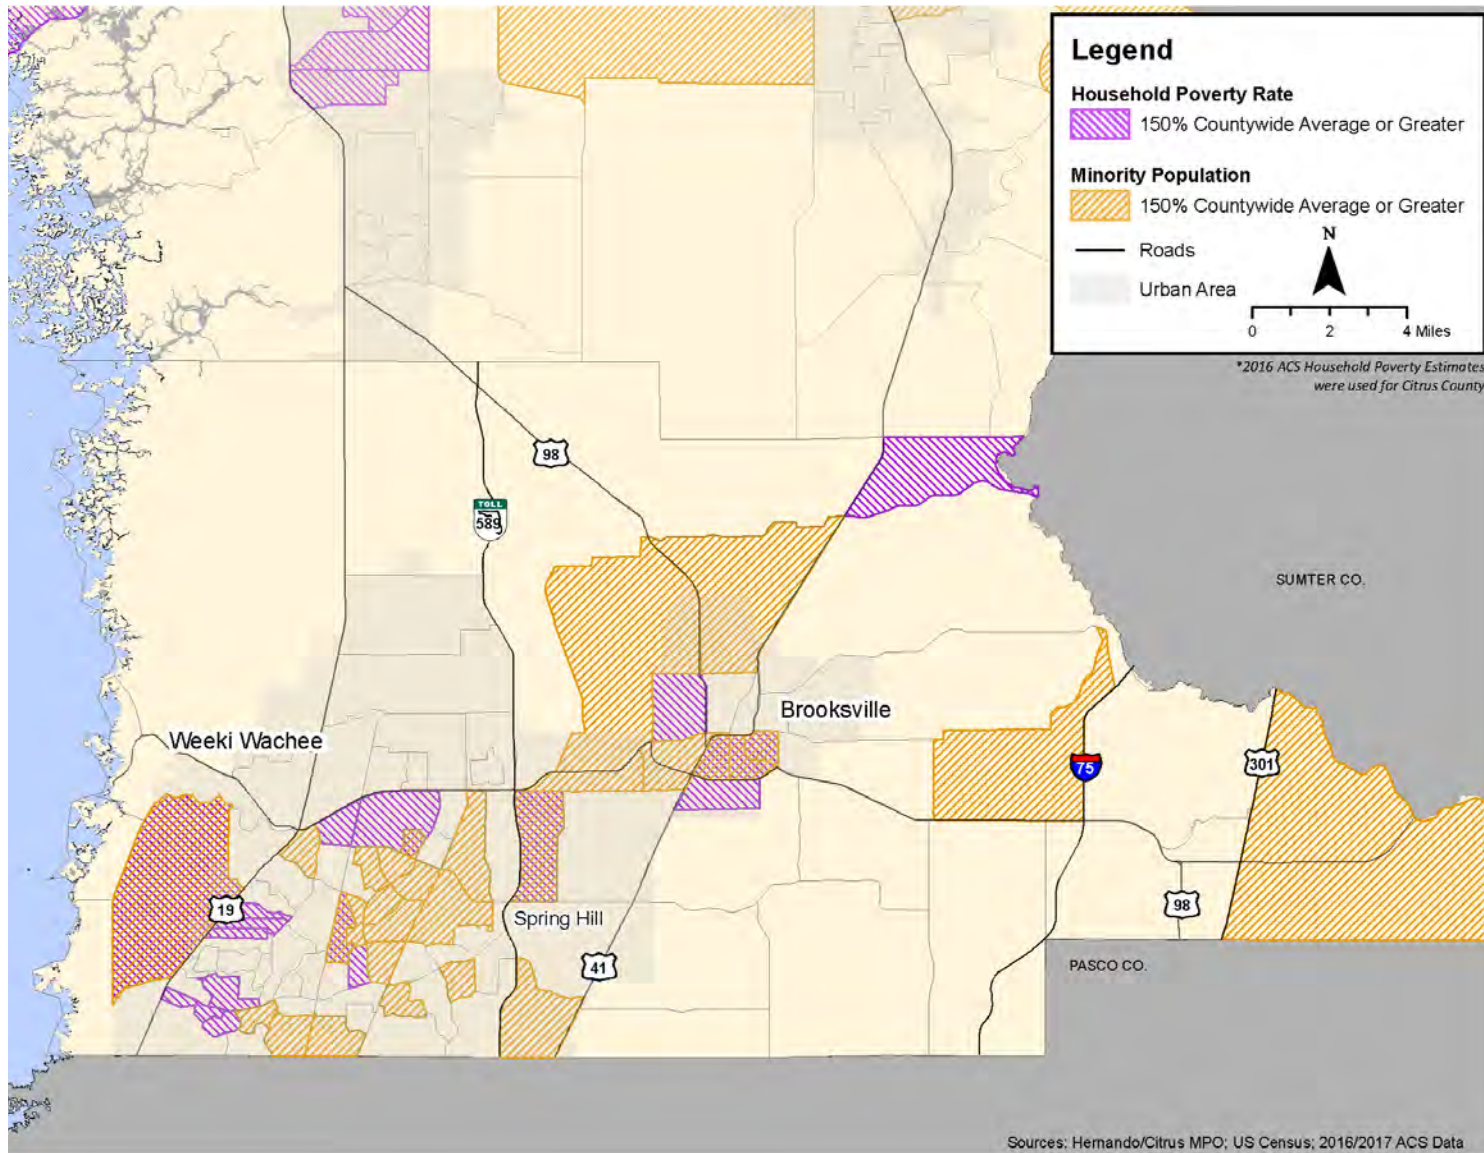

**Figure 26** and **Figure 27** show the 2045 LRTP environmental justice areas identified based on demographic analysis using data from U.S. Census Bureau and the American Community Survey. The initial identification and evaluation of these areas guided public workshops held specifically to address environmental justice issues.

One environmental justice workshop was held during the Needs Assessment phase of plan development. The workshop shared information about the establishment and importance of environmental justice and held discussion about potential impacts of transportation improvements on elderly, minority, and low-income populations throughout the Hernando/Citrus MPO jurisdiction.

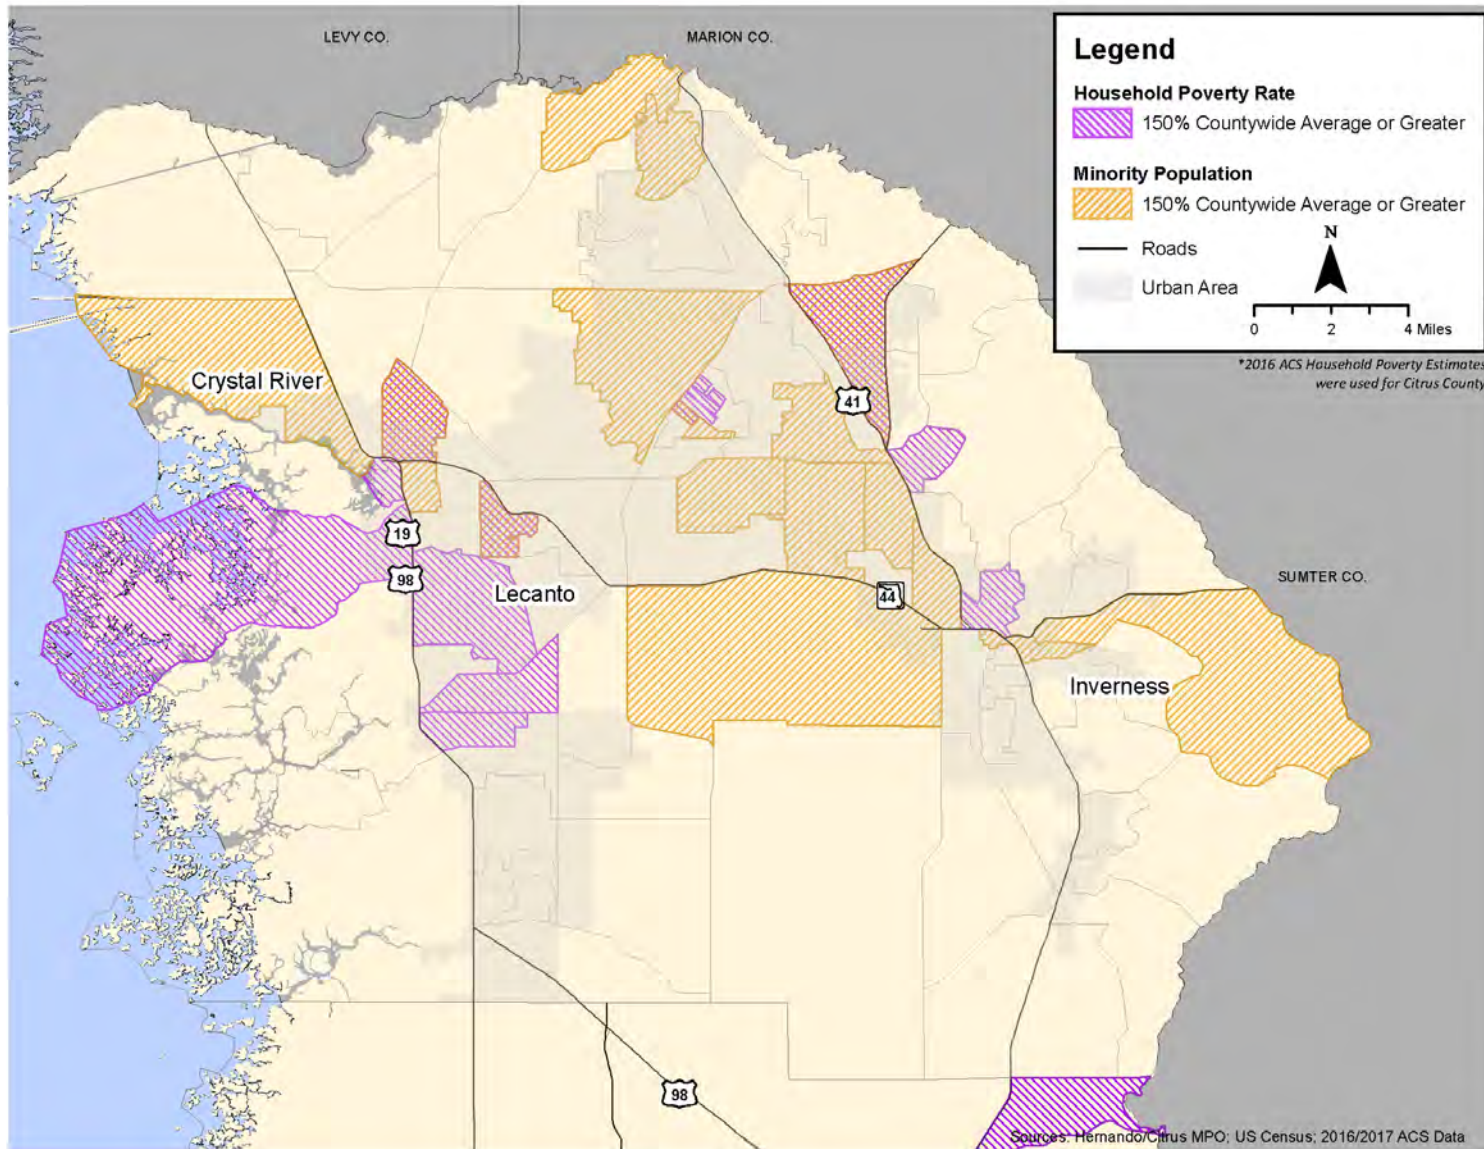

Input received at these workshops helped guide and prioritize needs and future projects in the LRTP, with the goal of minimizing negative impacts to those areas identified as having a higher proportion of populations included in environmental justice considerations.

**Figure 26. Hernando County Environmental Justice Area**

**Figure 27. Citrus County Environmental Justice Area**

## Consensus Building Workshops

A Consensus Building Workshop (CBW) was held on May 29, 2019, at the Hernando County Utilities Building in Brooksville. Participants in the workshop included stakeholders selected and invited by the Hernando/Citrus MPO staff. The workshop format included a formal presentation followed by small group activities that addressed needs and priorities of roadway improvements, transit needs and bicycle and pedestrian needs, as well as funding options. Additional summary of the workshop and stakeholder input is included in the **Technical Appendix P**.

## Other Outreach Activities

---

### Project Website

Information about LRTP development and implementation was available and regularly updated on the primary Hernando/Citrus MPO website. Project documents were made available to the public for review and comment. Notices of updates in the process, as well as document postings, public involvement activities, and solicitation of public input were sent to MPO mailing lists, including those for the Citizens Advisory Committee (CAC), Technical Advisory Committee (TAC), MPO Board, and Bicycle/Pedestrian Advisory Committee (BPAC) and community members. Information about events and opportunities was also published on the MPO website.

### Newsletters

The Winter 2019 issue of the Hernando/Citrus MPO Transportation Talk Newsletter included an overview of the LRTP process, introducing the Goals and Objectives of the 2045 plan. The newsletter was distributed to the MPO email list and immediately posted to the MPO's website. Subsequent editions of the newsletter have provided updates throughout the process. Copies of *Transportation Talk* relevant to the plan are included in the Public Involvement Summary Report in **Technical Appendix P**.

## Summary of Public Comments

---

The transportation projects identified in Hernando/Citrus MPO 2045 LRTP are partially based on input received during the public involvement efforts of the MPO and LRTP team. The MPO led different activities in an attempt to achieve the stated goals of the public involvement process for the 2045 LRTP. The MPO strived to keep the process simple and convenient for participants, while providing robust information to encourage as much participation as possible.

Throughout the development of the 2045 LRTP, public comments received at workshops, meetings, or via direct communication (by phone or email), indicated there should be additional investment to improve safety, especially for bicyclists and pedestrians, with an emphasis near schools. Preserving the relatively rural and natural nature of the MPO area was also a priority for many who provided comment. Some comments were provided that focused on providing regional transportation alternatives to highway travel, including express bus and passenger rail.

## Plan Successes and Unmet Aspirations

---

The Hernando/Citrus MPO 2045 LRTP adequately meets the transportation needs that were expressed by the public. A lot of input was provided to prioritize widening US-41, from the Withlacoochee Trail Bridge to SR 200 and north to the Sumter County Line. Likewise, a significant amount of support was provided to prioritize widening Powell Road from Barclay Avenue to California Street.

Based on public comments, the MPO ensured existing priorities and projects currently in production were included in the Plan. However, due to the limited availability of funding for future highway projects, some projects listed as Cost Feasible Projects in the 2035 LRTP, are now listed as unfunded or partially funded projects in the 2045 LRTP.

Another area that received a number of comments was support for additional transit services. However, the MPO was unable to identify a dependable funding source for additional services. Therefore, the planned transit improvements included in the 2045 LRTP are reflected as unfunded.

## Public Hearing

---

The Hernando/Citrus MPO held a public hearing on October 30, 2019, at a regularly scheduled MPO Board meeting to obtain comments on the 2045 LRTP, prior to the Board's adoption of the Plan. Pursuant to the MPO's adopted Public Participation Process (PPP), the public hearing followed a public comment period that was established by the Board on October 30, 2019. The public comment period and public hearing were announced on the MPO's website and on social media.

In support of the public comment period and the public hearing, the MPO prepared an adoption package to help explain the LRTP update. The document covers the highlights, key themes, and projects contained in the Plan. Based on lessons learned from prior LRTP documents, staff and the project consultant developed the adoption package so that it is easily understood by the public or others without significant technical experience in transportation planning.

Following the staff's presentation and MPO Board discussion, the MPO chairman opened the public hearing. No public comments were received, and the public hearing was closed by the chairman. The Board then adopted the Hernando/Citrus MPO 2045 LRTP on December 4, 2019. The roll call vote was unanimous.

## Key Themes

---

Public input was collected throughout the development of the plan. Key themes included addressing existing congestion and other problems, improving the network of evacuation routes, preserving existing infrastructure, and providing the community with a variety of transportation options, including more robust local and regional transit and multi-use trails.

Updates to the plan due directly to public comment include:

- Roadway improvements in northeast Citrus County (US-41, SR 200, Lecanto Highway)
- Additional east-west routes in each county
- Transit connections to the Florida's Turnpike
- Expanded local transit routes and availability

Public input, photographs, and materials provided for public involvement activities are included in the **Technical Appendix P**.

# Chapter 6

## PERFORMANCE MEASUREMENT

## Chapter 6

# Performance Measurement

As transportation technology advances and transportation agencies move into the future, the importance of evaluating transportation performance is increasing. Setting targets early in the process helps to determine whether the transportation goals are met in the future. An old saying also applies here – “You don’t know where you’re going until you know where you’ve been.” Without a clear understanding of current performance, as well as a clear vision of what is desired for the future, there will most likely not be a significant change in performance.

As mentioned in Chapter 2, Goals, Objectives, and Performance Measures, Performance measurement is a continuing effort that will guide the planning efforts of the MPO, the selection for funding of transportation projects and programs, and the annual evaluation of performance of the transportation system throughout the MPO area.

This chapter summarizes the performance for the Hernando/Citrus MPO 2045 LRTP based on the Goals, Objectives, and Performance Targets outlined in Chapter 2. The chapter also includes a discussion on environmental mitigation.

## Performance Evaluation

This section provides an overview of Performance Targets related to the Goals and Objectives identified in Chapter 2. The Hernando/Citrus MPO 2045 LRTP goals include the following six items: Safety, Economy, Mobility, Intermodal, Livability, and Preservation.

**Performance Measures** were established through Federal Highway Administration (FHWA) and combined, address each of the national Planning goal areas. MPOs are required to conduct performance-based planning by setting data-driven performance targets for the performance measures and program transportation investments that are expected to achieve those targets. This plan’s Performance Measures are included in **Table 37**.

The **Performance Indicators** below are established by the Hernando/Citrus MPO and are used to evaluate this LRTP. The Performance Indicators evaluate the projected results of this LRTP's Cost Feasible Plan, and are listed on the following pages in **Table 38**.

Existing and future (2045) performance is also included within the table. Three categories were developed to assess the 2045 performance in the 2045 column:

- The target is met or is improved from the existing condition
- The target is met by 2045
- The target is not met by 2045

As shown in **Table 38**, 12 of the 15 targets will either be met by 2045 and/or the performance will be improved from existing conditions. Three of the 15 targets that do not meet the standard relate to travel time reliability. This is due to the assumption that Hernando County and Citrus County will experience significant amounts of growth in some concentrated areas. The 2045 performance is expected to stay relatively consistent with existing levels based on the current funding picture. The targets are meant to be reviewed continuously and the performance evaluation is a picture at this time, which could change should funding arise that allows for additional transit expansion and new transit service to help relieve densely populated areas.

**Table 37. FAST Act Safety Performance Measures**

**Performance Measure 1 (PM1) – Safety**

Objective	Performance Measure	Target	2045	Comments
Reduce transportation-related crashes, injuries, and fatalities using current design standards, advanced technologies, and education	Number of fatalities	Decrease 5% per year	Improved; Target not met	Planning focused on high crash locations identified through congestion management process and other bicycle/pedestrian safety efforts. See crash maps in <b>Technical Appendix R</b>
	Rate of fatalities	Decrease 5% per year	Improved; Target not met	
	Number of serious injuries	Decrease 5% per year	Improved; Target not met	
	Rate of serious injuries	Decrease 5% per year	Improved; Target not met	
	Number of non-motorized fatalities and non-motorized serious injuries	Decrease 5% per year	Improved; Target not met	

**Table 37. FAST Act Safety Performance Measures (Continued)**

**Performance Measure 2 (PM2) – Pavement & Bridge**

Objective	Performance Measure	Target	2045	Comments
Maintain pavement conditions	Percent of Interstate pavements in good condition	Maintain/Increase	Maintained	
	Percent of Interstate pavements in poor condition	Maintain/Decrease	Maintained	
	Percent of non-Interstate NHS pavements in good condition	Maintain/Increase	Maintained	
	Percent of non-Interstate NHS pavements in poor condition	Maintain/Decrease	Maintained	
Maintain Bridge Condition	Percent of NHS bridges by deck area in good condition	Maintain/Increase	Maintained	
	Percent of NHS bridges by deck area in poor condition	Maintain/Decrease	Maintained	
Maintain Transit Infrastructure and Rolling Stock	Does the plan minimize impacts on established neighborhoods?	Yes/No	Yes	

**Table 37. FAST Act Safety Performance Measures (Continued)**

**Performance Measure 3 (PM3) – System & Freight**

Objective	Performance Measure	Target	2045	Comments
Provide travel time reliability on the National Highway System	Percent of person-miles on the Interstate system that are reliable— Level of Travel Time Reliability (Interstate LOTTR)	Maintain/Increase	Target not met	Cost Feasible V/C is increased from base condition
	Percent of person-miles on the non-Interstate NHS that are reliable (Non-Interstate NHS LOTTR)	Maintain/Increase	Target not met	
Accommodate the safe and efficient movement of goods via highway, airport, port, and rail systems	Freight travel time reliability	Maintain/Increase	Target not met	Some corridors experience an increase in travel time reliability. However, most major corridors are expected experience a decrease in travel time reliability by 2045

**Table 38. 2045 LRTP Performance Evaluation**

**Goal 1 - SAFETY: Increase safety of the counties' transportation system.**

Objective	Performance Indicator	Hernando	Citrus	Comments
Consistency with FDOT Strategic Highway Safety Plan (SHSP)	Is the plan consistent with the Strategic Highway Safety Plan and Safety Emphasis Areas?	Yes	Yes	N/A
Reduce transportation-related crashes, injuries, and fatalities using current design standards, advanced technologies, and education	Does the plan use crash data to prioritize projects in CMP and LRTP?	Yes	Yes	Focus on high crash locations identified through congestion management process and other bicycle/pedestrian safety efforts. See crash maps in <b>Technical Appendix R</b>
Encourage transportation investments and policies that result in a higher level of personal security for pedestrians, cyclists, motorists and users of transit	Are security plans considered for intermodal facilities, including for seaport, airport, rail, etc?	Yes	Yes	N/A

**Table 38. 2045 LRTP Performance Evaluation (Continued)**  
**Goal 2 – ECONOMY: Support economic development in the two counties.**

Objective	Performance Indicator	Hernando	Citrus	Comments
Improved access and connections to port, rail, and airport facilities	Lane miles of projects that improve access and connections to the port, rail, and airport facilities	Increased	Increased	Cost Feasible Plan includes improvements to roads nearby Brooksville-Tampa Bay Regional Airport, Crystal River Airport, and Inverness Airport
Support economic development in specific geographic areas (Brooksville CBD, Brooksville-Tampa Bay Regional Airport, I-75/SR-50 Planned Development District, CR 491 in Citrus County)	Maintain LOS on corridors providing access to these areas.	Maintained	Maintained	See identified activity center areas in <b>Technical Appendix S</b>
	Projects identified and funded to improve access to targeted growth areas.	Maintained	Maintained	N/A
Ensure that regional and local markets are adequately served by the transportation system	Number of regional transit routes	Increased	Maintained	East Hernando Connector Express
	Are regional and local markets served by the identified projects?	Yes	Yes	N/A
Identify transportation issues regarding Hernando and Citrus Counties' Activity Centers and targeted multimodal corridors within the community and identify measures for preserving and enhancing the commercial and social integrity of these areas	Are transportation issues in Hernando/Citrus County Activity Centers and Activity Corridors identified?	Yes	Yes	Consideration of Brooksville Bypass corridors; Improvements on US-41, SR 50, SR 44
	Are methods to preserve and enhance Activity Centers and Multimodal Corridors identified in the plan?	Yes	Yes	Additional services for both counties
Identify and provide for special land use needs within the Suncoast Parkway Corridor, especially at interchange areas	Does the plan identify special land use need within the Suncoast Parkway Corridor?	Yes	Yes	N/A

**Table 38. 2045 LRTP Performance Evaluation (Continued)**

**Goal 3 – MOBILITY: Provide for mobility needs of the community.**

Objective	Performance Indicator	Hernando	Citrus	Comments
Provide for the transportation needs of older adults, persons with disabilities, and low-income population of Hernando and Citrus counties and ensure the facilities are designed in such a manner as to not impair their use by these populations	% of low-income population and older adults within ¼ mile of bus stops	Increased	Increased	N/A
	% service area coverage	Maintain	Maintain	N/A
Use other forms of transportation to reduce the demand for highway usage on congested facilities	% of congested roads with transit	Decreased	Decreased	Additional roadways became congested without adding transit
	Miles of bicycle/sidewalk facilities on congested facilities	Increased	Increased	Additional sidewalks and trails
Address and promote alternative forms of transportation such as mass transit, high occupancy toll (HOT), ridesharing, and other techniques when developing operational management strategies to increase the efficiency of traffic flow and increase vehicle occupancy rate	Are alternative modes of transportation considered when developing operational management strategies?	Yes	Yes	N/A
Ensure that existing bicycle and pedestrian systems are enhanced and protected and provide for the safety of their users	% of major road network with bicycle facilities	Increased	Increased	N/A
	% of major road network with sidewalk facilities	Increased	Increased	N/A
Identify projects in corridors that allow high density and intensity land uses to be served by public transit	Include map identifying potential high transit ridership areas?	Yes	Yes	N/A
Fund provision of mobility services to transportation disadvantaged where fixed route public transportation is not available	% of major road network serviced by transit	Maintain	Maintain	N/A

Objective	Performance Indicator	Hernando	Citrus	Comments
Include provisions for non-motorized modes in new projects and in reconstructions	Do roadway projects include bicycle/ pedestrian facilities consistent with local policies?	Yes	Yes	N/A
	Are operations and maintenance costs included in the identified projects?	Yes	Yes	N/A
Where effective, consider transportation demand and systems management strategies to reduce the demand for or delay the need for major improvements to the transportation system	Does the plan include TDM strategies?	Yes	Yes	N/A
Identify corridors that provide for the interconnection of urbanized areas through a well-developed network of roadways	Does the plan identify corridors that connect the urbanized areas?	Yes	Yes	N/A
Review and document emergency evacuation routes	Does the plan identify evacuation routes?	Yes	Yes	N/A
	Does the plan consider projects that maintain or enhance evacuation routes?	Yes	Yes	N/A
	Total lane miles of evacuation routes	Increased	Increased	N/A
	Is an evacuation plan in place?	Yes	Yes	Hernando/Citrus MPO supports the Florida Statewide Regional Evacuation Study Program. <b>(Technical Appendix T)</b>

**Table 38. 2045 LRTP Performance Evaluation (Continued)**

**Goal 4 – SUSTAINABILITY: Maintain the existing transportation system.**

Objective	Performance Indicator	Hernando	Citrus	Comments
Accommodate the safe and efficient movement of goods via highway, airport, port, and rail systems	% VMT below adopted standard on roads designated as truck routes	2.12%		N/A
	Average weighted volume-to-capacity ratio on roads designated as truck routes	0.27		N/A
	Does the plan consider freight specific infrastructure improvements/ programs?	Yes	Yes	N/A
	Does the plan identify and improve high crash truck route corridors?	Yes	Yes	N/A
	Does the plan reduce Highway Truck Daily Total Hours of Delay?	No	No	N/A
	% truck miles severely congested (V/C > 1.2)*	7.73 mi		N/A

\* Not available at the county level

**Table 38. 2045 LRTP Performance Evaluation (Continued)**

**Goal 5 – LIVABILITY: Preserve, and where possible, enhance social, cultural, physical and natural environmental values.**

Objective	Performance Indicator	Hernando	Citrus	Comments
Sensitivity to preserving the quality of the environment and in responding to air quality and energy conservation consistent with required federal regulations	% miles severely congested	Maintained	Maintained	N/A
Constrain the development of highway facilities within corridors that are scenic in nature and, when appropriate, apply “parkway” treatments that enhance the overall social and aesthetic values to the community	Scenic highway facility miles of roadway network	Maintained	Maintained	N/A
Minimize disruption to established communities, activity centers, redevelopment areas, and infill areas	Does the plan minimize impacts on established neighborhoods?	Yes	Yes	N/A
Identify routes that avoid or minimize impacts to the community	Miles of designated evacuation routes	Increased	Increased	Additional lanes on existing evacuation routes; Suncoast Parkway 2
	Has an analysis been done to determine if planned projects disproportionately impact low-income, minority, and older-adult populations?	Yes	Yes	N/A
	Does the plan include mitigation strategies on projects that impact the environment and the low-income, minority, and older-adult populations?	No adverse impact projects identified	No adverse impact projects identified	Environmental and Environmental Justice mitigation was considered throughout the development of this plan and is described later in this chapter
Consider Context Classification in the design and operation of major transportation facilities	Does the plan preserve the character of surrounding areas and corridors?	Yes	Yes	N/A

**Table 38. 2045 LRTP Performance Evaluation (Continued)**

**Goal 6 – SYSTEM PRESERVATION: Preserve and maintain transportation infrastructure and transit assets**

Objective	Performance Indicator	Hernando	Citrus	Comments
Maintain pavement conditions	Percent of Interstate pavements in good condition	Maintained	Maintained	N/A
	Percent of Interstate pavements in poor condition	Maintained	Maintained	N/A
	Percent of non-Interstate NHS pavements in good condition	Maintained	Maintained	N/A
	Percent of non-Interstate NHS pavements in poor condition	Maintained	Maintained	N/A
Maintain Bridge Condition	Percent of NHS bridges by deck area in good condition	Maintained	Maintained	N/A
	Percent of NHS bridges by deck area in poor condition	Maintained	Maintained	N/A
Maintain Transit Infrastructure and Rolling Stock	Does the plan minimize impacts on established neighborhoods?	Yes	Yes	N/A

## Network Performance

### Travel Demand Model Results

In addition to the performance evaluation and targets, the network performance was evaluated for the purpose of reviewing the performance of different scenarios. The FDOT District Seven Regional Travel Demand Model indicates that the Cost Feasible Network is effective in managing congestion and travel delay throughout much of Hernando County and Citrus County. An overall analysis of volume/capacity (V/C) ratios for both county's road networks for several different scenarios was conducted to demonstrate the level of congestion expected in 2045. For this analysis, the road networks were divided into five categories or classifications which consists of the following:

- All roads
- Collector roads
- Arterials roads
- Freight network
- Regional freight network

While the overall performance of the road network is satisfactory, there are some individual corridors and areas in the county that exhibit deficient roadway segments. These roads are depicted on **Figure 28** and **Figure 29**, which highlight for each county the V/C of the 2045 roadway network. A V/C ratio of 1.0 or greater has a potential deficiency. It is generally considered that roads with a V/C ratio of greater than 1.5 have a significant deficiency. There are no corridors in Hernando County or Citrus County that are projected to be experiencing a V/C of 1.5 or greater in the year 2045.

Corridor segments that exhibit potential deficiency of V/C over 1.2 include:

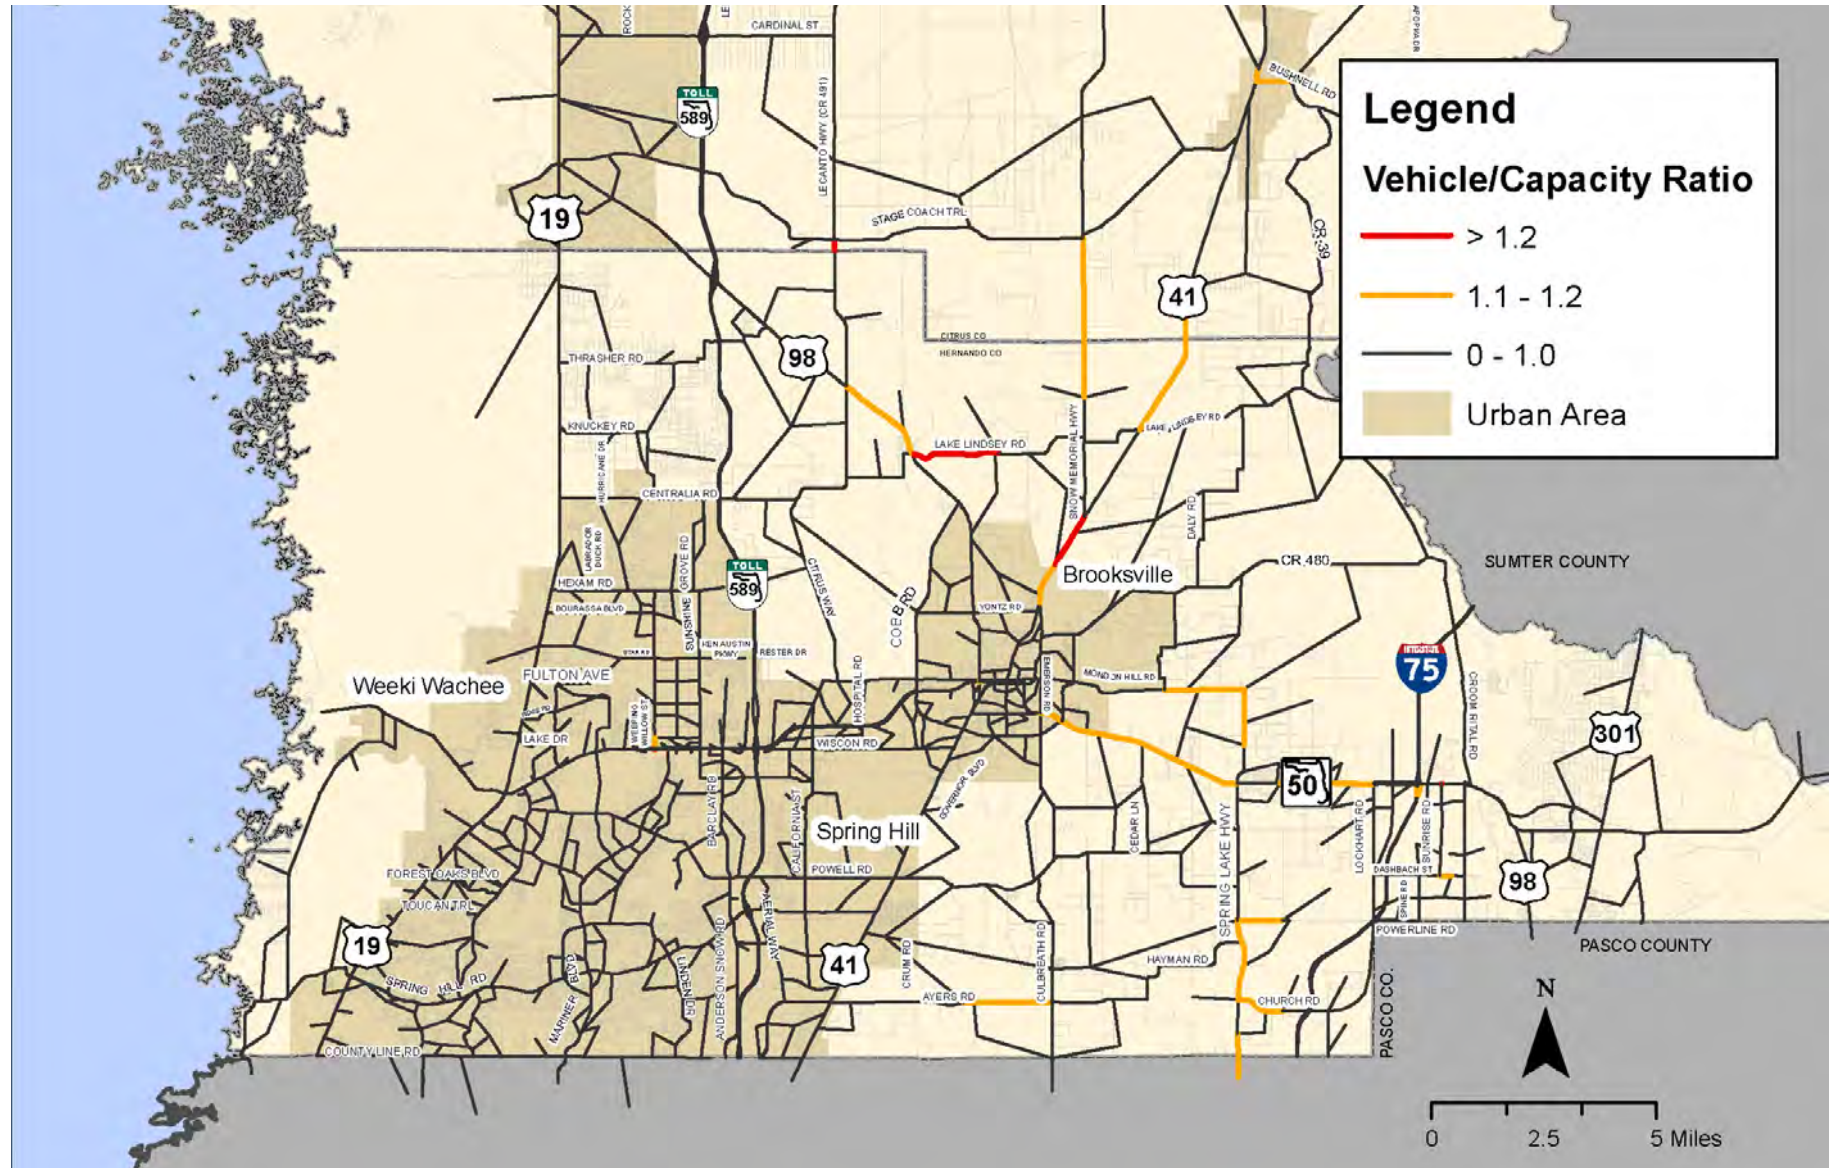

In Hernando County

- Lake Lindsey Road from US-98 to Simmons Lake Rodd
- US-41 from Old Crystal River Road to Snow Memorial Highway
- Intersection at Cortez Boulevard (SR 50) and Sunrise Road

In Citrus County

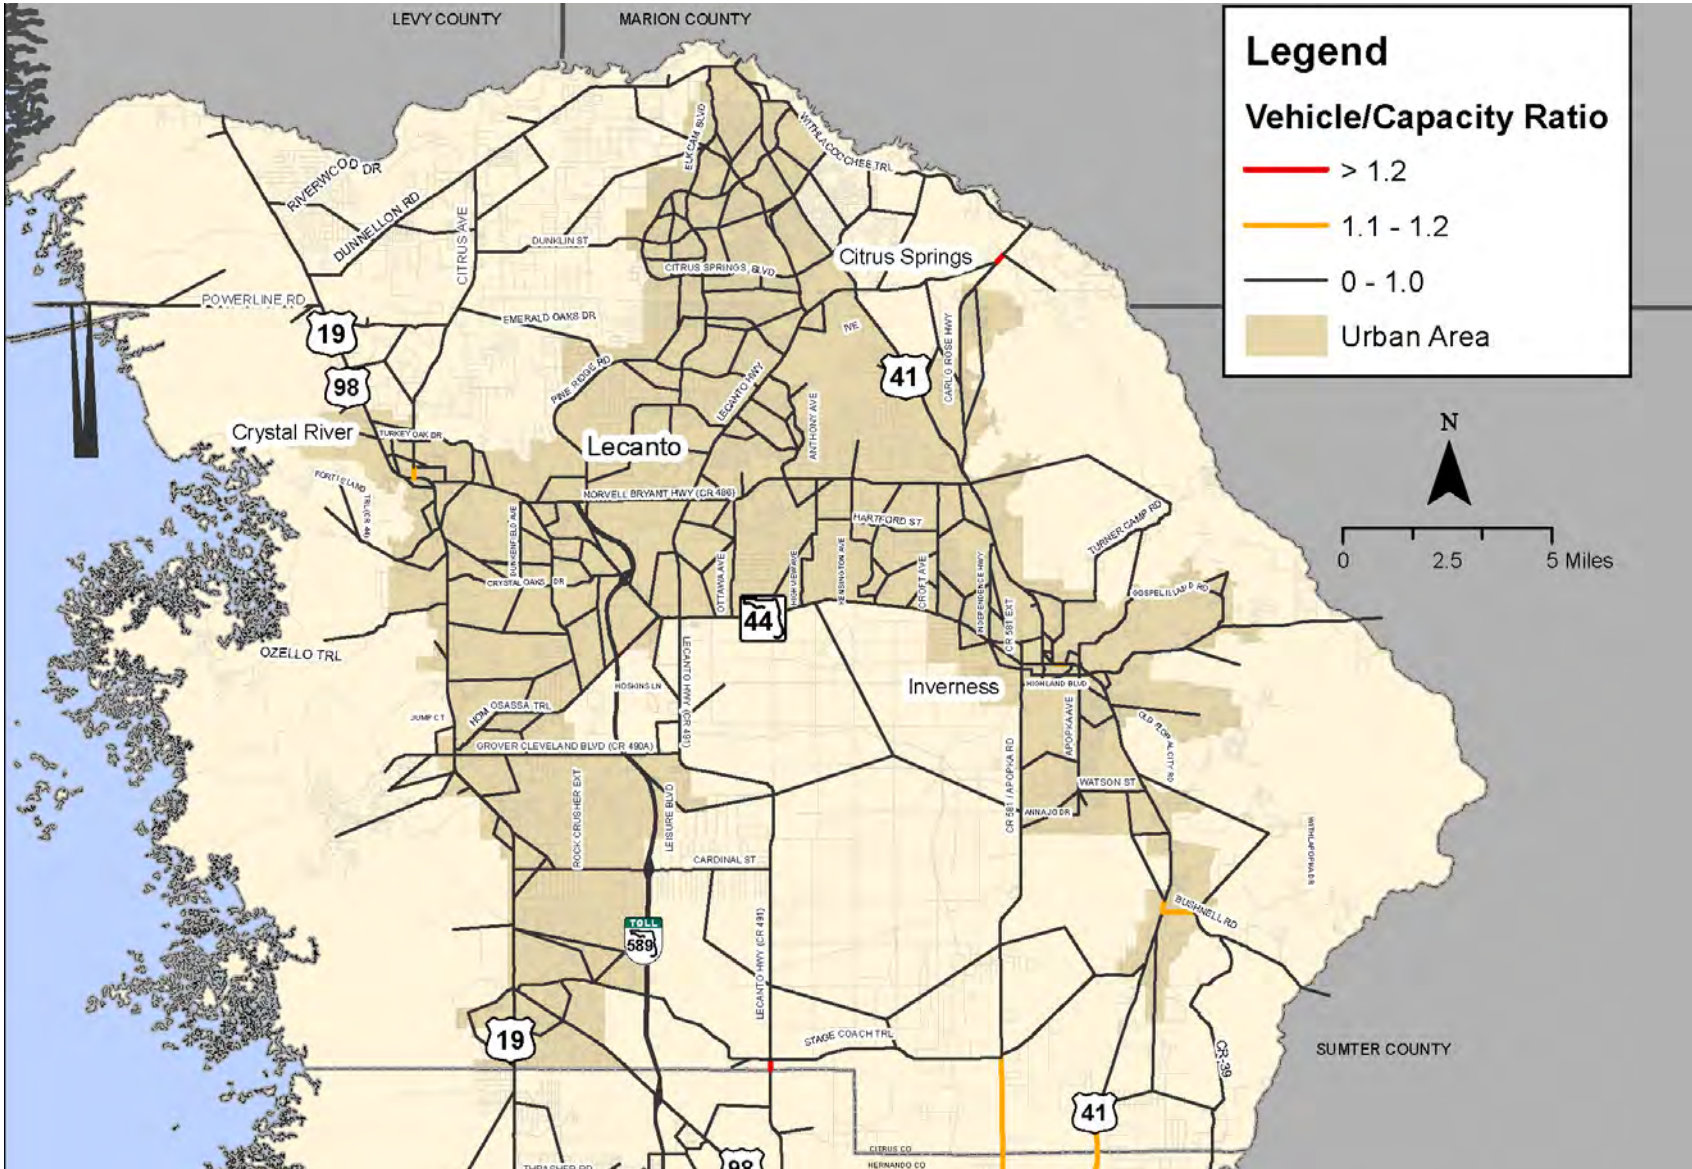

- Carl Rose Highway (SR 200) at Lecanto Highway (CR 491)

**Figure 28. 2045 Model Network - Hernando County**

**Figure 29. 2045 Model Network - Citrus County**

## Environmental Justice

*Environmental Justice* is the fair treatment of all groups within the community. In 1994, Presidential Executive Order 12898 directed every Federal agency to make environmental justice (EJ) part of its mission by identifying and addressing the effects of all programs, policies, and activities on “minority populations and low-income populations.” This order was consistent with Title VI of the Civil Rights Act of 1964 which prohibits discrimination on the basis of race, color, or national origin. Environmental Justice provides a framework for conducting assessments pertaining to matters of equity and nondiscrimination.

The Hernando/Citrus MPO 2045 LRTP performed an Environmental Justice analysis to be consistent with the MPO’s mission as well as the goals and objectives of this LRTP. The analysis used data provided by the U.S. Census Bureau, 2013-2017 American Community Survey (ACS) 5-Year Estimates, which are the most recent data available at the time of this analysis. The ACS 5-year estimates are more reliable than the more current 1-year estimates. **Table 39** shows the ACS data used for the plan’s EJ analysis.

**Table 39. Environmental Justice Populations Summary**

	Citrus County	Hernando County	Florida Statewide
<i>Estimate; Population for whom poverty status is determined</i>	138,743	176,462	19,858,469
Population Below Poverty Level	24,123	25,322	3,070,972
Percent Below Poverty Level	17.39%	14.35%	15.46%
<i>Estimate; Population for whom race is determined</i>	141,373	179,144	20,278,447
Minority Population	9,774	18,520	4,934,450
Percent Minority Population	6.91%	10.34%	24.33%

Source: U.S. Census Bureau, 2013-2017 American Community Survey 5-Year Estimates

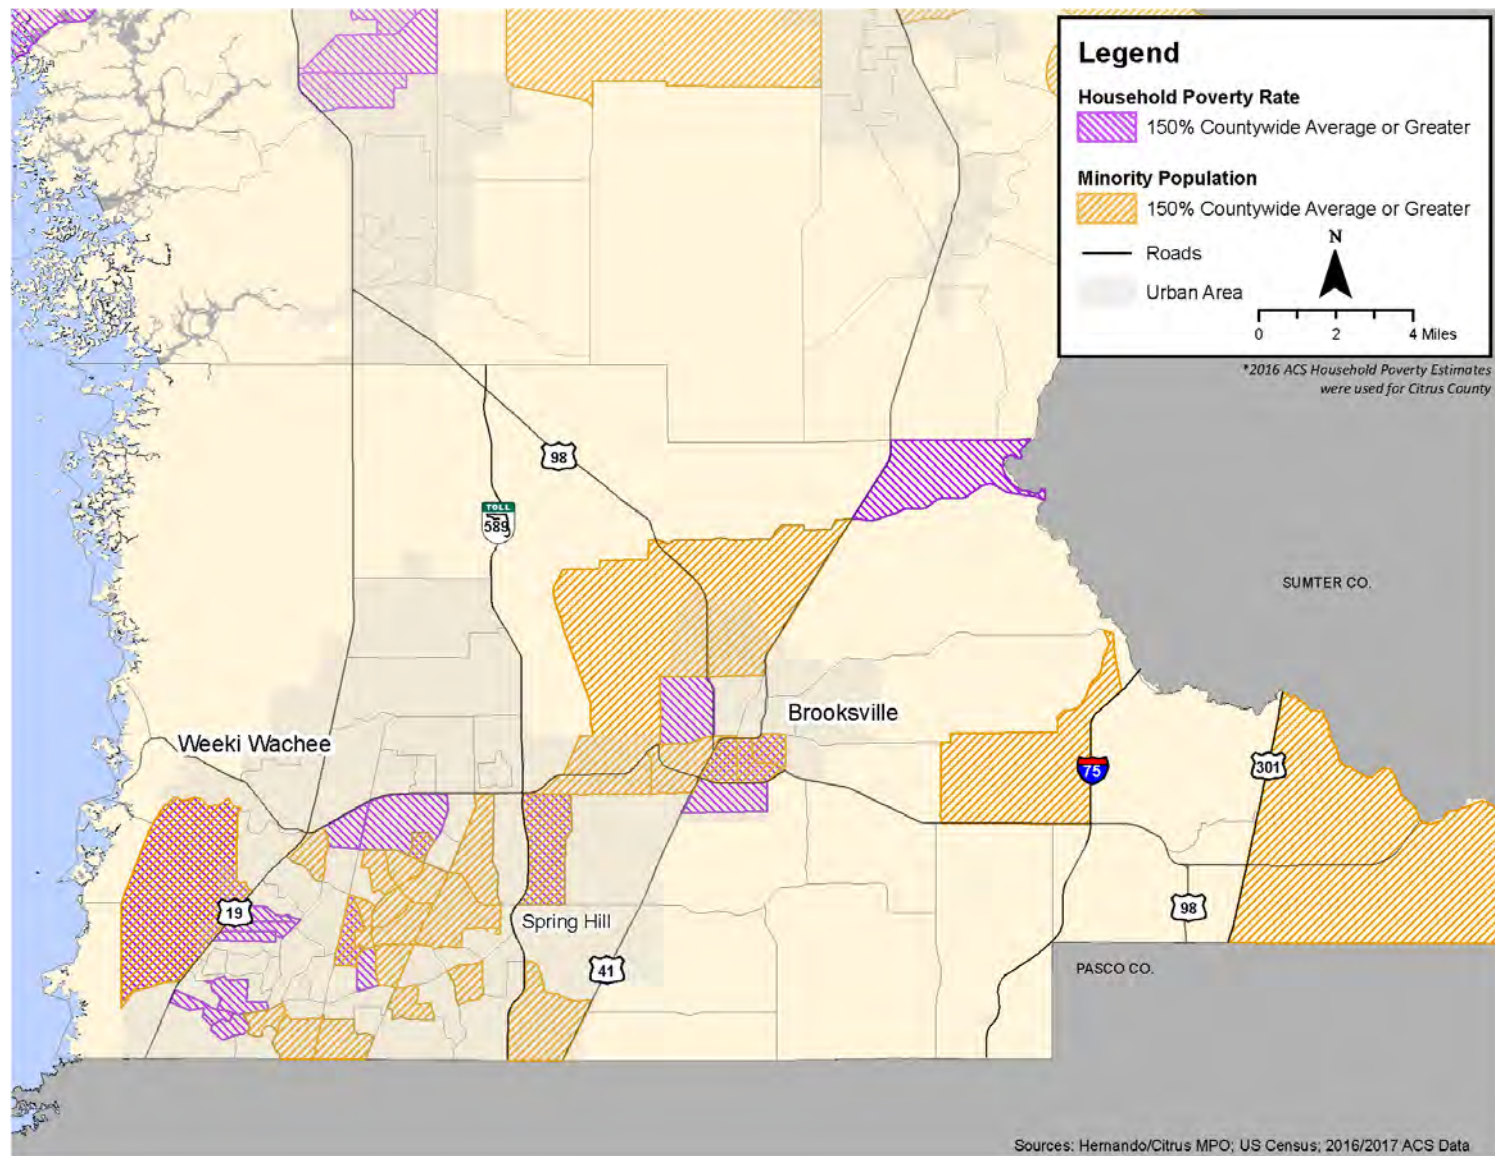

The two driving characteristics of EJ areas in the MPO are percentage of households at or below poverty level and percentage of minority population. Percentages of population meeting the criteria were compared to the statewide average. Those Census Tracts that were estimated to have levels of EJ populations that were equal to or exceeded 150% of the statewide average were highlighted and considered to be potential areas for Environmental Justice considerations throughout the LRTP process. These considerations included additional outreach efforts to those living in these areas and additional consideration to serve the areas with alternate transportation modes.

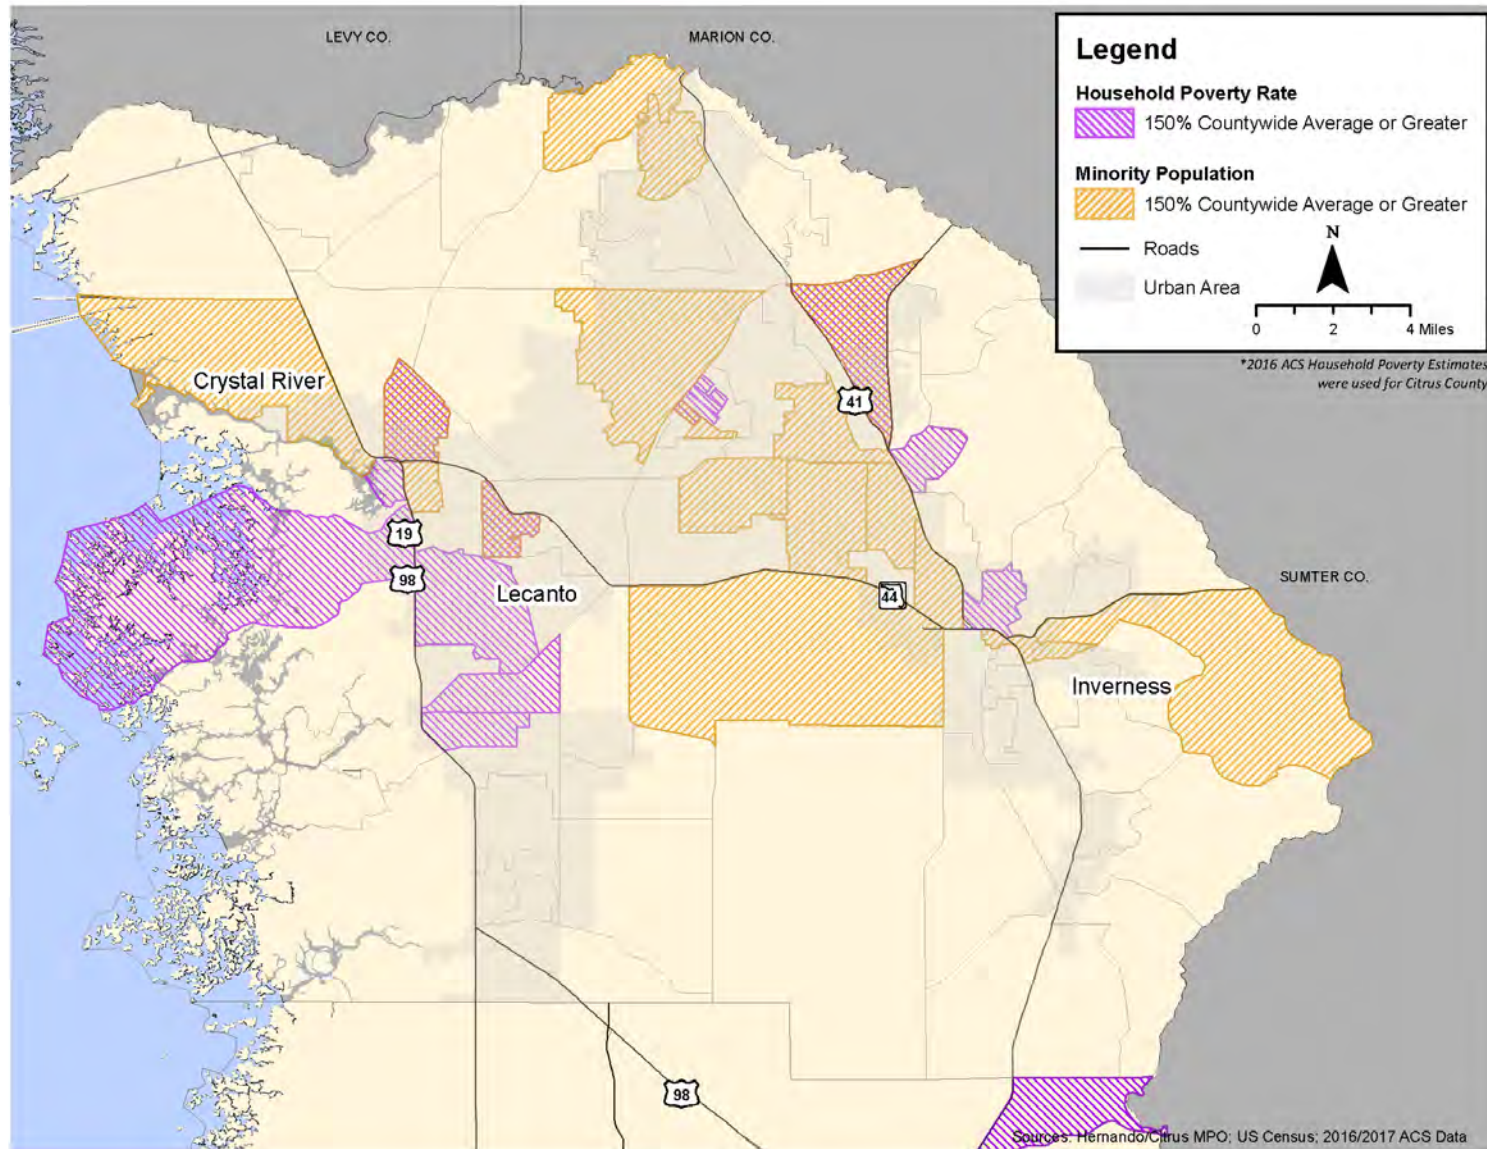

Two Environmental Justice workshops were conducted during the development of the plan—one focusing on each county. The Hernando County EJ Workshop was held April 24, 2019, and the Citrus County EJ Workshop was held May 2, 2019. Items that were discussed included the initial transportation Needs Assessment and potential effects to the areas identified as Environmental Justice Areas as described above.

**Figure 30** and **Figure 31** show where the higher levels of EJ populations are located by U.S. Census tract in each Hernando County and Citrus County. Additional information on EJ is found in **Technical Appendix Q**.

**Figure 30. Hernando County Environmental Justice Populations**

**Figure 31. Citrus County Environmental Justice Populations**

## Environmental Mitigation

---

### Regional Environmental Consultation Workshop

As part of the development of this LRTP, coordination was conducted between the Hillsborough, Pinellas, Pasco, Citrus and Hernando MPOs with Federal, State, and Tribal wildlife, land management and regulatory agencies. A major consultation workshop occurred in June 2019, which consisted of discussions about potential environmental mitigation strategies to include as a part of the Long Range Transportation Plan updates for each MPO in the region. The discussions from this workshop were considered when developing this plan.

### FDOT Requirements

The Hernando/Citrus MPO 2045 LRTP addresses potential environmental mitigation activities as required by federal regulations.

23 Code of Federal Regulations (CFR) 450.322:

(f) The metropolitan transportation plan shall, at a minimum, include:

(7) A discussion of types of potential environmental mitigation activities and potential areas to carry out these activities, including activities that may have the greatest potential to restore and maintain the environmental functions affected by the metropolitan transportation plan. The discussion may focus on policies, programs, or strategies, rather than at the project level. The discussion shall be developed in consultation with Federal, State, and Tribal land management, wildlife, and regulatory agencies. The MPO may establish reasonable timeframes for performing this consultation.

Transportation projects can significantly impact many aspects of the environment including wildlife and their habitats, wetlands, and groundwater resources. In situations where impacts cannot be completely avoided, mitigation or conservation efforts are required. Environmental mitigation is the process of addressing damage to the environment caused by transportation projects of programs. The process of mitigation is best accomplished through enhancement, restoration, creation and/or preservation projects that serve to offset unavoidable environmental impacts.

In the State of Florida, environmental mitigation for transportation projects is completed through a partnership between the MPO, FDOT, and state and federal environmental resource and regulatory agencies, such as the Water Management Districts (WMDs) and the Florida Department of Environmental Protection (FDEP). These activities are directed through Section 373 Florida Statutes (F.S), which establishes the requirements for mitigation planning as well as the requirements for permitting, mitigation banking, and mitigation requirements for habitat impacts. Under this statute, FDOT must identify projects requiring mitigation, determine a cost associated with the mitigation, and place funds into an escrow account within the Florida Transportation Trust Fund. State transportation trust funds are programmed in the FDOT work program for use by the WMDs to provide mitigation for the impact identified in the annual inventory.

Section 373.4137, F.S., establishes the FDOT mitigation program that is administered by the state's WMDs, who are responsible for developing an annual mitigation plan with input from Federal and State regulatory and resource agencies, including representatives from public and private mitigation banks. Each mitigation plan must focus on land acquisition and restoration or enhancement activities that offer the best mitigation opportunity for that specific region. The mitigation plans are required to be updated annually to reflect the most current FDOT work program and project list of a transportation authority. The FDOT Mitigation Program is a great benefit to MPOs because it offers them an additional method to mitigate for impacts produced by transportation projects and it promotes coordination between federal and state regulatory agencies, MPOs, and local agencies.

When addressing mitigation, there is a general rule to avoid all impacts, minimize impacts and mitigate impacts when impacts are unavoidable. This rule can be applied at the planning level, when MPOs are identifying areas of potential environmental concern due to the development of a transportation project. A typical approach to mitigation that MPOs can follow is to:

- Avoid impacts altogether
- Minimize a proposed activity/project size or its involvement
- Rectify the impact by repairing, rehabilitating, or restoring the affected environment
- Reduce or eliminate the impact over time by preservation and maintenance operation during the life of the action

Compensate for environmental impacts by providing appropriate or alternate environmental resources of equivalent or greater value, on or off-site

Sections 373.47137 and 373.4139, F.S. require that impacts to habitat be mitigated for through a variety of mitigation options, which include mitigation banks and mitigation through the Water Management District(s) and the DEP. Potential environmental mitigation opportunities that could be considered when addressing environmental impacts from future projects proposed by MPOs may include, but are not limited to, the items presented **Table 40**.

**Table 40. Potential Environmental Mitigation Opportunities**

Title	Content
Wetlands and Water Resources	<ul style="list-style-type: none"> <li>• Restore degraded wetlands</li> <li>• Create new wetland habitats</li> <li>• Enhance or preserve existing wetlands</li> <li>• Improve storm water management</li> <li>• Purchase credits from a mitigation bank</li> </ul>
Forested and other natural areas	<ul style="list-style-type: none"> <li>• Use selective cutting and clearing</li> <li>• Replace or restore forested areas</li> <li>• Preserve existing vegetation</li> </ul>
Habitats	<ul style="list-style-type: none"> <li>• Construct underpasses, such as culverts</li> <li>• Other design measures to minimize potential habitat fragmentation</li> </ul>
Streams	<ul style="list-style-type: none"> <li>• Stream restoration</li> <li>• Vegetative buffer zones</li> <li>• Strict erosion and sedimentation control measures</li> </ul>
Threatened or Endangered Species	<ul style="list-style-type: none"> <li>• Preservation</li> <li>• Enhancement or restoration of degraded habitat</li> <li>• Creation of new habitats</li> <li>• Establish buff areas around existing habitat</li> </ul>

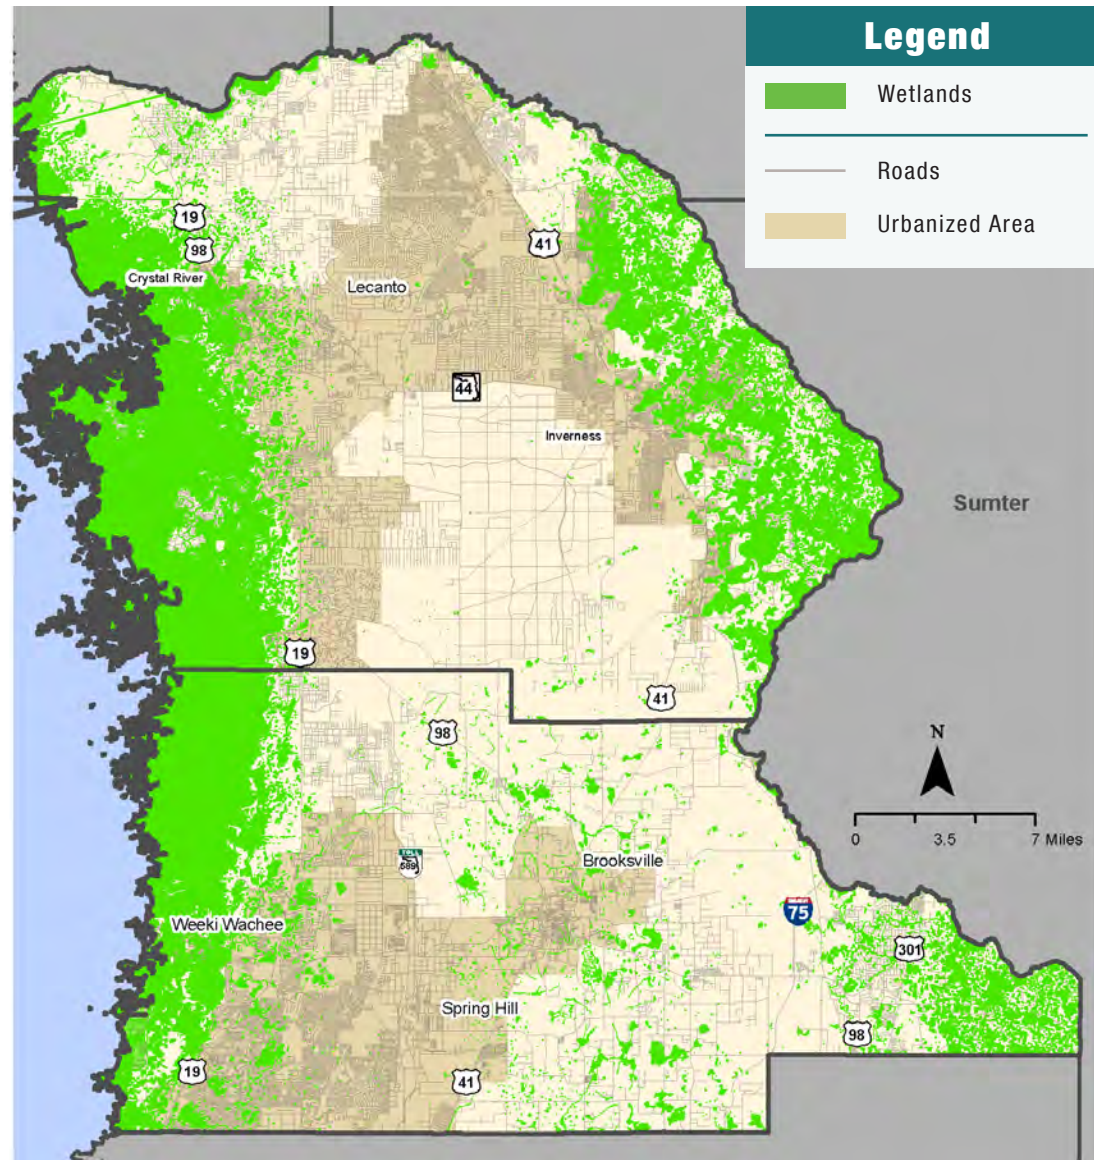

Planning for specific environmental mitigation strategies over the life of the long range transportation plan can be challenging. Potential mitigation challenges include lack of funding for mitigation projects and programs, lack of available wetland mitigation bank credits, improperly assessing cumulative impacts of projects, and permitting issues with the county, local, state and federal regulatory agencies. These challenges can be lessened when MPOs engage their stakeholders, including regulatory agencies, the public and other interested parties, through the public involvement process. The public involvement process provides MPOs an efficient method to gain input and address concerns about potential mitigation strategies and individual projects.

In addition to the process outlined in the Florida Statutes and implemented by the MPO and its partner agencies, the Efficient Transportation Decision Making (ETDM) process is used for seeking input on individual qualifying long range transportation projects allowing for more specific commentary. This provides assurance that mitigation opportunities are identified, considered and available as the plan is developed and projects are advanced. Through these approaches, the State of Florida along with its MPO partners ensures that mitigation will occur to offset the adverse effects of proposed transportation projects.

#### Wetlands

The Cost Feasible Plan roadway projects do not include new transportation corridors. There are wetlands adjacent to several of the existing corridors as shown in Figure 6-5. As mentioned above, the MPO has and will continue to coordinate with FDOT, FDEP, Florida Fish and Wildlife Conservation Commission (FWC), and Southwest Florida Water Management District (SWFMD) to mitigate transportation impacts on the environment including wetlands.

**Figure 32. Hernando/Citrus Wetlands**

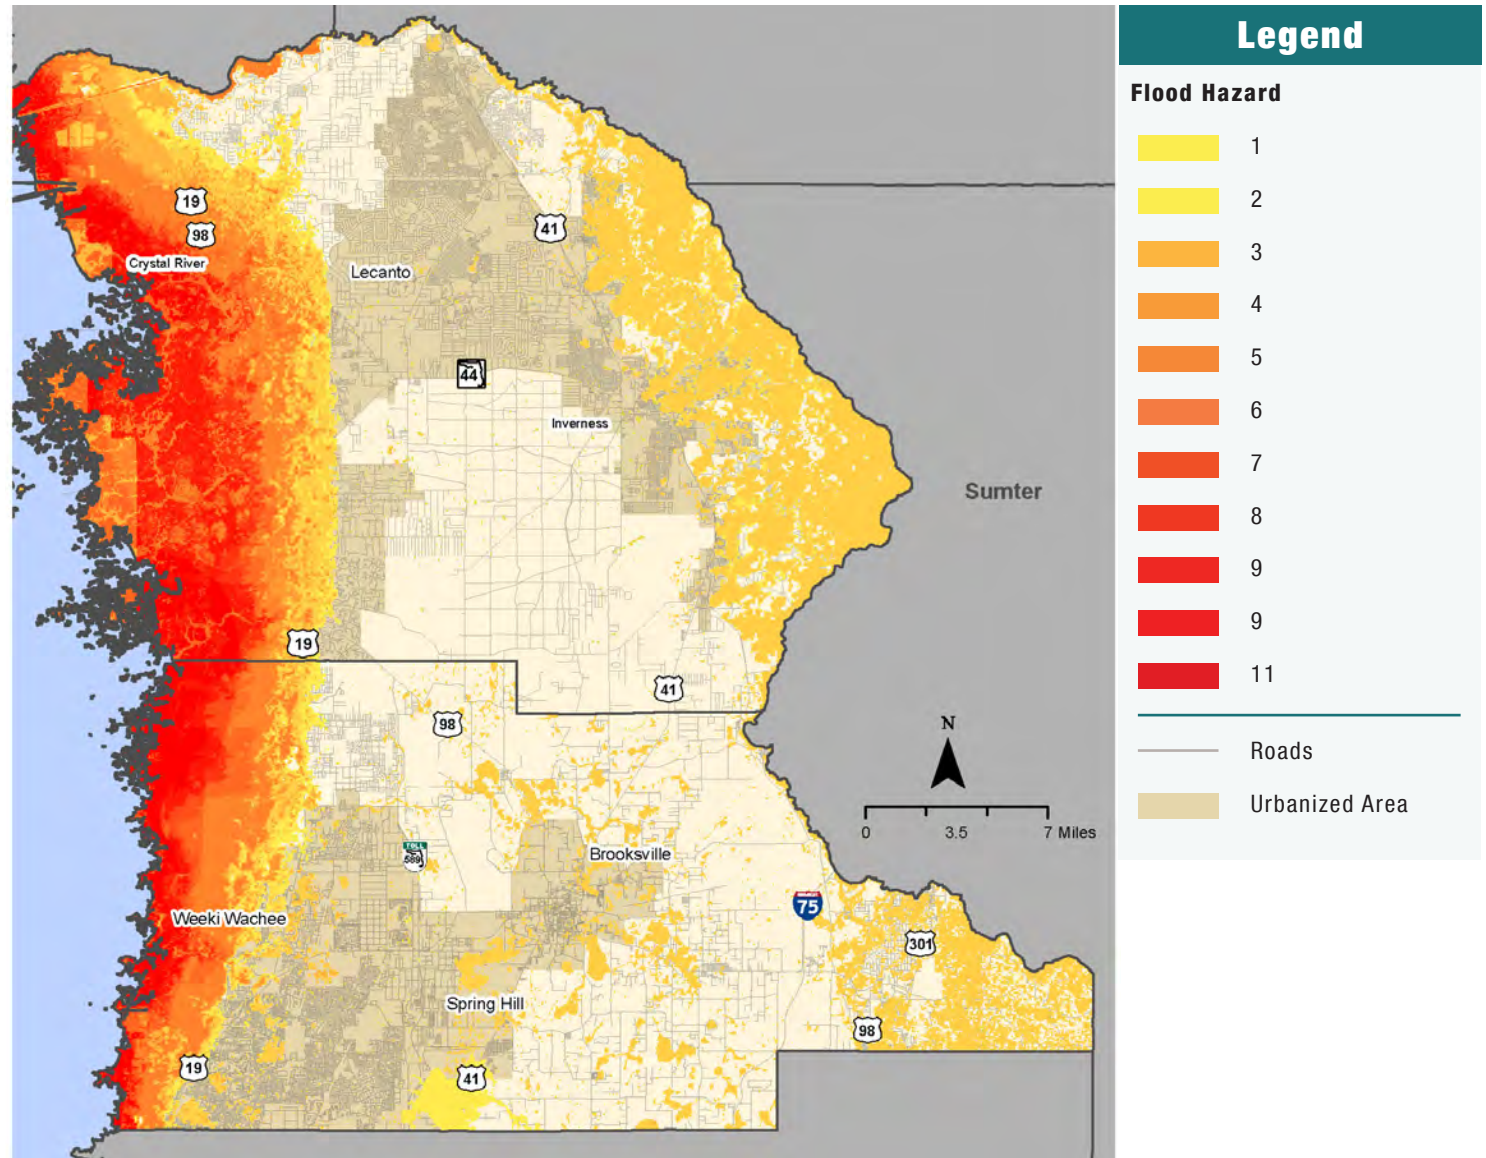

#### FLOOD ZONES

Floods are one of the most common hazards in the United States. The Hernando/Citrus MPO has used flood zone mapping to display vulnerable areas depicted in Figure 6-8. It is important to specifically understand the impacts to transportation infrastructure such as major roads and bridges and evacuation routes.

The Hernando/Citrus MPO will coordinate with the municipalities, counties, and other local and regional agencies to mitigate impacts to the transportation system from climate change. One of these strategies include using data and available information to understand transportation infrastructure that is vulnerable to extreme weather events.

**Figure 33. Hernando/Citrus Flood Zones**

WILDLIFE AND HABITAT COORDINATION

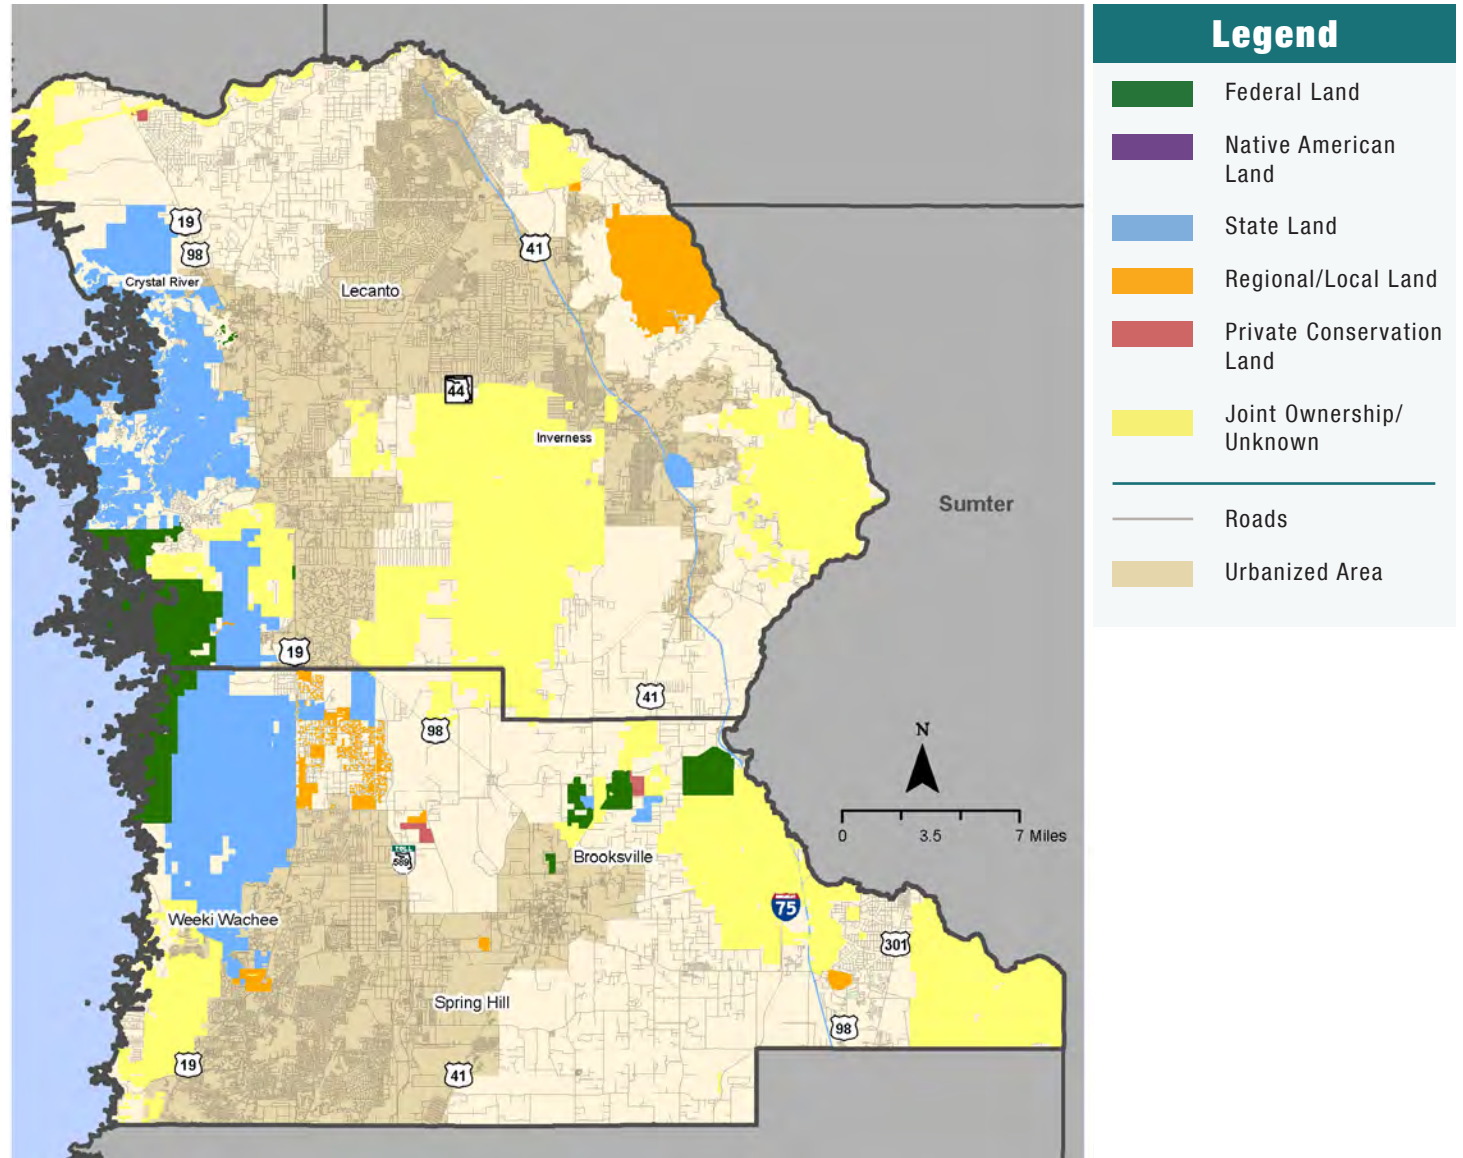

Potential wildlife and habitat impacts must be coordinated as another step of Environmental Mitigation. The importance of not only preserving land but connecting wildlife corridors to create an integrated ecosystem is paramount in considering transportation impacts. Hernando County and Citrus County each have significant public/private conservation areas, as well as areas of critical state concern.

Generally, this plan does not identify many needs that would potentially impact these areas. The few identified needs that may need additional coordination as the projects move closer to implementation are listed below in **Table 41**.

**Table 41. Planned Projects with Potential Environmental Impacts**

County	Project	Need Level	Area of Concern
Citrus	SR 200 (Carl G Rose Hwy) (Lecanto Hwy (CR 491) to Marion County Line)	Unfunded Need	Withlacoochee River
Hernando	SR 50 (US-301 to Sumter County Line)	Interim (2025-2035)	Richloam WMA

**Figure 34. Hernando/Citrus Protected Areas**

# Chapter 7

## IMPLEMENTATION

## Chapter 7

### Implementation

The Hernando/Citrus MPO 2045 LRTP represents a significant milestone in addressing the multimodal surface transportation needs of Hernando County and Citrus County; as well as the Tampa Bay Region. For key elements of the Plan to move forward, there are many essential follow up actions beyond normal project development activities that will need to be undertaken by the MPO and its agency and community partners. The implementation of the Plan will also be reliant upon the support and cooperation of many key local and regional partners including the local municipalities, Hernando County, Citrus County, the FDOT District Seven, the West Central Florida Metropolitan Planning Organizations (MPO) Chairs Coordinating Committee/Tampa Bay Area Regional Transportation Authority (TBARTA), and neighboring counties and MPOs, among others.

### Implementation Action Items

#### Major Program Priorities of the Hernando/Citrus MPO

The Hernando/Citrus MPO has made a commitment to utilize their federal funding allocation on a wide range of multimodal, safety, and intersection improvement projects. This federal funding is the primary funding source for intersection and operational improvements identified by the Congestion Management Process, Complete Streets corridor projects, transit facility enhancements, safety projects, resurfacing supplements (funding to make multimodal, safety, or intersection improvement concurrent with the routine resurfacing of a roadway), and stand-alone bicycle/pedestrian and trail projects. Funding for these programs will require the MPO to annually allocate funding for these program areas and prioritize projects from the following programs:

## ILLUSTRATIVE/UNFUNDED PRIORITY PROJECTS

Illustrative projects represent high priority projects that are not currently cost feasible but could be added to the Plan, should funding become available in the future. These projects include segments of Cobb Rd (US-98) from Cortez Blvd (SR 50) to Ponce De Leon Blvd in Hernando County and segments of Homosassa Trail (CR 490) from US-19 to SR 44 in Citrus County. This also include the potential development of two MCORES corridors: the Suncoast Connector and the Northern Turnpike Connector. The full list of Illustrative Projects can be found in **Appendix C (PDV) and D (YOE)**.

## COMPLIANCE WITH AND THE FAST ACT

The Hernando Citrus MPO 2045 LRTP is governed by the Fixing America's Surface Transportation Act (FAST Act) which was signed into law on December 4, 2015. The FAST Act enacted changes to the MAP-21 planning processes for the development of long range transportation plans, and this is the first Hernando/Citrus LRTP update to be regulated by the FAST Act.

## Plan Amendment Process

This Long Range Transportation Plan is not a static document. LRTP changes can occur due to shifts in availability of funding or updated project priorities, among other reasons. The FDOT provides to MPOs guidance to implement amendments to the LRTP.

The MPO may need to revise the LRTP outside of the standard 5-year update cycle. The Code of Federal Regulations defines two types of revisions—*administrative modifications and amendments*.

An *administrative modification* is a minor revision to the LRTP or TIP. It generally includes minor changes to project/phase costs, funding sources, or project/phase initiation dates. Public review and comments are not required, and fiscal constraint demonstration is not necessary either.

An *amendment* is a major revision to the LRTP (or TIP). Amendments include the addition or removal of projects from the plan, major changes to project costs, changes to major dates, or significant revisions to design concepts and scopes for existing projects. Amendments require re-demonstrating fiscal constraints, as well as public review and comment in accordance with the LRTP amendment and Public Participation Process (PPP). Changes to projects considered illustrative do not require an amendment. An amendment requires revenue and cost estimates supporting the plan to use an inflation rate(s) to reflect year of expenditure dollars, based on reasonable financial principles and information.

The LRTP can be revised at any time. It is important to note that the MPO does not have to extend the planning horizon of the LRTP for administrative modifications or for amendments. Florida Statute requires that the Hernando/Citrus MPO Board adopt amendments to the LRTP by a recorded roll call vote or hand-counted vote of the majority of the membership present. The amended long range plan is to be distributed in accordance with the FDOT MPO Handbook requirements. **Figure 34**, summarizes the LRTP amendment process.

**Figure 35. Summary of the LRTP Process**

**District provides financial estimates as needed.**

MPO amends the Long Range Transportation Plan because of changes in the TIP that must be consistent with the plan or for other reasons.

MPO prepares a draft of the plan documenting the amendment(s).

The MPO provides ample opportunities for public input into the process at key stages in the plan development.

The MPO revises the plan based on public input and comments from other agencies.

MPO approves final amended plan.

The MPO and FDOT District distribute the final amended plan according to the MPO Handbook.

## The Next Five Years

The Hernando/Citrus MPO has a clear vision for the transportation system within the two counties providing connections to the rest of the region. This LRTP seeks to address local and regional mobility needs, including placing a priority on smaller high value projects and mobility improvements to promote safety and economic development. A hallmark feature of the Hernando/Citrus MPO 2045 Long Range Transportation Plan is it supports the Hernando and Citrus communities through investing in safe, multimodal improvements that enhance the character of the area. The Hernando/Citrus MPO 2045 LRTP will remain in effect for five years until its update, which should be completed by December 2025.

The Hernando/Citrus MPO 2045 LRTP was developed to address the planning requirements available at the time that the plan was developed, including the Federal requirements of the FAST Act.

FDOT developed a checklist that includes the requirements of FAST Act and incorporates the expectations and guidelines from federal agencies and the Florida Metropolitan Planning Advisory Council (MPOAC) regarding 2045 LRTPs for MPOs in Florida. This check list is provided in Appendix F and is intended to document how a 2045 LRTP (1) meets requirements in federal code and regulation and state statute and (2) addresses expectations and guidelines from the federal agencies and the MPOAC.

## FEDERAL AND STATE REQUIREMENTS CHECKLIST

# Federal and State Requirements Checklist (September 17, 2019)

Source: Florida Department of Transportation, LRTP Review Checklist, (9/17/2019)

Section A- Federal Requirements		Where and How Addressed
<b>23 C.F.R. Part 450 – Planning Assistance and Standards</b>		
<b>A-1</b>	Does the plan cover a 20-year horizon from the date of adoption?  23 C.F.R. 450.324(a)	Resolution 2019-8 (p. ii) Chapter 1 – Introduction (p. 1-3) Chapter 2 – Goals, Objectives, & Performance Measures (p. 2-10) Chapter 3 – Planning Assumptions (p. 3-15) Chapter 4 – Transportation Plan (p. 4-12) Chapter 6 – Performance Measurement (p. 6-3, 6-13)
<b>A-2</b>	Does the plan address the planning factors described in 23 C.F.R. 450.306(b)?  <i>Proactive Improvements</i>  Risk and Resiliency  Does the plan improve the resiliency and reliability of the transportation system and reduce or mitigate stormwater impacts of surface transportation?    Travel and Tourism  Does that plan enhance travel and tourism?  23 C.F.R. 450.324(a)	Chapter 1 – Introduction (p. 1-4) Chapter 2 – Goals, Objectives, & Performance Measures (p. 2-6, 2-7) Chapter 4 – Transportation Plan (p. 4-62)        Chapter 1 – Introduction (p. 1-4) Chapter 4 – Transportation Plan (pp. 4-66 – 4-68) Chapter 6 – Performance Measurement (pp. 6-20 – 6-27)      Chapter 1 – Introduction (p. 1-4) Chapter 2 – Goals, Objectives, & Performance Measures (p. 2-3; 2-3 – 2-9) Chapter 3 – Planning Assumptions (p. 3-14) Chapter 4 – Transportation Plan (p. 4-50)
<b>A-3</b>	Does the plan include both long-range and short-range strategies/ actions that provide for the development of an integrated multimodal transportation system (including accessible pedestrian walkways and bicycle transportation facilities) to facilitate the safe and efficient movement of people and goods in addressing current and future transportation demand?  23 C.F.R. 450.324(b)	Chapter 2 – Goals, Objectives, & Performance Measures (p. 2-10) Chapter 3 – Planning Assumptions (pp. 3-16 – 3-23) <ul style="list-style-type: none"> <li>Population and Employment Forecast</li> </ul> Chapter 4 – Transportation Plan (pp. 4-38 – 4-41) <ul style="list-style-type: none"> <li>Roadway Needs</li> <li>Public Transportation Needs</li> <li>Bicycle/Pedestrian Needs</li> </ul>
<b>A-4</b>	Was the requirement to update the plan at least every five years met?  23 C.F.R. 450.324(c)	Yes; Hernando/Citrus 2040 LRTP was adopted December 9, 2014. The 2045 LRTP was adopted December 4, 2019. (p. ii)

Section A- Federal Requirements		Where and How Addressed
<b>A-5</b>	Did the MPO coordinate the development of the metropolitan transportation plan with the process for developing transportation control measures (TCMs) in a State Implementation Plan (SIP)?  23 C.F.R. 450.324(d)	N/A; Planning Area is not a non-attainment area
<b>A-6</b>	Was the plan updated based on the latest available estimates and assumptions for population, land use, travel, employment, congestion, and economic activity?  23 C.F.R. 450.324(e)	Chapter 3 – Planning Assumptions <ul style="list-style-type: none"> <li>Population and Employment Forecast</li> </ul>
<b>A-7</b>	Does the plan include the current and projected transportation demand of persons and goods in the metropolitan planning area over the period of the plan?  23 C.F.R. 450.324(f)(1)	Chapter 3 – Planning Assumptions (p. 3-14) Chapter 4 – Transportation Plan (pp. 4-14 – 4-59) Chapter 6 – Performance Measurement (p. 6-10; pp. 6-13 – 6-15)
<b>A-8</b>	Does the plan include existing and proposed transportation facilities (including major roadways, public transportation facilities, intercity bus facilities, multimodal and intermodal facilities, nonmotorized transportation facilities, and intermodal connectors that should function as an integrated metropolitan transportation system, giving emphasis to those facilities that serve important national and regional transportation functions over the period of the transportation plan?  23 C.F.R. 450.324(f)(2)	Chapter 4 – Transportation Plan (pp. 4-12 – 4-59)
<b>A-9</b>	Does the plan include a description of the performance measures and performance targets used in assessing the performance of the transportation system in accordance with §450.306(d)?  23 C.F.R. 450.324(f)(3)	Chapter 2 – Goals, Objectives, & Performance Measures (pp. 2-10 – 2-21) Chapter 6 – Performance Measurement (pp. 6-2 – 6-15)
<b>A-10</b>	Does the plan include a system performance report and subsequent updates evaluating the condition and performance of the transportation system with respect to the performance targets described in §450.306(d), including progress achieved by the metropolitan planning organization in meeting the performance targets in comparison with system performance recorded in previous reports, including baseline data?  23 C.F.R. 450.324(f)(4)(i)	Chapter 2 – Goals, Objectives, & Performance Measures (pp. 2-10 – 2-21) Chapter 4 – Transportation Needs (pp. 4-7 – 4-11) Chapter 6 – Performance Measurement (pp. 6-2 – 6-15) Technical Appendix G – FY 2019/20 – 2023/24 Transportation Improvement Program

## Appendix F

### Federal and State Requirements Checklist

Section A- Federal Requirements	Where and How Addressed
<p><b>A-11</b> Did the MPO integrate in the metropolitan transportation planning process, directly or by reference, the goals, objectives, performance measures, and targets described in other State transportation plans and transportation processes, as well as any plans developed under 49 U.S.C. chapter 53 by providers of public transportation, required as part of a performance-based program including:</p> <p>(i) The State asset management plan for the NHS, as defined in 23 U.S.C. 119(e) and the Transit Asset Management Plan, as discussed in 49 U.S.C. 5326;</p> <p>(ii) Applicable portions of the HSIP, including the SHSP, as specified in 23 U.S.C. 148;</p> <p>(iii) The Public Transportation Agency Safety Plan in 49 U.S.C. 5329(d);</p> <p>(iv) Other safety and security planning and review processes, plans, and programs, as appropriate;</p> <p>(v) The Congestion Mitigation and Air Quality Improvement Program performance plan in 23 U.S.C. 149(l), as applicable;</p> <p>(vi) Appropriate (metropolitan) portions of the State Freight Plan (MAP-21 section 1118);</p> <p>(vii) The congestion management process, as defined in 23 CFR 450.322, if applicable; and</p> <p>(viii) Other State transportation plans and transportation processes required as part of a performance-based program.</p> <p>23 C.F.R. 450.306 (d)(4)</p>	<p>Chapter 2 – Goals, Objectives, &amp; Performance Measures</p> <p>Chapter 2 – Goals, Objectives, &amp; Performance Measures (pp. 2-5 – 2-9; 2-17 – 2-19; 2-24 – 2-28) Chapter 6 – Performance Measurement (p. 6-6)</p> <p>Chapter 4 – Transportation Plan</p> <ul style="list-style-type: none"> <li>• Transportation Safety</li> </ul> <p>Chapter 6 – Performance Measurement (p. 6-6) Chapter 4 – Transportation Plan</p> <ul style="list-style-type: none"> <li>• Transportation Safety</li> </ul> <p>Chapter 6 – Performance Measurement (p. 6-6) Chapter 4 – Transportation Plan</p> <ul style="list-style-type: none"> <li>• Bicycle and Pedestrian Safety</li> <li>• Transportation Safety</li> <li>• Key Safety Emphasis Areas</li> </ul> <p>N/A – The CMAQ is not applicable to the Hernando/Citrus MPO area</p> <p>Chapter 2 – Goals, Objectives, &amp; Performance Measures (pp. 2-5 – 2-8; 2-20 – 2-21) Chapter 4 – Transportation Plan (pp. 4-12 – 4-14) Chapter 6 – Performance Measurement (p. 6-10)</p> <p>Chapter 2 – Goals, Objectives, &amp; Performance Measures (p. 2-10) Chapter 4 – Transportation Plan (pp. 4-38 – 4-41; 4-62 – 4-64) Technical Appendix H – Hernando/Citrus MPO Congestion Management Plan</p> <p>Chapter 2 – Goals, Objectives, &amp; Performance Measures (pp. 2-5 – 2-15) Chapter 6 – Performance Measurement (pp. 6-2 – 6-5)</p>

Section A- Federal Requirements		Where and How Addressed
<b>A-12</b>	Does the plan include operational and management strategies to improve the performance of existing transportation facilities to relieve vehicular congestion and maximize the safety and mobility of people and goods?  23 C.F.R. 450.324(f)(5)	Chapter 4 – Transportation Plan (pp. 4-38 - 4-41)  Technical Appendix H – Hernando/Citrus MPO Congestion Management Plan
<b>A-13</b>	Does the plan include consideration of the results of the congestion management process in TMAs, including the identification of SOV projects that result from a congestion management process in TMAs that are nonattainment for ozone or carbon monoxide?  23 C.F.R. 450.324(f)(6)	N/A –Hernando/Citrus MPO planning area is not a TMA.
<b>A-14</b>	Does the plan include assessment of capital investment and other strategies to preserve the existing and projected future metropolitan transportation infrastructure, provide for multimodal capacity increases based on regional priorities and needs, and reduce the vulnerability of the existing transportation infrastructure to natural disasters?  23 C.F.R. 450.324(f)(7)	Chapter 4 – Transportation Plan <ul style="list-style-type: none"> <li>Funding for operations and maintenance in addition to capital projects for roadways, transit, and bicycle, pedestrian, and trail facilities</li> <li>Transportation Resiliency</li> </ul>
<b>A-15</b>	Does the plan include transportation and transit enhancement activities, including consideration of the role that intercity buses may play in reducing congestion, pollution, and energy consumption in a cost-effective manner and strategies and investments that preserve and enhance intercity bus systems, including systems that are privately owned and operated, and including transportation alternatives, as defined in 23 U.S.C. 101(a), and associated transit improvements, as described in 49 U.S.C. 5302(a)?  23 C.F.R. 450.324(f)(8)	Chapter 4 – Transportation Plan (pp. 4-42 - 4-47) <ul style="list-style-type: none"> <li>Public Transportation Needs</li> </ul> Technical Appendix H – Hernando/Citrus MPO Congestion Management Plan  Technical Appendix K – 2045 LRTP Transit Evaluation
<b>A-16</b>	Does the plan describe all proposed improvements in sufficient detail to develop cost estimates?  23 C.F.R. 450.324(f)(9)	Chapter 4 – Transportation Plan <ul style="list-style-type: none"> <li>Financial Resources</li> </ul> Appendix A - Revenue Forecast Appendix C - 2045 LRTP Roadway Projects and Costs Present Day Value Appendix D - 2045 LRTP Roadway Projects and Costs Year of Expenditure Appendix E - 2045 LRTP Transit Cost Feasible Plan

## Appendix F

### Federal and State Requirements Checklist

Section A- Federal Requirements		Where and How Addressed
<b>A-17</b>	Does the plan include a discussion of types of potential environmental mitigation activities and potential areas to carry out these activities, including activities that may have the greatest potential to restore and maintain the environmental functions affected by the metropolitan transportation plan?  23 C.F.R. 450.324(f)(10)	Chapter 6 – Performance Measurement  Environmental Mitigation
<b>A-18</b>	Does the plan include a financial plan that demonstrates how the adopted transportation plan can be implemented?  23 C.F.R. 450.324(f)(11)	Chapter 4 – Transportation Plan <ul style="list-style-type: none"> <li>• Cost-Feasible Plan</li> </ul> Appendix A - Revenue Forecast Appendix C - 2045 LRTP Roadway Projects and Costs Present Day Value Appendix D - 2045 LRTP Roadway Projects and Costs Year of Expenditure
<b>A-19</b>	Does the plan include system-level estimates of costs and revenue sources to adequately operate and maintain Federal-aid highways and public transportation?  23 C.F.R. 450.324(f)(11)(i)	Chapter 4 – Transportation Plan <ul style="list-style-type: none"> <li>• Financial Resources</li> <li>• Cost-Feasible Plan</li> </ul> Appendix A - Revenue Forecast Appendix C - 2045 LRTP Roadway Projects and Costs Present Day Value Appendix D - 2045 LRTP Roadway Projects and Costs Year of Expenditure
<b>A-20</b>	Did the MPO, public transportation operator(s), and State cooperatively develop estimates of funds that will be available to support metropolitan transportation plan implementation, as required under §450.314(a)?  23 C.F.R. 450.324(f)(11)(ii)	Chapter 4 – Transportation Plan (pp. 4-42 - 4-44) <ul style="list-style-type: none"> <li>• Public Transportation</li> </ul> Appendix E - 2045 LRTP Transit Cost Feasible Plan Technical Appendix K - 2045 LRTP Transit Evaluation
<b>A-21</b>	Does the financial plan include recommendations on additional financing strategies to fund projects and programs included in the plan, and, in the case of new funding sources, identify strategies for ensuring their availability?  23 C.F.R. 450.324(f)(11)(iii)	Chapter 4 – Transportation Plan <ul style="list-style-type: none"> <li>• Illustrative (Tier 4) Projects</li> <li>• M-CORES (Regional Projects)</li> </ul>
<b>A-22</b>	Does the plan's revenue and cost estimates use inflation rates that reflect year of expenditure dollars, based on reasonable financial principles and information, developed cooperatively by the MPO, State(s), and public transportation operator(s)?  23 C.F.R. 450.324(f)(11)(iv)	Chapter 4 – Transportation Plan <ul style="list-style-type: none"> <li>• Financial Resources</li> </ul> Appendix C - 2045 LRTP Roadway Projects and Costs Present Day Value Appendix D - 2045 LRTP Roadway Projects and Costs Year of Expenditure

Section A- Federal Requirements		Where and How Addressed
<b>A-23</b>	Does the financial plan address the specific financial strategies required to ensure the implementation of TCMs in the applicable SIP?  23 C.F.R. 450.324(f)(11)(vi)	N/A –Hernando/Citrus MPO planning area does not have non-attainment status.
<b>A-24</b>	Does the plan include pedestrian walkway and bicycle transportation facilities in accordance with 23 U.S.C.17(g)?  23 C.F.R. 450.324(f)(12)	Chapter 4 – Transportation Plan <ul style="list-style-type: none"> <li>Bicycle and Pedestrian Plan</li> </ul>
<b>A-25</b>	Does the plan integrate the priorities, goals, countermeasures, strategies, or projects for the metropolitan planning area contained in the HSIP, including the SHSP, the Public Transportation Agency Safety Plan, or an Interim Agency Safety Plan?  23 C.F.R. 450.324(h)	Chapter 2 – Goals, Objectives, and Performance Measures (pp. 2-13 - 2-16)  Chapter 4 – Transportation Plan <ul style="list-style-type: none"> <li>Transportation Safety</li> </ul> Chapter 6 – Performance Measurement (p.6-3, 6-6)
<b>A-26</b>	Does the plan identify the current and projected transportation demand of persons and goods in the metropolitan planning area over the period of the plan?  23 C.F.R. 450.324(g)(1)	Chapter 6 – Performance Measurement <ul style="list-style-type: none"> <li>2045 Model Network</li> </ul> Appendix B - FY 2019/20 – 2023/24 Transportation Improvement Program Revenues and Projects
<b>A-27</b>	Did the MPO provide individuals, affected public agencies, representatives of public transportation employees, public ports, freight shippers, providers of freight transportation services, private providers of transportation (including intercity bus operators, employer-based commuting programs, such as carpool program, vanpool program, transit benefit program, parking cashout program, shuttle program, or telework program), representatives of users of public transportation, representatives of users of pedestrian walkways and bicycle transportation facilities, representatives of the disabled, and other interested parties with a reasonable opportunity to comment on the transportation plan using the participation plan developed under §450.316(a)?  23 C.F.R. 450.324(j)	Chapter 5 – Public Involvement  Chapter 6 – Performance Measurement <ul style="list-style-type: none"> <li>Environmental Justice</li> </ul> Technical Appendix P - 2045 LRTP Public Involvement Review

## Appendix F

### Federal and State Requirements Checklist

Section A- Federal Requirements		Where and How Addressed
<b>A-28</b>	<p>Did the MPO publish or otherwise make readily available the metropolitan transportation plan for public review, including (to the maximum extent practicable) in electronically accessible formats and means, such as the World Wide Web?</p> <p>23 C.F.R. 450.324(k), 23 C.F.R. 450.316(a)(1)(iv)</p>	<p>Chapter 5 – Public Involvement (p. 5-8)</p> <p>Technical Appendix P - 2045 LRTP Public Involvement Review</p>
<b>A-29</b>	<p>Did the MPO provide adequate public notice of public participation activities and time for public review and comment at key decision points, including a reasonable opportunity to comment on the proposed metropolitan transportation plan?</p> <p>Please see the “Stakeholder and Coordination Input” section of the 2018 FHWA LRTP Expectations Letter for guidance.</p> <p>23 C.F.R 450.316(a)(1)(i)</p>	<p>Chapter 5 – Public Involvement</p> <p>Technical Appendix P - 2045 LRTP Public Involvement Review</p>
<b>A-30</b>	<p>In developing the plan, did the MPO seek out and consider the needs of those traditionally underserved by existing transportation systems such as low-income and minority households?</p> <p>23 C.F.R 450.316(a)(1)(vii)</p>	<p>Chapter 5 – Public Involvement</p> <ul style="list-style-type: none"> <li>Environmental Justice Workshops</li> </ul>
<b>A-31</b>	<p>Has the MPO demonstrated explicit consideration of and response to public input received during development of the plan? If significant written and oral comments were received on the draft plan, is a summary, analysis, and report on the disposition of the comments part of the final plan?</p> <p>23 C.F.R. 450.316(a)(1)(vi) &amp; 23 C.F.R. 450.316(a)(2)</p>	<p>Chapter 5 – Public Involvement (pp. 5-8 - 5-9)</p> <ul style="list-style-type: none"> <li>Environmental Justice Workshops</li> </ul> <p>Technical Appendix P - 2045 LRTP Public Involvement Review</p>
<b>A-32</b>	<p>Did the MPO provide an additional opportunity for public comment if the final plan differs significantly from the version that was made available for public comment and raises new material issues which interested parties could not reasonably have foreseen from the public involvement efforts?</p> <p>Please see the “Stakeholder and Coordination Input” section of the 2018 FHWA LRTP Expectations Letter for guidance.</p> <p>23 C.F.R 450.316(a)(1)(viii)</p>	<p>Chapter 5 – Public Involvement (p. 5-9)</p> <p>Technical Appendix P - 2045 LRTP Public Involvement Review</p>

Section A- Federal Requirements		Where and How Addressed
<b>A-33</b>	<p>Did the MPO consult with agencies and officials responsible for other planning activities within the MPO planning area that are affected by transportation, or coordinate its planning process (to the maximum extent practicable) with such planning activities?</p> <p>Please see the “Proactive Improvements” section of the 2018 FHWA LRTP Expectations Letter for guidance.</p> <p>23 C.F.R. 450.316(b)</p>	<p>Chapter 1 – Introduction</p> <ul style="list-style-type: none"> <li>Federal Legislation and Guidance</li> </ul> <p>Chapter 2 – Goals, Objectives, and Performance Measures (pp. 2-5 - 2-26)</p> <p>Chapter 3 – Planning Assumptions</p> <ul style="list-style-type: none"> <li>Regional Coordination</li> </ul> <p>Chapter 6 – Performance Measurement</p> <ul style="list-style-type: none"> <li>Regional Environmental Consultation Workshop</li> </ul>
<b>A-34</b>	<p>If the MPO planning area includes Indian Tribal lands, did the MPO appropriately involve the Indian Tribal government(s) in the development of the plan?</p> <p>23 C.F.R 450.316(c)</p>	N/A – No Indian Tribal Lands are in the MPO Planning Area
<b>A-35</b>	<p>If the MPO planning area includes Federal public lands, did the MPO appropriately involve Federal land management agencies in the development of the plan?</p> <p>23 C.F.R 450.316(d)</p>	<p>Chapter 6 – Performance Evaluation</p> <ul style="list-style-type: none"> <li>Environmental Mitigation</li> </ul>
<b>A-36</b>	<p>In urbanized areas that are served by more than one MPO, is there written agreement among the MPOs, the State, and public transportation operator(s) describing how the metropolitan transportation planning processes will be coordinated to assure the development of consistent plans across the planning area boundaries, particularly in cases in which a proposed transportation investment extends across those boundaries?</p> <p>23 C.F.R. 450.314(e)</p>	<p>N/A – No urbanized areas served by multiple MPOs</p> <p>Chapter 3 – Planning Assumptions</p> <ul style="list-style-type: none"> <li>Regional Coordination</li> </ul>

## Appendix F

### Federal and State Requirements Checklist

Section B- State Requirements		Where and How Addressed
<b>Florida Statutes: Title XXVI – Public Transportation, Chapter 339, Section 175</b>		
<b>B-1</b>	Are the prevailing principles in s. 334.046(1), F.S. – preserving the existing transportation infrastructure, enhancing Florida’s economic competitiveness, and improving travel choices to ensure mobility – reflected in the plan?  ss.339.175(1), (5) and (7), F.S.	Chapter 2 – Goals, Objectives, and Performance Measures (pp. 2-8 - 2-10)
<b>B-2</b>	Does the plan give emphasis to facilities that serve important national, state, and regional transportation functions, including SIS and TRIP facilities?  ss.339.175(1) and (7)(a), F.S.	Chapter 4 – Transportation Plan (pp. 4-3 - 4-6; 4-12 - 4-14; 4-24 - 4-27)  Appendix A - Revenue Forecast Appendix C - 2045 LRTP Roadway Projects and Costs Present Day Value Appendix D - 2045 LRTP Roadway Projects and Costs Year of Expenditure
<b>B-3</b>	Is the plan consistent, to the maximum extent feasible, with future land use elements and the goals, objectives, and policies of the approved comprehensive plans for local governments in the MPO’s metropolitan planning area?  ss.339.175(5) and (7), F.S.	Chapter 3 – Planning Assumptions
<b>B-4</b>	Did the MPO consider strategies that integrate transportation and land use planning to provide for sustainable development and reduce greenhouse gas emissions?  ss.339.175(1) and (7) F.S.	Chapter 3 – Planning Assumptions (p. 3-6)  Chapter 4 – Transportation Plan (pp. 4-14 - 4-14)  Chapter 6 – Performance Measurement <ul style="list-style-type: none"> <li>• Environmental Mitigation</li> </ul>
<b>B-5</b>	Were the goals and objectives identified in the Florida Transportation Plan considered?  s.339.175(7)(a), F.S.	Chapter 2 – Goals, Objectives, and Performance Measures (pp. 2-8 - 2-9)

Section B- State Requirements		Where and How Addressed
<b>B-6</b>	<p>Does the plan assess capital investment and other measures necessary to</p> <p>1) ensure the preservation of the existing metropolitan transportation system, including requirements for the operation, resurfacing, restoration, and rehabilitation of major roadways and requirements for the operation, maintenance, modernization, and rehabilitation of public transportation facilities; and</p> <p>2) make the most efficient use of existing transportation facilities to relieve vehicular congestion and maximize the mobility of people and goods?</p> <p>s.339.175(7)(c), F.S.</p>	Chapter 4 – Transportation Plan (pp. 4-7 - 4-37)
<b>B-7</b>	<p>Does the plan indicate, as appropriate, proposed transportation enhancement activities, including, but not limited to, pedestrian and bicycle facilities, scenic easements, landscaping, historic preservation, mitigation of water pollution due to highway runoff, and control of outdoor advertising?</p> <p>s.339.175(7)(d), F.S.</p>	<p>Chapter 4 – Transportation Plan (pp. 4-50 - 4-60)</p> <p>Chapter 6 – Performance Measurement (pp. 6-20 - 6-29)</p>
<b>B-8</b>	<p>Was the plan approved on a recorded roll call vote or hand-counted vote of the majority of the membership present?</p> <p>s.339.175(13) F.S.</p>	<p>Pages i - iii</p> <p>Chapter 5 – Public Involvement (p. 5-9)</p>

## Appendix F

### Federal and State Requirements Checklist

Section C- Proactive Recommendations		Where and How Addressed
C-1	Does the plan attempt to improve the resilience and reliability of the transportation system or mitigate the impacts of stormwater on surface transportation?  23 C.F.R 450.306(b)(9)	This will be included in the next LRTP Update.
C-2	Does the plan proactively identify climate adaptation strategies including—but not limited to—assessing specific areas of vulnerability, identifying strategies to reduce emissions by promoting alternative modes of transportation, or devising specific climate adaptation policies to reduce vulnerability?	This will be included in the next LRTP Update.
C-3	Do the plan consider the transportation system's accessibility, mobility, and availability to better serve an aging population?	Chapter 4 – Transportation Plan <ul style="list-style-type: none"> <li>Public Transportation</li> </ul> Technical Appendix K - 2045 LRTP Transit Evaluation
C-4	Does the plan consider strategies to promote inter-regional connectivity to accommodate both current and future mobility needs?	Chapter 3 – Planning Assumptions (pp. 3-14 - 3-24)  Chapter 4 – Transportation Plan (pp. 4-34 - 4-37)  Chapter 6 – Performance Measurement (pp. 6-7 - 6-9; 6-13 - 6-15)
C-5	Is the MPO considering the short- and long-term effects of population growth and or shifts on the transportation network?	Chapter 3 – Planning Assumptions (pp. 3-14 - 3-23)  Chapter 4 – Transportation Plan (pp. 4-34 - 4-61)

TRANSPORTATION PLAN

## **ADDITIONAL RESOURCES**

This document consists of the complete Long Range Transportation Plan for the Hernando/Citrus Metropolitan Planning Organization as adopted on December 4, 2019. A Technical Appendix is provided as a companion to this document. The Technical Appendix documents technical elements of the plan in greater detail beyond what is included in this report. For a summary of the [\*Hernando/Citrus MPO 2045 LRTP\*](#), please consult the [\*Hernando/Citrus MPO 2045 LRTP Adoption Report\*](#).
